# HSBC SELECT EQUITY (B)

Monthly Report  
February 2026

## Objective and investment policy

The objective of the mutual fund is to offer flexible management, primarily invested in equity markets, over a minimum investment period of five years. Despite operating within larger allocation limits, the mutual fund's profile may be compared with an allocation made up of 95% equities and 5% public and private bonds on average, exposed in developed markets with a euro bias as well as in emerging markets. The mutual fund is managed actively without any reference to a benchmark index.

The investment strategy is discretionary and is based on a portfolio management process organised around three pillars:

- a medium/long-term strategic asset allocation depending on the manager's level of conviction (asset classes, geographical areas, sectors),
- a tactical allocation resulting from the manager's short-term convictions in order to strive to take advantage of market opportunities,
- a selection of undertakings for collective investment (UCI) and managers able to, according to us, generate performance over time.

## Performance and risk analysis

Fund's performance

### Net Cumulated performance

	1 month	1 year	3 years	5 years	7 years	12/03/2018*
Portfolio	2.83%	14.84%	47.22%	56.17%	83.77%	82.74%

### Indicators & ratios (weekly)

	1 year	3 years	5 years	12/03/2018*
Fund's volatility	11.77%	10.00%	10.76%	14.15%
Sharpe ratio				

### Net performance by calendar year

	2026	2025	2024	2023	2022	2021
Portfolio	6.40%	14.65%	13.54%	10.80%	-11.95%	19.21%
	2020	2019	2018			
Portfolio	2.72%	22.36%	-9.73%			

The performance figures relate to the past performance which should not be seen as an indication of future returns. The capital invested in the fund can increase or decrease and is not guaranteed. Future returns will depend, inter alia, on market conditions, fund manager's skill, fund risk level and fees.

Strategic Allocation  
**95% Equities**

#### Legal Form

Mutual Fund regulated under French law

#### Investment horizon

> 5 years

#### Dividend Policy

(BC): Accumulation Shares

#### Start Date of Management\*

12/03/2018

### Risk and Reward Profile

#### Do not run any unnecessary risk. Read the Key Information Document (KID).

The risk and reward indicator is based on price volatility over the last five years, and is an indicator of absolute risk. Historical data may not be a reliable indication for the future. The value of an investment, and any income from it, may fall as well as rise, and you may not get back the amount you originally invested. The category is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest category does not mean a risk-free investment. This Mutual Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

## Analysis of the investment strategy

### Portfolio Composition

	30/01/2026 % TNA	26/02/2026 % TNA	Variation*

## Fund Manager Commentary

### Economic Environment

---

The US Supreme Court has overturned reciprocal tariffs; D. Trump immediately replaced them with an executive order setting a 15% rate, with exceptions for several sectors (energy, pharmaceuticals, electronics, automobile). The average tax rate remains close to previously applied levels, but this measure introduces uncertainty regarding potential refunds of the \$175 billion already collected.

In the United States, fourth-quarter GDP disappointed, penalized by the negative contribution of public spending due to the government shutdown in October and early November. In the eurozone, growth remained positive, supported by increasingly favorable German fiscal policy. Companies earnings published for the fourth quarter exceeded expectations in both Europe and the United States, but their reception was mixed, particularly in growth sectors.

Over the month, equity markets performed well in an environment marked by continued sector rotation. The MSCI World Index in euros rose by 1.78%, supported by value and high-dividend stocks, while segments most exposed to growth themes remained more volatile. Eurozone equities stood out with a 3.52% increase (MSCI Eurozone), as did emerging markets, which rose by 5.41% in euros.

In bond markets, the decline in sovereign yields reflected increased demand for protection in an environment of uncertainty over trade policy. The yield on the 10-year US Treasury fell by about 29 basis points over the month to 3.95%, while the German Bund dropped by about 20 basis points to 2.64%. Brent crude oil appreciated, gaining 2.53%, and gold fully played its role as a safe haven, rising by 7.86% in euros.

### Performance & current holdings

---

We benefited from our overweight position in equities, particularly due to our preference for Europe over the United States. We are further reducing our exposure to US equities in favor of Japan and emerging markets.

Within US equities, the portfolio benefited from its overweight in value stocks. We are now reducing these positions, as well as those in growth stocks, and introducing two new, more defensive vehicles, favoring yield and low-volatility stocks.

European value stocks also outperformed. We are reducing positions in growth and small-cap stocks to strengthen value holdings and introduce a position in low-volatility stocks. Our underweight in French and German stocks was a drag on performance.

In emerging markets, diversification into Turkish stocks and frontier markets did not contribute positively. The thematic allocation benefited from the outperformance of vehicles linked to precious and transition metals. We are introducing a fund focused on listed infrastructure companies, reducing our allocation to AI-related assets.

Finally, diversification through commodities and trend-following funds had a positive effect.

### Outlook

---

Our central macroeconomic scenario for the coming months remains one of resilient global growth, but with a more balanced distribution across regions, a gradual normalization of inflation, and a convergence of monetary policies toward neutral levels. In this context, our asset allocation remains pro-risk, with a slight overweight in equities relative to bonds.

Within equities, we favor a balanced exposure between Europe and the United States, with diversification into Japan and emerging markets. In line with our view that market leadership is broadening beyond just large US technology stocks, we are increasing the share of yield and low-volatility stocks.

Additionally, we are paying increased attention to alternative assets, trend-following strategies, and commodities—including gold—to strengthen portfolio resilience and diversify sources of return.

## Fund Management Team

### **Laurence Jobert**

Fund manager

Laurence Jobert has been a multi-asset fund manager since December 2014. She joined HSBC in 2007 as an equity fund manager then as a relationship manager. Prior to joining HSBC, Laurence worked for La Banque Postale Asset Management as quantitative equity fund manager from 1999 to 2007. Laurence holds an Applied Mathematics Master's Degree I from Paris I and Paris VII University and a Master's Degree II in Quantitative Methods for Management from Paris X Nanterre University. She also holds a SFAF (Sociétés des Analystes Financiers) financial analyst degree and a CIIA (Certified International Investment Analyst) degree.

### **Stéphane Mesnard**

Fund manager

Stéphane Mesnard has been a multi-asset fund manager since November 2012 and he has been working in this sector since he joined the HSBC group in 2005. Before taking up his current position, he worked in the financial engineering department at Louvre Gestion (formerly Banque du Louvre), an investment management firm dedicated to the HSBC group's private banking activities in France. He gained a Master's degree in finance from Paris II - Panthéon Assas University and qualified as a Chartered Financial Analyst (CFA) in 2009.
