HSBC Global Asset Management Shariah Committee

HSBC Investment Funds (Luxembourg) S.A. (the “Management Company”) has entered into a Shariah Compliance Advisory Agreement with HSBC Bank Middle East Limited under which the latter agrees to appoint the members of the HSBC Global Asset Management Shariah Committee (the “Shariah Committee"). The members of the Shariah Committee are

Sh. Nizam Yaquby - resident in Bahrain
Dr. Mohammed Elgari - resident in Saudi Arabia
Dr. Aznan Hassan – resident in Malaysia

Directors' Report

The board of directors of the ICAV (each a "Director", together the "Directors" or the "Board") submit their annual report together with the audited financial statements for the financial year ended 31 December 2025 (the "Financial Statements").

ICAV information

HSBC Global Funds ICAV (the "ICAV") was incorporated as an open-ended umbrella type Irish collective asset-management vehicle with limited liability and segregated liability between sub-funds to carry on business under the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") on 28 November 2017 with registration number C173463. The ICAV is registered by the Central Bank of Ireland (the "Central Bank") as an ICAV pursuant to Part 2, Chapter 1 of the ICAV Act and authorised as a UCITS fund pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the "2011 UCITS Regulations"), and is also subject to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations", and together with the 2011 UCITS Regulations, the "UCITS Regulations").

The ICAV is structured as an umbrella fund and may comprise of several portfolios of assets. The share capital of the ICAV may be divided into different classes of shares with one or more classes representing a separate sub-fund comprising a separate pool of assets and which pursues its investment objective through separate investment policies. The assets of each sub-fund will be invested in accordance with the investment objective and policies applicable to such sub-fund as disclosed in the prospectus of the ICAV (the "Prospectus") and the relevant sub-fund's supplement (the "Supplement").

The sole object of the ICAV is the collective investment in either or both of transferable securities or other liquid financial assets referred to in Regulation 68 of the UCITS Regulations, of capital raised from the public which operates on the principle of risk-spreading.

The ICAV currently consists of 30 active sub-funds in operation of which 5 sub-funds commenced and 1 sub-fund was terminated as at 31 December 2025 (31 December 2024: 26).

Corporate Governance Statement

The Board is committed to maintaining the highest standards of corporate governance and is accountable to Shareholders for the governance of the ICAV's affairs.

The ICAV's corporate governance practices comply with the following:

i) The European Communities (Directive 2006/43/EC) Regulations which requires the inclusion of a corporate governance statement in the Directors' Report;

ii) The ICAV Act;

iii) The Instrument of Incorporation of the ICAV which is available for inspection at the registered office of the ICAV;

iv) The Financial Conduct Authority's UK Listing Rules ("UKLR") as they apply to open-ended investment companies under Chapter 12 of UKLR

v) The UCITS Regulations; and

vi) The Irish Funds' Corporate Governance Code for Collective Investment Schemes and Management Companies (December 2011) (the "IF Code").

Directors' Report (continued)

Compliance with the IF Code

The Directors have adopted the IF Code with effect from 19 December 2017. The Directors have reviewed and assessed the measures included in the IF Code and consider the corporate governance practices and procedures since the adoption of the IF Code as consistent therewith. The Board considers that the ICAV has complied in all material aspects with the IF Code throughout this accounting year and that it complies with the various other corporate governance requirements prescribed by the legislation noted above.

Internal controls and risk management systems

The Directors in conjunction with the Management Company are responsible for establishing and maintaining adequate internal control and risk management systems of the ICAV in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the ICAV's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors in conjunction with the Management Company have procedures in place designed to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and interim Financial Statements. The annual and interim Financial Statements of the ICAV are required to be approved by the Directors and filed with the Central Bank. The annual Financial Statements are required to be audited by an independent auditor who reports annually to the Board of Directors on their findings. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

The Management Company has established processes regarding internal control and risk management systems designed to ensure their effective oversight of the financial reporting process. These include appointing the Administrator to maintain adequate accounting records of the ICAV independently of the Investment Managers and the Depositary. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

The Management Company also periodically reviews the Administrator's financial accounting and reporting routines. The Board of Directors is responsible for reviewing the independent auditor's performance, qualifications and independence. The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors.

The Directors receive regular presentations and review reports from the Management Company, the Depositary, the Investment Managers and the Administrator. The Directors also have an annual process to consider and address any shortcomings identified and measures recommended by the independent auditor.

Dealings with shareholders

The Investors invest in sub-funds to gain exposure to the expertise of the Investment Managers and investment strategies. The ICAV has appointed the Distributor who is tasked with actively managing the relationship between the ICAV and Shareholders. The Distributor provides the Board with quarterly updates which form the primary information source for the Directors to understand the views of major Shareholders of the ICAV. A senior representative of the Distributor attends each Board meeting and presents a report providing the Directors with additional information on the ongoing shareholder relationships.

The ICAV also communicates with Shareholders through the annual and interim Financial Statements which aim to provide Shareholders with a full understanding of the ICAV's activities and its results. Additional information is also available on the website at www.assetmanagement.hsbc.com.

The Directors have elected to dispense with the holding of an annual general meeting of Shareholders in accordance with section 89 of the ICAV Act. Notwithstanding this, one or more members of the ICAV holding, or together holding, not less than 10% of the voting rights in the ICAV, or the auditor of the ICAV, may require the ICAV to hold an annual general meeting in a year by giving notice in writing to the ICAV in the previous year or at least one month before the end of that year. The ICAV consists of sub-funds which are both accumulating and distributing. Please refer to note 11 for details of distributions paid during the year.

Directors' Report (continued)

Composition and operation of the board of directors

Unless otherwise determined by the ICAV in general meeting the number of Directors shall not be less than two. Currently the Board of Directors (the "Board") is composed of six Directors, being those listed in General Information. The Directors meet at least quarterly.

The business of the ICAV is managed by the Directors, who exercise all such powers of the ICAV as are, by the Act or by the Instrument of Incorporation of the ICAV, required to be exercised by the ICAV in a general meeting. A Director may, and the ICAV Secretary on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the Chairman has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

The principal responsibility of the Directors is oversight of the business affairs of the ICAV and consistent with these oversight responsibilities the Directors have delegated management functions and responsibilities to duly qualified service providers. Such service providers are subject to ongoing oversight by the Directors.

Accounting Records

The Directors believe that they have complied with the ICAV's obligation with regard to accounting records by engaging the services of the Administrator, who employs personnel with appropriate expertise and adequate resources, appropriate systems and procedures to provide the ICAV's finance function. The accounting records are retained at the office of the Administrator at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland.

Directors and secretary

The names of the persons who were Directors at any time during the financial year ended 31 December 2025 are set out on page 1. All the Directors serve in a non-executive capacity. Goodbody Secretarial Limited held the office of secretary (the "ICAV Secretary") throughout the financial year. Effective 1 January 2026, the Company Secretary changed to Matsack Trust Limited.

Directors' and Secretary's interests

None of the Directors nor the Secretary held any interest, beneficial or otherwise, in the share capital of the ICAV during or at the end of the financial year.

The Board of Directors are not aware of any contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors had any interest at any time during the year ended 31 December 2025, other than those described in Note 12, 'Related Parties'.

Employees

The governance framework of the ICAV reflects the fact that, as a collective investment scheme, it has no employees and outsources investment management and administration. The Management Company is responsible on a day-to-day basis, under the supervision of the Directors, for providing marketing, investment management and advice services in respect of all sub-funds. The Management Company employs a number of staff across different categories including senior management to oversee their responsibilities.

Directors' Report (continued)

Review of performance, risks, uncertainties and future developments

The ICAV's overall risk management policy focuses on the agreed risk management mechanisms and techniques that are used by the Investment Managers to measure, manage and report the relevant risks which the sub-funds of the ICAV are or might be exposed to. The main risks arising from investment in the ICAV include, but are not limited to, the risks referred to in Note 4 of these Financial Statements. The value of the assets of the ICAV may be affected by uncertainties such as international political developments or conflicts, changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in applicable laws and regulations.

The ICAV's business activities and performance during the year together with the factors likely to affect its future development, are set out in the Investment Managers' Reports.

The ICAV will continue its investment objective as set out in the relevant sub-fund's Supplement.

Key performance indicators

The key performance indicators monitored for each sub-fund include the performance of the sub-funds and the financial position. The financial position of the ICAV is described in the Financial Statements on pages 46 to 60. Key performance indicators monitored by the Directors include the month to month movement in the NAV per share, the tracking of each Sub-Fund's performance to the performance of the relevant Index and the share capital movements.

Segregated liability

The ICAV has segregated liability between its sub-funds and accordingly any liability incurred on behalf of or attributable to any sub-fund shall be discharged solely out of the assets of that sub-fund. As of the date of the financial year end the Directors are not aware of any unrecognised existing or contingent liability of any sub-fund of the ICAV.

Significant events during the financial year

1. On 1 January 2025, Simon Fryatt resigned from the Board of Directors and Olga de Tapia was appointed to the Board of Directors.

2. The updated supplement for HSBC Global Funds ICAV – US Government Bond Index Fund was noted by the Central Bank on 3 January 2025 to reflect the change in name to HSBC Global Funds ICAV – US Government Bond UCITS ETF; the establishment of ETF shares in the sub-fund; an additional fee of up to 0.03% for Hedged Share Classes was removed and included as part of the maximum overall ongoing charge and the settlement of shares subscribed or redeemed was changed to two business days after the relevant dealing day

3. HSBC Global Funds ICAV – Japan Government Bond UCITS ETF was approved by the Central Bank on 7 February 2025.

4. The updated supplements for HSBC Global Funds ICAV – Euro Lower Carbon Government 10+ Year Bond UCITS ETF and HSBC Global Funds ICAV – Euro Lower Carbon Government 1-3 Year Bond UCITS ETF were noted by the Central Bank on 21 February 2025 to update the name of the indices in the relevant supplement.

5. The proportion of HSBC Global Funds ICAV – Global Aggregate Bond UCITS ETF that could be subject to securities lending arrangements increased from 30% to a maximum of 50%.

6. HSBC Global Funds ICAV – Japan Equity Index Fund was closed on 24 March 2025.

Directors' Report (continued)

Significant events during the financial year (continued)

7. The updated supplements for HSBC Global Funds ICAV – US Corporate Bond UCITS ETF (formerly HSBC Global Funds ICAV – US Corporate Bond Index Fund) and HSBC Global Funds ICAV – Euro Corporate Bond UCITS ETF (formerly HSBC Global Funds ICAV – Euro Corporate Bond Index Fund) were noted by the Central Bank on 8 April 2025 to reflect name change and establishment of ETF shares in the sub-funds.

8. HSBC Global Funds ICAV - US Treasury Bond UCITS ETF was approved by the Central Bank on 8 April 2025.

9. HSBC Global Funds ICAV - Global Transition Resources Leader Equity Fund was approved by the Central Bank on 17 April 2025.

10. The updated supplement for HSBC Global Funds ICAV – Global Corporate Bond UCITS ETF was noted by the Central Bank on 28 April 2025 to remove the disclosure on asset backed securities and mortgage backed securities.

11. Effective 30 April 2025 new name changes came into effect for the following sub-funds. The updated supplements were noted by the Central Bank to reflect the same

    - HSBC Global Funds ICAV – HSBC MSCI Emerging Markets Small Cap ESG Fund's name was changed to HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Small Cap Screened Fund;
    - HSBC Global Funds ICAV – HSBC MSCI Emerging Markets Value ESG Fund's name was changed to HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Value Screened Fund; and
    - HSBC Global Funds ICAV – Global Sustainable Government Bond UCITS ETF's name was changed to HSBC Global Funds ICAV – Global ESG Government Bond UCITS ETF.

12. The updated supplements of HSBC Global Funds ICAV – Global ESG Government Bond UCITS ETF, HSBC Global Funds ICAV - Euro Lower Carbon Government 10+ Year Bond UCITS ETF, HSBC Global Funds ICAV - Euro Lower Carbon Government 1-3 Year Bond UCITS ETF, HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Small Cap Screened Fund, HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Value Screened Fund, HSBC Global Funds ICAV - Global Aggregate Bond ESG UCITS ETF and HSBC Global Funds ICAV - Sustainable Development Bank Bonds UCITS ETF were noted by the Central Bank on 30 April 2025 to reflect the extension of the initial offer period.

13. HSBC Global Funds ICAV - Euro Government Bond UCITS ETF, HSBC Global Funds ICAV - US Treasury Bond UCITS ETF and HSBC Global Funds ICAV - Japan Government Bond UCITS ETF were launched on 8 May 2025.

14. The updated supplement for HSBC Global Funds ICAV - Japan Government Bond UCITS ETF was noted by the Central Bank on 8 May 2025 to reflect the extension of the initial offer period.

15. HSBC Global Funds ICAV – Global Transition Resources Equity Fund was launched on 11 June 2025.

16. Effective 1 July 2025, the registered address of the Company changed to 25 North Wall Quay, Dublin 1, Ireland.

17. HSBC Global Funds ICAV – Credit Income Advance Fund was noted by the Central Bank on 28 October 2025 and was launched on 15 December 2025.

18. The updated prospectus and supplements were noted by the Central Bank on 22 December 2025 to remove references to the charity name and revise the wording on responsible investing.

Directors' Report (continued)

Significant events during the financial year (continued)

19. It was identified during the reporting period that some costs included in the calculation of the PRIIP KID transaction costs figure may have been incorrect for certain sub-funds. This was due to a number of underlying trades not being included in the calculation in the previous 3 year period. Investors were notified via disclaimers on the KIDs, the European PRIIP Template ("EPT"), European MIFiD Template ("EMT") files and the relevant websites. Following a detailed assessment by the Board, the appointed Management Company and the Investment Adviser it was further determined that the impact of this error was zero or negligible for majority of the sub-funds, with the exception of two sub-funds (HSBC Global Funds ICAV - Multi-Factor EMU Equity Fund and HSBC Global Funds ICAV - Cross Asset Trend Fund) which saw a change in the estimated transaction costs over a 3 year period of 0.07% and 0.04% respectively. These published transaction costs calculations have no bearing on the NAV and do not impact investor returns. All transaction costs have been amended if required, within the EMT data files for each sub-fund.

Significant events since the financial year end

Significant events since the financial year end are disclosed in Note 16.

Connected Persons transactions

The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 require that any transaction carried out with the ICAV by the Management Company or Depositary to the ICAV and the delegates or sub-delegates of the Management Company or Depositary (excluding any non-group company sub-custodians appointed by the Depositary) and any associated or group companies of the Management Company, Depositary, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and must be in the best interests of the Shareholders of the ICAV.

The board of directors of the Management Company is satisfied that there are arrangements, evidenced by written procedures, in place to ensure that any transaction carried out with the ICAV by a Connected Person is conducted at arm's length and in the best interests of the Shareholders of the ICAV.

The board of directors of the Management Company is satisfied that all transactions with a Connected Person entered into during the year complied with the requirements that any transaction carried out with the ICAV by a Connected Person is conducted at arm's length and in the best interests of the Shareholders of the ICAV.

Auditor

KPMG Chartered Accountants were appointed as statutory auditor on 19 December 2017 and are willing to continue in office in accordance with section 125 of the ICAV Act.

Results and dividends

The results for the financial year are shown in the Statement of Comprehensive Income. The Board of Directors may declare at its discretion, dividends in respect of each distribution share class of each sub-fund. Dividend distributions during the financial year are set out in Note 11 of the Financial Statements.

Going concern

The ICAV's business activities, together with the factors likely to affect its future development, its financial position, financial risk management objectives, details of its financial instruments and derivative activities, and its exposures to price, credit and liquidity risk are described as part of Note 4. The ICAV has considerable financial resources in the form of highly liquid investments and cash balances. As a consequence, the Directors believe that the ICAV is well placed to manage its business risks successfully.

Directors' Report (continued)

Going concern (continued)

After making enquiries, the Directors have a reasonable expectation that the ICAV has adequate resources to continue in operational existence for a period of at least twelve months from the date when the financial statements are authorised for issue.

Diversity report

The Board acknowledges the importance of diversity to enhance its operation. During the selection process for new Directors, the Board is committed to selecting those with diversity of age, gender and educational and professional background and candidates for appointment are selected based on these attributes. The Board's policy is that selection decisions are based on merit and objective criteria, that recruitment is fair and non-discriminatory and within this context promote diversity of gender, social and ethnic backgrounds, cognitive and personal strengths. The Board has not set specific targets in respect of diversity but acknowledges its importance and currently has female representation of 50% and Directors with a wide variety of skills and experience.

The objective of the Board Diversity and Inclusion Policy is to ensure diversity and inclusion is taken into consideration in the succession planning, selection, nomination, operation and evaluation of the Board.

The Board notes the diversity and inclusion policy of HSBC Group (the "Group"), which is focused on building a more diverse and inclusive workforce, regarding diversity and inclusion as a critical component to developing a sustainable and successful business within the Group and is informed by the Group's deep roots in many geographical regions and its international approach. In particular, it is noted that the Group policy is particularly focused on:

- improving the diversity of its workforce;
- fostering open, inclusive and, where appropriate, challenging discussion; and
- leveraging diversity of thought.

The Board is conscious of its regulatory obligations in relation to Board composition. In considering Board diversity, the Board will also take into account the following non-exhaustive factors:

1. the obligation to have two Directors resident in Ireland on the Board;
2. the obligation for the ICAV to comply with the Central Bank's Fitness and Probity Regime;
3. the Board's existing arrangements with current Directors;
4. the nature, scale and complexity of the ICAV and its activities;
5. the obligation to act in the best interests of investors, including in relation to costs; and
6. market sentiment, which may favour the capture of a diverse range of perspectives, insights and challenge on a Board, so as to support good decision-making.

Taking into account the objectives of this ICAV's policy and the factors listed above, new appointments to the Board will be made on merit, taking account of the specific skills and experience, independence and knowledge needed to ensure a rounded Board and the diversity benefits that each candidate can bring to overall Board composition.

Statement of Directors' responsibilities

The Directors are responsible for preparing the Directors' Report and Financial Statements, in accordance with applicable law and regulations.

The ICAV Act requires the Directors to prepare Financial Statements for each financial year. Under that law they have elected to prepare the Financial Statements in accordance with Financial Reporting Standard ("FRS") 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland.

The Financial Statements are required to give a true and fair view of the assets, liabilities and financial position of the ICAV at the end of the financial year and of the increase in net assets attributable to holders of redeemable participating shares in the ICAV for the financial year. In preparing these Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;

Directors' Report (continued)

Statement of Directors' responsibilities (continued)

- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with FRS102;
- assess the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records, which disclose with reasonable accuracy at any time the assets, liabilities, financial position and increase in net assets attributable to holders of redeemable participating shares in the ICAV and to enable them to ensure that the Financial Statements comply with the ICAV Act and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the ICAV. In this regard they have entrusted the assets of the ICAV to a depositary for safe-keeping. They are responsible for such internal controls as they determine is necessary to enable the preparation of the Financial Statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the ICAV Act.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the ICAV's website at www.assetmanagement.hsbc.com. Legislation in the Republic of Ireland governing the preparation and dissemination of Financial Statements may differ from legislation in other jurisdictions.

The Directors confirm that they have complied with the above requirements in preparing the Financial Statements.

Market Commentary

China Bonds

Rising bond yields after several years of declines – and a surge in bond issuance, especially from the corporate sector – meant that bond prices were under pressure and fell during 2025 in mainland China. The backdrop to the market was marked by trade disruption and investor anxiety about the effects of US President Donald Trump's tariffs on mainland China. At one stage, these rose above 100%, but quickly came down again as both countries chose to engage on their trade differences, which ultimately led to a one-year deal being signed in the autumn. Domestically, the government announced economic stimulus measures to help support growth, although investors appeared to hope for more specific measures to aid the country's property sector and the indebtedness of its local authorities.

The benchmark 10-year bond climbed from all-time low of 1.6% to finish the period at 1.85% as deflationary pressures eased somewhat towards the end of the year. The two-year bond yield climbed by more, rising from approximately 1.0% to 1.35%. Annual consumer inflation turned negative in February and remained there throughout much of the rest of the year, largely due to weakness in food prices, although by the last two months of the year it had recovered a little (to grow by 0.7% year on year in November and 0.8% in December). December's figure was the highest since February 2023.

In May, the People's Bank of China cut its five-year prime rate – a key rate for mortgages – from 3.6% to an all-time low of 3.5%, while it also lowered its one-year rate – a key rate for consumer loans – from 3.1% to 3.0%, also a new low. However, it left these rates unchanged through the rest of the year. The central bank cut the reserve requirement for large banks in the country from 8% to 7.5% in May, the lowest level for over 20 years, to encourage more bank lending across the economy. New loans extended by Chinese banks remained sluggish throughout the year. For 2025, new loans hit a seven-year low of ¥16.27 billion, indicative of weak borrowing demand across the economy.

Headline economic growth was somewhat mixed. The country's annualised gross domestic product's ("GDP") growth rate remained above 5% in the first and second quarters of 2025, before falling to 4.8% in the third quarter and 4.5% in the fourth quarter. It was confirmed after the end of the year that GDP had grown by exactly 5% over 2025, achieving the government's target. However, the domestic economy remained sluggish, with consumer spending subdued, deflationary pressures still abounding and the country's property market in a slump. The manufacturing purchasing managers' index hovered close to the 50.0 level that separates economic expansion from contraction, ending the year at 50.1 in December. Retail sales grew by only 0.9% in December, the lowest rate for three years. On the positive side, the country reported its largest ever trade surplus with the rest of the world in 2025, of almost $1.2 trillion. Despite the disruption caused by US tariffs, trade flourished with other Asian nations in particular.

EMU Equities

European ex UK equities produced strong returns over the year, particularly in sterling and US dollars as the euro strengthened and significantly outperformed other global developed markets. The region benefited from lower inflation, falling interest rates and positive corporate earnings growth. During the first quarter, and under pressure from the US, several European nations agreed to ramp up their spending on defence, which boosted the share prices of a wide range of industrial companies. Germany passed an amendment to its constitution, allowing it to borrow significant amounts to fund investment in arms and infrastructure. The Europe-wide Stoxx Europe 600 Index frequently established new all-time highs during the period, as did several individual markets, including Germany's Dax Index and Italy's Borsa di Milano. However, European shares suffered a marked downturn in early April as the US administration announced its tariffs, which turned out to be particularly punitive for the EU and the region's car manufacturers. European equities soon recovered, however, as the full weight of the tariffs was delayed allowing trade talks to take place, which eventually led to a trade agreement between the US and the eurozone.

Market Commentary (continued)

EMU Equities (continued)

Spain was the strongest performer among Europe ex UK markets. Ireland, Italy and Finland also produced strong returns and outperformed the wider benchmark. In contrast, returns in France were subdued. This was partly due to marked political instability in the country as the parliamentary government collapsed and efforts to unify a divided parliament proved very difficult.

Prime minister Francois Bayrou lost a no-confidence vote in September and was replaced by Sebastien Lecornu; the latter resigned within a month, only to be reinstated and ultimately receive the backing of parliament at the cost of President Emmanuel Macron's flagship pension reform being shelved until at least 2027.

Annual headline inflation continued to ease. In the eurozone, the figure fell from 2.5% in January to 2.1% in November, just above the European Central Bank's ("ECB") target of 2%. Meanwhile, core inflation moved from 2.7% to 2.4% over the same period. This allowed the ECB to continue to cut its benchmark and deposit rates further, which it did four times during the first six months of the year. However, the ECB left rates unchanged in the second half of the year as it considered the risks between inflation and economic growth to be well balanced.

Economic growth eased from a quarterly pace of 0.6% in the first quarter of 2025 to 0.3% by the third quarter of the year, although this was slightly ahead of forecasts. However, overall economic trends remained fragile. Various consumer confidence and business sentiment indices remained lacklustre for much of the period. The manufacturing sector, however, did recover a little and the eurozone manufacturing purchasing managers' index rose above the 50.0 level (that separates economic expansion from contraction) in August for the first time in several years, before declining gently towards the end of the year. The labour market remained relatively robust. The eurozone unemployment rate stayed stable, with the figure starting and ending the period at 6.3%.

Emerging Market Bonds

Emerging market bonds produced positive returns during 2025, rising at a double-digit pace in US dollar terms, but still showing decent returns in sterling. The asset class significantly outperformed global government bond markets, as well as global high-yield bonds over the period. The market was driven by easing inflationary pressures, falling interest rates and the weaker US dollar, and benefited from strong investor flows into the sector.

In mainland China, the benchmark 10-year bond climbed from an all-time low of 1.6% to finish the period at 1.85% as deflationary pressures eased somewhat. In contrast, Indian bond yields fell, with the 10-year bond yield slipping from about 6.8% to 6.6%. Brazil also enjoyed falling bond yields, with its 10-year bond dropping from just below 15% to 13.8%.

Headline inflation rates generally eased. In mainland China, annual consumer inflation turned negative in February and remained there throughout much of the rest of the year, largely due to weakness in food prices, although by December it had recovered to 0.8%. In India, annual inflation fell markedly as food prices softened, dropping to 0.25% in October, the lowest level on record, before recovering slightly in November. However, inflation initially picked up in Brazil, with annual inflation rising to a more than two-year high of 5.53% in April, before easing to 4.26% in December.

Mainland China reduced its key loan prime rates once during the period, in May, and also reduced its bank reserve requirements at that time. The Bank of Korea cut rates twice in the first half of 2025 as the economy weakened, while the Reserve Bank of India cut rates four times, the latest coming in December, as inflation eased. In contrast, Brazil's central bank raised rates four times during the period, raising its Selic rate from 12.25% to 15% as it battled stubbornly high inflation in the early months of the year. However, it left rates unchanged from June.

Market Commentary (continued)

Emerging Market Bonds (continued)

Economic data was mixed. Mainland China's annualised growth rate remained above 5% in the first and second quarters of 2025 but fell to 4.8% in the third quarter, below the government's 5% target for the year. India's economy recovered after a slowdown in the latter half of 2024, growing by over 7% year on year in the first and second quarters of 2025, and by over 8% in the third quarter. Korea's economy also recovered after a poor 2024 and weak first quarter of 2025, while Brazil's economy slowed after a strong first quarter.

Emerging Market Equities

Emerging markets produced strong returns over the year and significantly outperformed developed markets. They were buoyed by falling inflation and generally lower interest rates, as well as a recovery in earnings and economic growth. Like other markets, however, they gave back some of their performance in early April as US President Donald Trump's stance on trade tariffs became clear, leading to a sudden sell-off. However, the asset class quickly recovered once President Trump had delayed the implementation of his tariffs so that negotiations could take place, which ultimately led to the signing of trade deals.

Latin American equities performed very strongly and outperformed Asian markets in aggregate. Colombia was the strongest market, while Brazil, Mexico, Peru and Chile all posted positive returns. Eastern European countries, such as the Czech Republic, Hungary and Poland, also rose strongly. Within Asia, Korea was the strongest performer as the Bank of Korea cut interest rates, economic growth recovered, and the country embraced corporate reforms after a period of immense political turmoil. Taiwan was also notably strong, driven largely by its technology industry, especially Artificial Intelligence ("AI") related stocks, as well as decent economic growth. Mainland China also rallied, although its rise was close to that of the index. Its market was supported by stimulus measures from the government to help support the economy, as well as positive sentiment about the prospects for AI and mainland China's low-cost AI model, DeepSeek. Nevertheless, concerns remained about the domestic economy, deflation and especially the state of the country's property sector. In contrast, returns in India were negative in sterling terms despite recovering economic growth and falling interest rates. Investors were concerned when President Trump doubled the tariffs on the country as punishment for its purchasing of Russian oil.

Headline inflation rates generally eased. In mainland China, annual consumer inflation turned negative in February and remained there throughout much of the rest of the year, largely due to weakness in food prices, although by December it had recovered to 0.8%. In India, annual inflation fell markedly as food prices softened, sliding to 0.25% in October, the lowest level on record, before recovering slightly in November. However, inflation initially picked up in Brazil, with annual inflation rising to a more than two-year high of 5.53% in April, before easing to 4.26% in December.

Mainland China reduced its key loan prime rates in May, as well as lowering its bank reserve requirements. The Reserve Bank of India cut rates four times, with the latest coming in December, as inflation eased. In contrast, Brazil's central bank raised rates four times during the period, which took its Selic rate to 15.0% as it battled stubbornly high inflation in the early months of the year. However, it left rates unchanged from June.

Economic data was mixed. Mainland China's annualised growth rate remained above 5% in the first and second quarters of 2025 but fell to 4.8% in the third quarter, below the government's 5% target for the year. India's economy recovered after a slowdown in the latter half of 2024 and grew by over 8% in the third quarter. Korea's economy also recovered after a poor 2024 and weak first quarter of 2025, while Brazil's economy slowed after a strong first quarter.

Market Commentary (continued)

Global Bonds

Global bond markets produced minimal returns in sterling over the year, although the asset class achieved decent performance in US dollar terms as the greenback weakened. In sterling, aggregate global corporate bonds rose marginally, while global government bonds were flat to down.

While fixed income markets benefitted from falling interest rates and subdued inflation, they were unsettled by the disruption from US trade tariffs and their potential impact on inflation levels, as well as growing national debt levels and large new issuance by countries such as the US and Japan. This caused something of a buyers' strike in both the US and Japan in May; at that time, new long-dated issues received lower bids than normal, and long-term yields spiked to decade highs.

The US 10-year Treasury yield fell from about 4.6% to just over 4.1% over the year. It dipped below 4.0% on two occasions: in early April, when US President Donald Trump first published his tariff levels against US trading partners; and in October, when concerns mounted about the US economy and a weakening labour market. UK bond yields also fell, with the UK benchmark 10-year gilt yield slipping from approximately 4.6% to just below 4.5%. In contrast, German bond yields rose, with the German 10-year Bund yield climbing from 2.45% to 2.85%. Japan was by far and away the weakest major bond market, and saw yields soar as the Bank of Japan ("BoJ") tightened its monetary policy. The Japanese 10-year bond yield almost doubled from 1.05% to 2.05%, a 27-year high. Some longer-dated Japanese government bond yields hit all-time highs during the year.

Interest rates continued to tumble across most major economies as inflationary pressures eased. The European Central Bank cut rates four times in the first six months of the year, although it left rates unchanged thereafter. The Bank of England lowered rates four times during the whole year. The US Federal Reserve, however, having warned investors in late 2024 that the pace of rate cuts would likely slow in 2025, left rates unchanged until September. The weakening labour market and dwindling inflationary pressures drove it to cut rates three times in the final few months of the year. In contrast, the BoJ continued to tighten monetary policy and lifted its benchmark rate to 0.5% in January, before hiking again in December to a 30-year high of 0.75%.

The global economic outlook was mixed. US gross domestic product ("GDP") fell by 0.5% on an annualised basis in the first quarter of the year – the first fall in quarterly GDP for three years – although it recovered in the next two quarters, rising by 4.3% in the third quarter. While the UK and eurozone economies grew solidly in the first quarter of the year, economic expansion waned over the remainder of the year. Mainland China grew ahead of expectations in the first quarter but slipped during the following quarters. Japan managed decent growth in the first two quarters of the year, before contracting in the third quarter. Conversely, India's economy recovered well and grew by more than 8% in the third quarter of the year.

Global Equities

Calendar year 2025 proved to be a very strong one for global equity markets, with nearly all regions achieving double-digit returns. The asset class was supported by falling interest rates across many major economies, positive earnings growth, investor enthusiasm for artificial intelligence ("AI") and relief that US President Donald Trump's tariff threats ultimately led to trade deals being signed with the major economic blocs. Many markets – including the S&P 500, Stoxx Europe 600, Nikkei 225 and FTSE 100 – set new all-time highs during the year.

Emerging markets heavily outperformed developed markets. The best returns by far came in Korea, which soared on significant corporate and governance reform, recovering economic growth and very strong share price rises in the technology sector. Taiwan was also supported by its technology stocks and interest in AI. China produced positive returns but underperformed the wider Emerging Market benchmark due to trade issues with the US and headwinds in the domestic economy which remained sluggish. In developed markets, Europe and the UK rose strongly and outperformed both the US and Japan.

Market Commentary (continued)

Global Equities (continued)

Markets were quite volatile at times during the year, not least in early April as President Trump unleashed wide-ranging trade tariffs against US trading partners. The sell-off was nevertheless short-lived; President Trump suspended the worst of his tariffs for a 90-day grace period, allowing trade negotiations to take place, and markets staged a recovery that effectively lasted for the rest of the year.

Interest rates continued to tumble across most major economies as inflationary pressures eased. The European Central Bank cut rates four times in the first six months of the year, although it left rates unchanged thereafter. The Bank of England lowered its rates four times during the whole year. The US Federal Reserve, however, having warned investors in late 2024 that the pace of rate cuts would likely slow in 2025, left rates unchanged until September. The weakening labour market and dwindling inflationary pressures drove it to cut rates three times in the final few months of the year. In contrast, the Bank of Japan continued to tighten its monetary policy and lifted its benchmark rate to 0.5% in January, before raising it again in December to a 30-year high of 0.75%.

The global economic outlook was mixed. US gross domestic product ("GDP") fell by 0.5% on an annualised basis in the first quarter of the year – the first fall in quarterly GDP for three years – although it recovered in the next two quarters, rising by 4.3% in the third quarter. While the UK and eurozone economies grew solidly in the first quarter of the year, economic expansion waned over the remainder of the year. Mainland China grew ahead of expectations in the first quarter but slipped during the following quarters. Japan managed decent growth in the first two quarters of the year, before contracting in the third quarter. Conversely, India's economy recovered well and grew by more than 8% in the third quarter of the year.

Japanese Bonds

Japanese bonds produced negative returns over the period, and the government bond market was the weakest major global bond market by far as the Bank of Japan ("BoJ") tightened its monetary policy. Yields soared to record levels across many durations, causing prices to fall. The Japanese 10-year bond yield almost doubled from 1.05% to 2.05%, a 27-year high. Some longer-dated Japanese government bond yields hit all-time highs during the year. The 30-year bond yield climbed above 3.4% late in the period, a record high level. Investors worried about higher domestic inflation, the impact from US President Donald Trump's tariffs and some turmoil in Japanese politics, as well as growing national debt levels and large new bond issuance.

After Prime Minister Shigeru Ishiba resigned his post in the autumn following the loss of the Liberal Democratic Party/Komeito coalition's majority in the Upper House of parliament, Japan's first ever female prime minister, Sanae Takaichi, was voted in. This caused some unease in the bond market due to her vocal support for pro-reform and pro-growth policies. Bond investors feared that Takaichi's policy stance would lead to greater fiscal spending and, consequently, increased bond issuance.

The BoJ raised rates in both January and December, taking its benchmark interest rate from 0.25% to 0.75%, a 30-year high. BoJ Governor Kazuo Ueda suggested that growing wage pressures in the economy, emanating mainly from the highest spring wage settlements in decades in 2025, would likely force the central bank to continue to tighten.

Annual consumer inflation drifted lower over the period, falling from its two-year high of 4.0% in January 2025 to end at 2.9% in November, albeit still above the central bank's target rate of 2%. Meanwhile, core inflation (excluding fresh food prices) accelerated from 3.2% in January to 3.7% in May, its highest level since January 2023, before ending the period at 3.0% in November.

The economy expanded at an annualised pace of 1.0% in the first quarter of 2025, before accelerating to 2.1% in the second. However, after five consecutive quarters of growth, it contracted by 2.6% in the third quarter of the year, mainly due to weaker net trade, a result of higher US tariffs. Nevertheless, consumer spending and business investment recovered. During the year, the manufacturing sector showed some signs of recovery, and in June the manufacturing purchasing managers' index ("PMI") indicated economic expansion for the first time in a year as it rose above 50.0 (the level that separates expansion from contraction in the PMI readings), although it eased back below 50.0 in the following months.

Market Commentary (continued)

US Equities

US equities produced positive returns during 2025 but underperformed the global market average. The asset class was mainly driven by hopes of falling interest rates, positive corporate earnings announcements and, at least initially, by President Donald Trump's promise of tax cuts and deregulation. The major local equity indices – the S&P 500, the Dow Jones and the Nasdaq Composite – frequently hit new all-time highs during the year. They were led by the 'Magnificent Seven' – a group including Microsoft, Nvidia and Alphabet. Technology stocks soared on strong earnings and interest in Artificial Intelligence ("AI"). However, these stocks sold off heavily in early 2025 as the unveiling of mainland China's low-cost AI model DeepSeek called into question the high valuations of AI-related stocks such as Nvidia. Nevertheless, tech names later recovered. Nvidia's shares soared, and the firm became both the first $4 trillion market-cap stock (in July) and the first $5 trillion market-cap stock (in October).

Market performance weakened in March and April as President Trump introduced trade tariffs. The levies initially targeted Mexico, Canada and mainland China, but were later expanded to include the whole world. These tariffs were published on so-called "Liberation Day" in early April, leading to a short, sharp sell-off. However, stock prices recovered from mid-April and into May as President Trump softened his stance on tariffs and embarked on trade negotiations, which ultimately led to trade deals with the EU, Japan and mainland China.

The US Federal Reserve ("Fed") was initially cautious about easing monetary policy too quickly and left rates unchanged during the first eight months of 2025. The central bank cautioned that it would need to carefully consider the likely negative effects of tariffs on both growth and inflation, and in so doing drew belligerent and personal comments from President Trump, who wanted rates to be cut. However, by September, the Fed had grown circumspect about the risks of inflation and become more concerned about the economic outlook, leading it to cut rates that month. Rates were cut again in October and December, taking the Fed funds rate down to a range of 3.50%-3.75%. Headline inflation slowed in the first few months of the year but picked up during the summer to hit 3% in September, the same level as January, before retreating to 2.7% by November.

After a long period of relatively robust growth, the US economy began to show signs of a slowdown in the early part of 2025. It fell by 0.5% in the first quarter of 2025 – the first decline in gross domestic product for three years – as US firms stockpiled goods ahead of Trump's tariffs coming into effect. However, it recovered to grow by 3.8% in the second quarter of the year and by 4.3% in the third. Nevertheless, job creation, retail sales, factory orders and consumer sentiment indices all increasingly indicated a slowing economy, with many fearful that President Trump's trade tariffs could tip the economy into recession, although by the end of the period these fears had eased somewhat.

Market Commentary (continued)

Commodities

Commodities rose in aggregate over the year. The CRB Commodity Index rose but was quite volatile, plunging in early April as US President Donald Trump announced his wide-ranging tariffs, before recovering through much of the rest of the year. Commodities spiked higher in mid-June, led by oil, as Israel and the US launched airstrikes against Iran's nuclear facilities, but quickly fell back as the conflict petered out. However, the asset class edged higher in the final months of the year, led by precious metals, specifically gold and silver, as geopolitical worries dominated the investment landscape.

Oil prices declined, weighed down by concerns about the global economic outlook and rising production levels through much of the year. OPEC+ members lifted production by 547,000 barrels per day from September, after gradual increases from the spring. While OPEC+ agreed to leave production levels unchanged in the first quarter of 2026, oil prices softened into the year-end. West Texas Intermediate dropped from approximately $72 per barrel to $58 over the year, touching a near five-year low in December. Brent Crude followed a similar pattern, easing from about $75 to $61 over the period. Oil prices had surged abruptly in June on the brief Israel/Iran conflict, with Iran threatening to shut the Strait of Hormuz, although nothing came of this, and prices quickly fell back.

The US raid on Venezuela late in the period and some efforts to tighten up on the illegal transport of Russian oil by sea ultimately had little effect on the direction of oil prices.

In contrast, precious metals, such as gold, silver and platinum, soared on favourable demand/supply dynamics and as investors sought out so-called 'safe havens'. The gold price breached the $3,000 per ounce mark for the first time in its history in March. It subsequently surged through $4,000 per ounce in early October, ending the year above $4,300 as it benefited from the weaker US dollar, economic uncertainty and strong government buying, particularly from mainland China. The silver price also set new all-time highs, more than doubling from just below $30 per ounce to over $70 during the year. Platinum also soared by well over 100% to new all-time highs on a growing supply/demand imbalance and notably strong demand from jewellers looking for an alternative to gold as the gold price traded higher.

Industrial metals were generally firmer. Copper was very strong and established a new all-time high of approximately $5.8 per pound in July, a level it almost matched again in late December after a significant slump in late July. The strength in copper was partly driven by concerns that the US administration would go ahead with threats to impose significant tariffs on imported copper to protect its domestic industry. Rekindled demand and stockpiling from mainland China also supported the copper price. Zinc, aluminium and nickel all also recovered from weakness early in the year to end higher over the period.

Foreign Exchange

The key development in foreign exchange markets over the period was the decline in the US dollar. The currency touched a more than two-year high in early January on optimism about newly elected US President Donald Trump's plans to cut taxes and regulations, and the US Federal Reserve's indication that it would likely pause further rate cuts for a while. The dollar then fell steadily through the rest of the period. Much of this had to do with tariffs. It began to fall steadily through the early spring months as President Trump threatened the likes of Canada, Mexico and mainland China with higher trade levies, before unveiling his comprehensive tariff levels on 2 April 2025, so-called "Liberation Day". There was also talk of the dollar being affected by the decline in "US exceptionalism" which accompanied the implementation of tariffs by the US, even though Liberation Day was quickly followed by a 90-day 'truce' and suspension of the worst of the tariffs, allowing for trade negotiations to take place. Although the dollar stabilised over the second half of the year, for the whole of 2025 it declined by approximately 9% – its worst showing since 2017.

Market Commentary (continued)

Foreign Exchange (continued)

Most other major currencies benefited from the weakness of the dollar. Sterling traded higher over the period, rising from 125 to 135 against the dollar over the year, touching 137 at mid-year, its highest level for over three years. Sterling's strength appeared to be driven more by the weakness in the dollar than any great vote of optimism in the UK economy. Economic growth in the UK dwindled under the weight of tax increases, with business and consumer confidence remaining brittle. Sterling weakened against the euro, falling from 1.21 to 1.15 over the period.

The euro was strong against the dollar and most other global currencies. The euro currency index traded up to its highest level for four years, while against the dollar it rallied from 1.04 to 1.17. This was partly driven by signs of a shift towards the euro as an alternative reserve currency, with governments around the world expanding their euro holdings. Despite several rate cuts from the European Central Bank in the first half of the year, the central bank kept rates unchanged in the second half, which gave the euro some support. This, along with some improved economic data and hopes that the post-Covid economic slump in the eurozone was largely over, helped the euro.

The yen weakened against sterling and the euro but was largely unchanged against the dollar. It started and closed the year at approximately 157 against the greenback. It then rallied to almost 140 in April as the dollar weakened, hurt by Trump's trade tariffs and the Bank of Japan's determination to tighten its monetary policy in the face of inflationary pressures in the domestic economy. The central bank raised rates in January and then again in December, taking the benchmark rate to a 30-year high. Despite this, the yen weakened over the second half of the year as traders discounted greater fiscal spending and large bond issuance as new prime minister Sanae Takaichi pledged to boost economic growth.

Tracking Error

Some sub-funds of the ICAV seek to track the performance of an index and are subject to tracking error, which is the risk that a sub-fund's returns may not correlate accurately to those of the index.

A realised tracking error is an annualised standard deviation of the difference in returns between a sub-fund and its benchmark index. The tracking error shows the consistency of returns relative to the benchmark index over a defined financial period of time.

An anticipated tracking error is based on the expected volatility of differences between the returns of a sub-fund and the returns of its benchmark index.

For full physically replicating sub-funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights presented in the benchmark index.

For partial replicating sub-funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The aim is to generate a return which is as close as practicable to the total return of the index net of transaction costs and gross of fees and other costs.

The primary drivers represent where the impact makes a material difference to the sub-fund's performance to deviate from the underlying index. The primary drivers impacting tracking difference include withholding tax, accrued capital gains tax, securities lending, transaction costs from rebalancing, holding a proxy future, price noise and valuation change, as a result of HSBC Group policy to exclude banned weapon stocks and sampling techniques. These impacts can be either positive or negative depending on the underlying circumstances. The table overleaf and the relevant footnotes indicate the primary drivers impacting tracking difference gross of the total expense ratio and where realised tracking difference is greater than the anticipated tracking error.

^*The gross percentage is calculated on a daily basis by dividing the latest daily NAV against its most recent daily NAV and the resulting answer is then deducted by one. The resulting answer is multiplied by the corresponding daily change in the index to arrive at the daily gross return percentage. The accumulation of all the daily return percentages gives the yearly gross performance percentage. The performance percentages disclosed are not deemed to be directly reconcilable to the Financial Statements. Also, it allows the users to understand the relevance and reliability of the amounts quoted.

^^*Calculation of tracking error is explained in detail on page 18.

*For hedged share classes, some data will be not applicable as there is no hedged index return for comparison.

^*The gross percentage is calculated on a daily basis by dividing the latest daily NAV against its most recent daily NAV and the resulting answer is then deducted by one. The resulting answer is multiplied by the corresponding daily change in the index to arrive at the daily gross return percentage. The accumulation of all the daily return percentages gives the yearly gross performance percentage. The performance percentages disclosed are not deemed to be directly reconcilable to the Financial Statements. Also, it allows the users to understand the relevance and reliability of the amounts quoted.

^^*Calculation of tracking error is explained in detail on page 18.

*For hedged share classes, some data will be not applicable as there is no hedged index return for comparison.

Compliance with the Sustainable Finance Disclosure Regulation (SFDR) and Taxonomy Regulation

Article 6 SFDR Funds

The sub-funds listed below do not promote environmental and/or social characteristics within the meaning of Article 8 SFDR or do not have a sustainable investment objective within the meaning of Article 9 SFDR. The sub-funds are required to comply with the requirements of Article 6 SFDR and are categorised and referred to as Article 6 SFDR funds (the "**Article 6 SFDR Funds**"):

HSBC Global Funds ICAV – China Government Local Bond UCITS ETF
HSBC Global Funds ICAV – Credit Income Advance Fund
HSBC Global Funds ICAV – Cross Asset Trend Fund
HSBC Global Funds ICAV – Euro Corporate Bond UCITS ETF
HSBC Global Funds ICAV – Euro Government Bond UCITS ETF
HSBC Global Funds ICAV – Global Aggregate Bond UCITS ETF
HSBC Global Funds ICAV – Global Corporate Bond UCITS ETF
HSBC Global Funds ICAV – Global Emerging Market Government Bond Index Fund
HSBC Global Funds ICAV – Global Equity Index Fund
HSBC Global Funds ICAV – Global Government Bond UCITS ETF
HSBC Global Funds ICAV – Global Sukuk UCITS ETF
HSBC Global Funds ICAV – Japan Equity Index Fund
HSBC Global Funds ICAV – Japan Government Bond UCITS ETF
HSBC Global Funds ICAV – HSBC MSCI World Fund
HSBC Global Funds ICAV – Multi- Factor US Equity Fund
HSBC Global Funds ICAV – Shariah Multi Asset Fund
HSBC Global Funds ICAV – US Corporate Bond UCITS ETF
HSBC Global Funds ICAV – US Equity Index Fund
HSBC Global Funds ICAV – US Treasury Bond UCITS ETF

The investments underlying the Article 6 SFDR Funds do not take into account the EU criteria for environmentally sustainable economic activities.

Article 8 SFDR Funds

The sub-funds listed below promote environmental and/or social characteristics within the meaning of Article 8 SFDR (the "**Article 8 SFDR Fund**"):

HSBC Global Funds ICAV – Digital Leaders Equity Fund
HSBC Global Funds ICAV – Euro Lower Carbon Government 10+ Year Bond UCITS ETF
HSBC Global Funds ICAV – Euro Lower Carbon Government 1-3 Year Bond UCITS ETF
HSBC Global Funds ICAV – Global Aggregate Bond ESG UCITS ETF
HSBC Global Funds ICAV – Global ESG Government Bond UCITS ETF
HSBC Global Funds ICAV – Global Transition Resources Equity Fund
HSBC Global Funds ICAV – HSBC MSCI Emerging Markets Small Cap Screened Fund
HSBC Global Funds ICAV – HSBC MSCI Emerging Markets Value Screened Fund
HSBC Global Funds ICAV – Multi-Factor EMU Equity Fund
HSBC Global Funds ICAV – Multi- Factor Worldwide Equity Fund
HSBC Global Funds ICAV – Multi Thematic Equity Fund

Article 9 SFDR Funds

The sub-fund listed below promotes environmental and/or social characteristics within the meaning of Article 9 SFDR (the "Article 9 SFDR Fund"):

HSBC Global Funds ICAV – Sustainable Development Bank Bonds UCITS ETF

Additional disclosure requirements under SFDR are applicable to this annual report to the extent it relates to sub-funds classified as Article 8 / Article 9 Funds under SFDR and such disclosures as they relate to those sub-funds can be found in the Other Additional Disclosures of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. It has been observed that the availability of data, both from third party data providers and underlying investee companies, continues to be challenging in some respects.

Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the Other Additional Disclosures of this report should consequently be read and understood considering these continuing challenges. With the assistance of the Management Company and the Investment Manager, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant third party and investee companies' data in this regard.

Annual Depositary Report to the Shareholders

We, HSBC Continental Europe, appointed Depositary to HSBC Global Funds ICAV (the "ICAV") provide this report solely in favour of the Shareholders of the ICAV for the year ended 31 December 2025 ("the Accounting Period"). This report is provided in accordance with the UCITS Regulations - European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the Regulations"). We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the ICAV for the Accounting Period and we hereby report thereon to the Shareholders of the Company as follows;

We are of the opinion that the ICAV has been managed during the Accounting Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the constitutional documents and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

Independent Auditor's Report to the Shareholders of HSBC Global Funds ICAV

Report on the audit of the financial statements

Opinion

We have audited the Financial Statements of HSBC Global Funds ICAV ('the ICAV'), for the year ended 31 December 2025 set out on pages 46 to 973 which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Schedule of Investments and related notes, including the summary of significant accounting policies set out in note 2.

The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion:

- the Financial Statements give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 December 2025 and of its increase in net assets attributable to holders of redeemable participating shares for the year then ended;
- the Financial Statements have been properly prepared in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and
- the Financial Statements have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles Acts 2015 to 2021 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities section of our report. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the Board of Directors.

We were first appointed as auditor by the Directors on 17 January 2019 prior to the ICAV becoming a public interest entity. The period of total uninterrupted engagement is for the 3 financial years ended 31 December 2025 as a public-interest entity and 8 years in total. We have fulfilled our ethical responsibilities under, and we remain independent of the ICAV in accordance with, ethical requirements applicable in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority ("IAASA") as applied to listed public interest entities. No non-audit services prohibited by that standard were provided.

Conclusions relating to going concern

In auditing the Financial Statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the Financial Statements is appropriate. Our evaluation of the Directors' assessment of the ICAV's ability to continue to adopt the going concern basis of accounting included:

KPMG, an Irish partnership and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

Conclusions relating to going concern (continued)

Our knowledge of the ICAV and the asset management industry enables us to identify the inherent risks to the ICAV's business model and analysing how those risks might affect the ICAV's financial resources or ability to continue operations over the going concern period. The risks that we considered most likely to adversely affect the ICAV's available financial resources over this period related to the Investment Manager's intention to continue to manage the portfolio, the Directors' assessment of the operational resilience of the ICAV, and the valuation of financial assets including market volatility, interest rate and currency risks, and counterparty risks.

We also considered less predictable but realistic second order impacts that could affect the ICAV such as the impact of current geopolitical conflicts on the investment portfolios of the ICAV.

We considered whether the going concern disclosure in the Financial Statements gives an appropriate description of the Directors' assessment of going concern, including the identified risks and dependencies.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from the date when the Financial Statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Detecting irregularities including fraud

We identified the areas of laws and regulations that could reasonably be expected to have a material effect on the Financial Statements and risks of material misstatement due to fraud, using our understanding of the entity's industry, regulatory environment and other external factors and inquiry with the directors. In addition, our risk assessment procedures included:

- Inquiring with the Directors and other management as to the ICAV's policies and procedures regarding compliance with laws and regulations, identifying, evaluating and accounting for litigation and claims, as well as whether they have knowledge of non-compliance or instances of litigation or claims.
- Inquiring of Directors as to the ICAV's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Inquiring of Directors regarding their assessment of the risk that the Financial Statements may be materially misstated due to irregularities, including fraud.
- Inspecting the ICAV's regulatory and legal correspondence.
- Reading Board minutes.
- Performing planning analytical procedures to identify any unusual or unexpected relationships.

We discussed identified laws and regulations, fraud risk factors and the need to remain alert among the audit team.

Firstly, the ICAV is subject to laws and regulations that directly affect the Financial Statements including ICAVs and financial reporting legislation.

Detecting irregularities including fraud (continued)

We assessed the extent of compliance with these laws and regulations as part of our procedures on the related Financial Statement items, including assessing the Financial Statement disclosures and agreeing them to supporting documentation when necessary.

Secondly, the ICAV is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the Financial Statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: Applicable Central Bank of Ireland regulations and certain aspects of Irish legislation recognising the financial and regulated nature of the ICAV's activities and its legal form.

Auditing standards limit the required audit procedures to identify non-compliance with these non-direct laws and regulations to inquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

We assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. As required by auditing standards, we performed procedures to address the risk of management override of controls. On this audit we do not believe there is a fraud risk related to revenue recognition. We did not identify any additional fraud risks.

In response to the fraud risk, we also performed procedures including:

- Identifying journal entries to test based on risk criteria and comparing the identified entries to supporting documentation.
- Assessing the disclosures in the Financial Statements for bias.

As the ICAV is regulated, our assessment of risks involved obtaining an understanding of the legal and regulatory framework that the ICAV operates and gaining an understanding of the control environment including the ICAV's procedures for complying with regulatory requirements.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the Financial Statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the Financial Statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

Key audit matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the Financial Statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Independent Auditor's Report to the Shareholders of HSBC Global Funds ICAV (continued)

Key audit matters: our assessment of risks of material misstatement (continued)

In arriving at our audit opinion above, the key audit matter, is as follows (unchanged from 2024):

Accuracy, valuation and ownership of financial assets/liabilities at fair value through profit or loss of USD 34,781,296,220 comprising of Investment Funds: USD 900,011,688, Transferable securities: USD 33,723,626,255, Financial derivative instruments assets: USD 464,110,957 and Financial derivative instruments liabilities: USD 306,452,680 (2024: USD 29,257,280,245- comprising of Investment Funds: USD 951,712,982, Transferable securities: USD 28,205,647,548, Financial derivative instruments assets: USD 499,020,213 and Financial derivative instruments liabilities: USD 399,100,498)

Refer to note 2 (significant accounting policies) and note 4 (e) (Risks associated with financial instruments - *Fair value of assets and liabilities*)

The key audit matter	**How the matter was addressed in our audit**
The ICAV's financial assets make up 98.94% of total assets and financial liabilities make up 35.56% of total liabilities and are considered to be the key driver of the ICAV's results. While the nature of the ICAV's financial assets/liabilities do not require significant levels of judgement because they comprise mainly of liquid, quoted investments, due to their significance in the context of the Financial Statements as a whole, the accuracy, valuation and ownership of the calculation of financial assets/liabilities at fair value through profit or loss was identified as the matter which had the greatest effect on our overall audit strategy and allocation of resources in planning and completing our audit. For the reasons outlined above the engagement team determine this matter to be a key audit matter.	Our audit procedures included −We obtained the HSBC Securities Services Description of its European Traditional Funds Service System and the related Suitability of Design and Operating Effectiveness of Controls (ISAE 3402) report in order to obtain an understanding of the valuation and reconciliation processes. −With the assistance of our valuation specialists, we agreed the accuracy and valuation of the financial assets and liabilities portfolio to prices published by independent pricing sources where possible and independently revalued the remainder of the portfolio using observable market inputs; - Our valuation specialists exercised professional judgement over the pricing sources used in independently determining the fair value of the ICAV's financial assets and liabilities measured at fair value through profit or loss; and −We obtained independent external confirmations from the Depositary and relevant counterparties as at the financial year end and agreed the amounts confirmed to the ICAV's investment portfolio. No material misstatements were identified by our audit procedures over the accuracy, valuation and ownership of financial assets/liabilities at fair value through profit or loss.

Our application of materiality and an overview of the scope of our audit

Materiality for the Financial Statements as a whole was set at USD 346m (2024: USD 145m), determined with reference to a benchmark of net assets (of which it represents 1% (2024: 0.5%).

In applying our judgement in determining the most appropriate benchmark, the factors, which had the most significant impact were:

- the elements of the Financial Statements (total assets, net asset value, total investment income and increase in net assets attributable to holders of redeemable participating shares); and
- the items on which attention of the users of the ICAV's Financial Statements tends to be focused.

Independent Auditor's Report to the Shareholders of HSBC Global Funds ICAV (continued)

Our application of materiality and an overview of the scope of our audit (continued)

In applying our judgement in determining the percentage to be applied to the benchmark, the following qualitative factors, which had the most significant impact, increasing our assessment of materiality were:

- the stability of the business environment in which it operates.

We applied ICAV materiality to assist us determine the overall audit strategy.

Performance materiality for the Financial Statements as a whole was set at USD 259m (2024: USD 108m), determined with reference to a benchmark of net assets (of which it represents 75% of materiality (2024: 75% of materiality).

In applying our judgement in determining performance materiality, the following factors were considered to have the most significant impact on our assessment of performance materiality:

- entity level control deficiencies, such as in the control environment;
- the number and severity of deficiencies in control activities, including those that may be pervasive;
- the number and/or value of detected misstatements;
- the value of uncorrected misstatements, including the cumulative current period effect of immaterial prior year uncorrected misstatements; and
- management's attitude towards correcting misstatements.

We applied the ICAV's performance materiality to assist us in determining what risks were significant risks for the ICAV.

We reported to the Board of Directors any corrected or uncorrected identified misstatements exceeding USD 17.3m (2024: USD 7.2m), in addition to other identified misstatements that warranted reporting on qualitative grounds.

Our audit was undertaken to the materiality and performance materiality level specified above and was all performed by a single engagement team in Dublin, Ireland.

Other information

The directors are responsible for the other information presented in the Annual Report together with the Financial Statements. The other information comprises the information included in the General Information, HSBC Global Asset Management Shariah Committee, Directors' Report, Investment Managers' Report, Annual Depositary Report to the Shareholders, Portfolio Changes (unaudited), Other Additional Disclosures (unaudited) and Appendix - Sustainability Finance Disclosure Regulation Periodic Reports Disclosures (unaudited).

The Financial Statements and our auditor's report thereon do not comprise part of the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except as explicitly stated below, any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our Financial Statements audit work, the information therein is materially misstated or inconsistent with the Financial Statements or our audit knowledge. Based solely on that work undertaken during the course of the audit, we have not identified material misstatements in the other information.

Independent Auditor's Report to the Shareholders of HSBC Global Funds ICAV (continued)

Opinion on other matter prescribed by the Irish Collective Asset-management Vehicles Acts 2015 to 2021

In our opinion, the information given in the Directors' Report is consistent with the Financial Statements.

Matters on which we are required to report by exception

The Irish Collective Asset-management Vehicles Acts 2015 to 2021 requires us to report to you, if in our opinion, the disclosures of Directors' remuneration specified by law are not made. We have nothing to report in this regard.

Respective responsibilities and restrictions on use

Responsibilities of directors for the Financial Statements

As explained more fully in the Directors' responsibilities statement set out on pages 10 and 11, the Directors are responsible for: the preparation of the Financial Statements including being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error; assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

A fuller description of our responsibilities is provided on IAASA's website at https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the financial-statements/.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the shareholders of the ICAV, as a body, in accordance with the Section 120 of the Irish Collective Asset-management Vehicles Act 2015. Our audit work has been undertaken so that we might state to the ICAVs shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders, as a body, for our audit work, for this report, or for the opinions we have formed.

^formerly known as HSBC Global Funds ICAV - US Corporate Bond Index Fund.

The accompanying notes form an integral part of the Financial Statements.

1. The reporting entity HSBC Global Funds ICAV (the "ICAV")

The ICAV was incorporated in Ireland as an open-ended umbrella type Irish collective asset-management vehicle with segregated liability between sub-funds to carry on business under the ICAV Act on 28 November 2017 with registration number C173463. The ICAV is registered by the Central Bank of Ireland as an ICAV pursuant to Part 2, Chapter 1 of the ICAV Act and authorised as a UCITS fund pursuant to the 2011 UCITS Regulations and is also subject to the Central Bank UCITS Regulations.

The assets of each sub-fund will be invested separately in accordance with the investment objective and policies of each sub-fund. Moreover, any liability incurred on behalf of or attributable to any sub-fund may only be discharged solely out of the assets of that sub-fund and the assets of the other sub-funds may not be used to satisfy the liability.

The sole object of the ICAV is the collective investment in either or both of transferable securities or other liquid financial assets referred to in Regulation 68 of the 2011 UCITS Regulations, of capital raised from the public which operates on the principle of risk-spreading.

As at 31 December 2025, the ICAV has 30 sub-funds in operation (31 December 2024: 26).

Each of the sub-funds which are registered with the Securities and Futures Commission (the "SFC") in Hong Kong are regulated under an equivalent jurisdiction in the form of the UCITS Regulations, therefore the SFC accept UCITS Regulations. While the SFC recognises that annual reports of recognised jurisdiction schemes will vary in content, annual reports are expected to offer investors comparable disclosure. Annual reports of recognised jurisdiction schemes will generally be reviewed by the SFC on the basis that they already comply in substance with the Hong Kong disclosure requirements.

2. Significant accounting policies

(a) Basis of accounting

The ICAV has consistently applied the following accounting policies to all periods presented in these financial statements, except if mentioned otherwise. Set out below are the material accounting policies.

The comparative figures included in the Statement of Financial Position, Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares relate to the balances as at and for the year ended at 31 December 2024.

For the year ended 31 December 2024, the Financial Statements were prepared under IFRS. For the year ended 31 December 2025 the Board of Directors has elected to prepare the Financial Statements in accordance with the FRS102; the Financial Reporting Standard applicable in the UK and Republic of Ireland, ICAV Act and the UCITS Regulations.

The ICAV's transition date to FRS102 is 1 January 2024 and the comparative financial information for the year ended 31 December 2024 has been restated on a consistent basis with those accounting policies applied by the ICAV in preparing its first full Financial Statements in accordance with FRS102 at 31 December 2025.

2. Significant accounting policies (continued)

(a) Basis of accounting (continued)

The transition to FRS102 is accounted for in accordance with the standard and how to adopt FRS102 for the first time. The Board of Directors has considered how the transition from IFRS to FRS102 has affected the ICAV's reported financial position, financial performance and cash flows. The transition to FRS102 has had no impact:

- on reported net assets at the date of transition to FRS102 or at the end of the latest period presented in the entity's most recent annual financial statements in accordance with previous GAAP; or
- on the Statement of Comprehensive Income for the latest period presented in the entity's most recent annual financial statements in accordance with previous GAAP, as such no reconciliations from IFRS to FRS102 are included in these financial statements.

The Directors have availed of the exemption available under FRS102 not to prepare a Statement of Cash Flows. This exemption is available to the ICAV as majority of the ICAV's investments are highly liquid and are carried at market value. The ICAV produces a Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

(b) Basis of measurement

The Financial Statements have been prepared on a going concern basis, applying the historical cost convention, except for the non-derivative financial instruments valued at fair value through profit or loss and derivative financial instruments which have been valued at fair value through profit or loss.

Accounting standards require the Board of Directors to make an assessment of the ICAV's ability to continue as a going concern, taking into account all available information about the future, which is at least, but is not limited to, twelve months from the date the accounts are approved.

Having assessed the ICAV's core activities, the financial position, the principal risks and the other matters affecting the future performance of the ICAV included in connection with the Financial Statements, the Directors consider it appropriate to adopt the going concern basis in preparing the Financial Statements. The Directors have arrived at this opinion by considering, among other matters:

- The ICAV's investments comprise readily realisable securities which can be expected to be sold to meet funding requirements if necessary.
- The ICAV's NAV calculations have not been suspended as a result of the difficulties in fair valuing the instruments or for other reasons.
- The ICAV has no material borrowings.
- The ICAV is in a position to meet all current and future expenses. If any of the sub-fund's expenses will exceed the Ongoing Charges Figure in relation to operating the sub-fund, the Investment Manager will cover any shortfall from its own assets.
- HSBC Global Funds ICAV - Japan Equity Index Fund terminated during the year. This does not affect the going concern of the ICAV.

(c) Functional and presentation currency

(i) Presentation currency of the ICAV

The ICAV does not have a functional currency as it does not operate or transact in an economic environment and is structured as an umbrella fund for the segregated sub-funds. The ICAV's presentation currency is US Dollar.

2. Significant accounting policies (continued)

(c) Functional and presentation currency (continued)

(ii) Functional and presentation currency of the sub-funds

Functional currency is the currency of the primary economic environment in which the sub-funds operate. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The majority of each sub-fund's investments and transactions are denominated in one of the following: US Dollar, Euro or Japanese Yen. Similarly, subscriptions and redemptions are determined based on the net asset value, and received and paid in US Dollar, Euro or Japanese Yen. Distributions are also paid in US Dollar, Euro or Japanese Yen. The functional currency of the sub-funds, which is in each case is the US Dollar, Euro or Japanese Yen, is shown in the Statement of Financial Position of each sub-fund. The ICAV has also adopted these functional currencies as the presentation currency of each sub-fund.

(iii) Translation and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the Statement of Financial Position date.

Foreign exchange gains and losses arising from translation are included in the Statement of Comprehensive Income.

Foreign exchange gains and losses relating to cash and cash equivalents are presented in the Statement of Comprehensive Income within net gain/(loss) on foreign exchange.

Foreign exchange gains and losses relating to the Financial Assets and Liabilities carried at fair value through profit or loss are presented in the Statement of Comprehensive Income as part of Net gain/(loss) on financial assets and liabilities at fair value through profit or loss.

2. Significant accounting policies (continued)

(c) Functional and presentation currency (continued)

(iv) Presentational translation

For the purpose of presenting the Financial Statements of the ICAV:

- the Statement of Financial Position of the sub-funds with functional currencies other than US Dollar were translated to US Dollars at the exchange rate ruling at 31 December 2025; and

- the Statement of Comprehensive Income, proceeds from redeemable participating shares issued, redemptions of redeemable participating shares, equalisation and Statement of Cash Flows of the sub-funds with functional currencies other than US Dollar were translated at the US Dollar average monthly rates where those rates represent a reasonable approximation of actual rates.

The translation method resulted in a foreign currency translation amount of USD 115,712,024 (31 December 2024: USD (46,757,248)) due to the use of average rates as referred to above and the movement of closing exchange rates between 31 December 2025 and 31 December 2024. This has no impact on the net asset value per share of each of the sub-funds.

(d) Judgements and estimates

The preparation of Financial Statements in conformity with FRS102 requires the Board to make judgements, estimates and assumptions which affects the application of policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities which are not readily apparent from others.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on a regular basis. Revisions to accounting estimates are recognised in the financial year in which the estimates are revised and in any future periods affected. The transition to FRS102 has had no impact on the estimates included in the Financial Statements.

2. Significant accounting policies (continued)

(d) Judgements and estimates (continued)

Judgements
The determination of what constitutes an active market and what inputs are "observable" requires judgement by the Board when considering fair value measurement principles and fair value hierarchy disclosures. The determination of the sub-funds functional currencies also requires judgment. Information about judgements made in applying accounting policies that have effects on the amounts recognised in the Financial Statements is included in Note 2 (C ii and G iv).

Assumptions and estimation uncertainties
Information about assumptions and estimation uncertainties that have a risk of resulting in an adjustment to the carrying amounts and levelling classification of assets and liabilities within the year ending 31 December 2025 and 31 December 2024 is included in Note 4 (e).

(e) Amendments and interpretations effective from 1 January 2025

There are no amendments to existing standards relevant to the ICAV that are effective for the financial period beginning 1 January 2025.

(f) Financial assets and liabilities at fair value through profit or loss

(i) Classification and measurement of financial assets and financial liabilities

In accordance with Section 11.2 of FRS102, the ICAV has elected to apply the recognition and measurement provisions of IFRS 9 Financial Instruments to all financial instruments. Disclosure and presentation requirements are applied in accordance with FRS102.

The ICAV is an open-ended investment entity and materially all of the financial assets and liabilities of its sub-funds are required to be managed on a fair value through profit or loss basis in order to track the relevant reference indices or benchmark. This applies to both initial and subsequent recognition. None of the ICAV's assets qualify for measurement at fair value through other comprehensive income.

Assets and liabilities such as cash and cash equivalents, due to/from broker and other short-term receivables and payables are measured at amortised cost at initial recognition and subsequently. All other material assets and liabilities of the ICAV are debt securities, equity investments, investments in unlisted open-ended investment funds, and derivatives and the assets and liabilities are at FVTPL due to the business model of the sub-funds at initial recognition and subsequently.

Purchases and sales of investments are recognised on the trade date - the date on which the ICAV commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Subsequent measurement
Financial assets at FVTPL are subsequently measured at fair value and financial assets at amortised cost are subsequently measured at amortised cost using the effective interest method.

2. Significant accounting policies (continued)

(f) Financial assets and liabilities at fair value through profit or loss (continued)

(ii) Derecognition

The ICAV derecognises a financial asset when the contractual rights to the cash flows from the asset expire or it transfers the rights to receive contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the ICAV neither transfers nor retains substantially all of the risk and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the Statement of Comprehensive Income. Any interest in such transferred financial assets that is created or retained by the ICAV is recognised as a separate asset or liability.

The ICAV derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

(iii) Fair value measurement principles

A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

(a) in the principal market for the asset or liability; or
(b) in the absence of a principal market, in the most advantageous market for the asset or liability.

The fair value of financial instruments where quoted in an active market is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. The ICAV utilises the last traded market price for both financial assets and financial liabilities where the bid-ask spread is narrow.

2. Significant accounting policies (continued)

(f) Financial assets and liabilities at fair value through profit or loss (continued)

(iii) Fair value measurement principles (continued)

If an active quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the Statement of Financial Position date applicable to an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the Statement of Financial Position date.

(iv) Offsetting of financial assets and liabilities

None of the financial assets or financial liabilities are offset in the Statement of Financial Position.

(v) Securities Lent

Securities which are lent out as part of the securities lending agreement continue to be recognised as financial assets in the balance sheet. Securities lending constitutes temporary transfer of ownership and would not have any impact on the sub-funds holdings in the Statement of Financial Position when securities are lent. The bonds are priced dirty and interest receivable related to bonds are included in transferable securities in the Statement of Financial Position. Further information on securities lending and the breakdown of this amount is detailed in Note 8 to the Financial Statements.

(vi) Investment Funds

The fair value of investments made by the ICAV in investment funds is based on the latest unaudited net asset value per share or unit quoted by the administrator of the investment fund. The net asset values are determined by the management of the investment funds and their respective administrators and may be unaudited at the period end. The Directors consider the net asset value of the underlying funds to be representative of fair value, as the funds are redeemable or tradable at net asset value at the measurement date.

(g) Cash and cash equivalents

Cash and cash equivalents comprise deposits with banks and highly liquid financial assets with maturities of three months or less from the date of acquisition that are subject to an insignificant risk of changes in their fair value and are used by the ICAV in management of short-term commitments, other than cash collateral provided in respect of derivatives. As at 31 December 2025 and at 31 December 2024, all cash and overdraft balances are held with HSBC Bank Plc. Details of overdraft facility are disclosed in Note 7.

2. Significant accounting policies (continued)

(h) Due from/to brokers

These are measured at amortised cost using the effective interest method. The "amortised cost" of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss in the Statement of Comprehensive Income. Any gain or loss on derecognition is also recognised in profit or loss.

(i) Due from/to shareholders

Due from shareholders relates to subscriptions receivable not settled at the year end and due to shareholders relate to redemptions payable not settled at year end.

(j) Net gains/(losses) from financial instruments at fair value through profit and loss

Net gains/(losses) from financial instruments at fair value through profit and loss includes all realised gains and losses, unrealised fair value changes, foreign exchange differences and coupon related interest income from debt securities measured at FVTPL.

(k) Dividend Income

Dividend income on financial assets at FVTPL is credited to the Statement of Comprehensive Income on the date on which the relevant securities are listed as “ex-dividend”. Dividend income, which is disclosed separately in the Statements of Comprehensive Income, is shown gross of any non-recoverable withholding taxes.

(l) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis and as the related services are performed.

(m) Redeemable participating shares

Redeemable participating shares in all share classes are redeemable at the Shareholder’s option and are classified as financial liabilities as they do not meet the requirement, for puttable instruments to be treated as equity, that all instruments have identical features. The redeemable participating shares can be redeemed at any time for cash equal to a proportionate share of a particular sub-fund’s net asset value. The participating share is carried at amortized cost and is measured at the present value of the redemption amount that is payable at the Statement of Financial Position date if the shareholder exercised its right to put the share back to the sub-fund.

(n) Distributions to holders of redeemable participating shares

Distributions to holders of redeemable participating shares are recorded in the Statement of Comprehensive Income as finance costs when declared (i.e. the decision has been through the final required approval stage and cannot be reversed). Further information on distributions is provided in Note 11.

2. Significant accounting policies (continued)

(o) Income tax expense

Under current law and practice the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. As such, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a 'chargeable event'. A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation or transfer of shares.

No Irish tax will arise on the ICAV regarding chargeable events.

A chargeable event does not include:

(i) any transaction in relation to shares held in a recognised clearing system;

(ii) any exchange by a Shareholder effected by way of a bargain made at arm's length by the ICAV, of shares in the ICAV for other Shares in the ICAV;

(iii) certain transfers of shares between spouses or civil partners and former spouses or former civil partners;

(iv) an exchange of shares arising on a qualifying amalgamation or reconstruction of the ICAV with another Irish investment undertaking; or

(v) the cancellation of shares in the ICAV arising from an exchange in relation to a scheme of amalgamation.

Income, interest and capital gains (if any) received on investments made by the ICAV may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the ICAV or its Shareholders.

(p) Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs include commissions paid to brokers and counterparties. Transaction costs are expensed on an accrual basis and are recorded in the Statement of Comprehensive Income as part of other expenses. Transaction costs incurred during the financial period by each sub-fund are detailed in Note 3(f).

2. Significant accounting policies (continued)

(q) Cross investment between funds

Investments by sub-funds in the units of other sub-funds within the same umbrella must be disclosed. The policies adopted by the umbrella to disclose cross-investments between sub-funds within that umbrella must be explained in the annual report.

As at 31 December 2025

Fund Name	Investee sub- fund	Fair value	Net gain on financial assets at fair value through profit and loss
HSBC Global Funds ICAV - Shariah Multi Asset Fund	HSBC Global Funds ICAV - Global Sukuk UCITS ETF	USD 11,803,050	USD 347,700
HSBC Global Funds ICAV – Global Aggregate Bond ESG UCITS ETF	HSBC Global Funds ICAV – China Government Local Bond UCITS ETF	USD 170,367	USD 5,511
HSBC Global Funds ICAV - Multi Thematic Equity Fund	HSBC Global Funds ICAV - Digital Leaders Equity Fund	USD 40,190,011	USD 6,584,130
HSBC Global Funds ICAV - Multi Thematic Equity Fund	HSBC Global Funds ICAV - Global Transition Resources Equity Fund	USD 20,490,826	USD 2,633,486

As at 31 December 2024

Fund Name	Investee sub- fund	Fair value	Net gain on financial assets at fair value through profit and loss
HSBC Global Funds ICAV - Shariah Multi Asset Fund	HSBC Global Funds ICAV - Global Sukuk UCITS ETF	USD 3,017,591	USD 44,058
HSBC Global Funds ICAV – Global Aggregate Bond ESG UCITS ETF	HSBC Global Funds ICAV – China Government Local Bond UCITS ETF	USD 107,581	USD 1,609

For the purposes of determining the net assets and results of the ICAV, these cross holdings are eliminated so that the total amounts only reflect external assets and liabilities of the ICAV as a whole.

This elimination for the purpose of ascertaining the total ICAV results and net assets does not have any effect on the results and net assets of any individual Sub-Fund.

3. Fees and expenses

(a) Management fee

The ICAV has a fee structure where, in respect of each of the sub-funds, all of the fees and expenses (except for transaction costs and taxes or duty charges for portfolio re-balancing, all of which will be paid separately out of the assets of the relevant sub-funds) are paid as one single fee. This is referred to as the "Ongoing Charges Figure" or "OCF" in the Prospectus of the ICAV and is being disclosed in these Financial Statements as the "Management Fee".

The Management Fee is paid to the Management Company to cover fees for providing investment management, distribution, marketing and advice services in respect of all sub-funds. The Management Company is responsible for paying out of the Management Fee, the fees of the Investment Managers, the Distributors, the operating, administrative and services expenses and may pay part of such fee to recognised intermediaries or such other person as the Management Company may determine, at its discretion.

The Management Fee covers all of the following operating, administrative and services expenses (but is not an exhaustive list):

- Custody, depositary and safekeeping charges
- Sub-custodian fees and transaction charges (which will be at normal commercial rates)
- For Hedged Share Classes, fees to third parties to cover the execution of the share class currency hedging policy.
- Transfer, registrar and payment agency fees
- Administration, domiciliary and fund accounting services
- Legal expenses for advice on behalf of the ICAV
- Audit fees
- Registration fees
- Listing fees (if applicable)
- Directors' fees and expenses. See Note 3(d).
- Documentation costs – preparing, printing, translating and distributing documents including, but not limited to, the Prospectus, Key Investor Information Documents and annual reports made available directly or through intermediaries to its Shareholders in markets in which the sub-funds are registered for sale in compliance with local regulations
- Costs associated with the collection, reporting and publication of data about the ICAV, its investments and Shareholders as required by laws and regulations from time to time
- Fees charged by third party vendors for publishing fund performance data
- Financial index licensing fees
- Any fees charged for sub-fund expense data analysis if specifically requested by the ICAV to be obtained from an independent third party
- Collateral management services
- Any industry association fees for the benefit of the ICAV

The Management Fee is accrued daily and payable monthly in arrears. The Management Fee of each sub-fund of the ICAV is as listed in the relevant sub-fund's Supplement and is disclosed in the Other Additional Disclosure section of these Financial Statements.

3. Fees and expenses (continued)

(a) Management fee (continued)

If a sub-fund's expenses exceed the Management Fee for a share class, the Investment Manager will cover any shortfall from its own assets.

The Management Fee for the financial year amounted to USD 22,130,949 (31 December 2024: USD 17,235,234) of which USD 4,265,042 (31 December 2024: USD 3,195,550) was payable at the financial year end.

(b) Investment Management fees

The Investment Managers shall be entitled to receive from the Management Company a fee in relation to each sub-fund or Class (the "Investment Management Fee"). Such fee shall be calculated and accrued at each Valuation Point and payable monthly in arrears. The Investment Management fee paid by the Management Company out of the OCF for the financial year ended 31 December 2025 was USD Nil (31 December 2024: USD Nil) of which USD Nil (31 December 2024: USD Nil) was payable at 31 December 2025. There are no performance fees.

(c) Administrator's and Depositary's fees

The Management Company is responsible for the payment to the Administrator and Depositary out of the OCF, an annual fee, payable monthly in arrears at a rate ranging from 0.30 basis points to 1.35 basis points of the net asset value of the relevant sub-fund of the ICAV as of each valuation day. The Administrator's fees payable by the Management Company out of the OCF for the financial year ended 31 December 2025 is USD 6,296,213 (31 December 2024: USD 4,235,744) of which USD 516,134 (31 December 2024: USD 413,054) is payable at 31 December 2025. The Depositary's fee payable by the Management Company out of the OCF for the financial year ended 31 December 2025 is USD 3,924,861 (31 December 2024: 1,560,056) of which USD 306,693 (31 December 2024: 252,655) is payable at 31 December 2025.

(d) Directors' fees and expenses

The Directors' fees which are paid out of the OCF for the financial year ended 31 December 2025 amounted to USD 135,407 (31 December 2024: USD 124,260).

(e) Auditor's fees

Fees for the statutory auditor, KPMG Ireland, in respect of the financial year 31 December 2025, relate entirely to the audit of the Financial Statements of the ICAV. Auditor's fees for the financial year end amounted to USD 419,661 (31 December 2024: USD 313,964) excluding VAT of which USD 419,661 (31 December 2024: USD 313,964) was payable as at 31 December 2025. All payments for the statutory auditor are met from the OCF charge detailed above and levied by the Management Company.

3. Fees and expenses (continued)

(f) Transaction cost

Transaction costs are the costs incurred in the acquisition, issue or disposal of financial assets and liabilities.

For the financial year ended 31 December 2025 and the financial year ended 31 December 2024, the ICAV incurred transaction costs that are identifiable as follows:

Sub-Funds	31 December 2025	31 December 2024
HSBC Global Funds ICAV – Credit Income Advance Fund*	USD 1,805	-
HSBC Global Funds ICAV – Digital Leaders Equity Fund**	USD 126,068	USD 10,898
HSBC Global Funds ICAV – Global Equity Index Fund	USD 5,698	USD 3,347

HSBC Global Funds ICAV – Multi-Factor US Equity Fund	USD 215,607	USD 139,526
HSBC Global Funds ICAV – Multi-Factor Worldwide Equity Fund	USD 2,388,533	USD 1,211,811
HSBC Global Funds ICAV – Shariah Multi Asset Fund	USD 5	USD 391
HSBC Global Funds ICAV – US Equity Index Fund	USD 7,062	USD 89,150

*commenced operations on 15 December 2025.
**commenced operations on 06 December 2024.
***commenced operations on 11 June 2025.
****terminated on 24 March 2025.

(g) Dividend Purification

Some Shariah-compliant investments may yield small percentages of income inconsistent with Shariah Principles that will then need to be “purified”. On at least an annual basis, following the approval by the Shariah Committee of the calculation of the non-permissible income in respect of the relevant Shariah sub-fund (following the principles to determine this calculation as set down by the Shariah Committee), the ICAV will donate any such non-permissible income to one or more charities selected by the Investment Manager and approved by the Shariah Committee. Non-permissible income in respect of a Shariah sub-fund will be calculated by assessing the income received by the relevant Shariah sub-fund that arose from non-compliant activities. In order to calculate the non-permissible income in respect of a Shariah sub-fund, the index provider will provide the Management Company with the dividend purification ratios, represented as a percentage of each dividend paid out by the companies in the index. The Management Company then calculates the amount to be purified based on the income received by the sub-fund on a monthly basis and liaises with the Administrator so that such non-permissible income is accrued. Following the review by the Shariah Committee, the Management Company will instruct the Administrator to pay the total non-permissible income to the nominated charity.

For the year ended 31 December 2025, incurred dividend purification was USD 508 (31 December 2024: USD 242) in HSBC Global Funds ICAV – Global Sukuk UCITS ETF and USD 7,084 (31 December 2024: USD Nil) in HSBC Global Funds ICAV – Shariah Multi Asset Fund.

4. Risks associated with financial instruments

The ICAV's investment activities expose it to a variety of financial risks: market risk (including price risk, currency risk and interest rate risk), credit risk and liquidity risk. The ICAV's overall risk management process focuses on the unpredictability of financial markets and seeks to mitigate potential adverse effects on the ICAV's financial performance.

Changes to the composition and/or weighting of the securities constituting the financial index which is tracked by a sub-fund will ordinarily require that sub-fund to make corresponding adjustments or rebalancing to its investments in order to seek to track the financial index. The Investment Manager will accordingly seek to rebalance the composition and/or weighting of the securities held by a sub-fund from time to time to the extent practicable and possible to conform to changes in the composition and/or weighting of securities that constitute the respective financial index. Other re-balancing measures may be taken from time to time to seek to maintain the correspondence between the performance of a sub-fund and the performance of the financial index.

The Management Company seeks to mitigate the financial risk in the ICAV in its daily risk management process. From year to year, the ICAV's exposure to risk will alter as market conditions change and as the components of the portfolio change and are adjusted through trading, subscriptions and redemptions. Regarding the objectives, policies and processes for managing the risk, whilst adapting to the current market conditions, the approach will remain consistent from year to year. The ICAV uses the commitment approach to calculate the sub-funds' global exposure.

The sub-funds also have Derivative Instruments ("FDIs") for efficient portfolio management of its assets and for investment purposes. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the sub-funds with an appropriate level of risk, taking into account the risk profile of the sub-funds and the general provisions of the UCITS Regulations. In particular, FDIs may be used for the purpose of minimising tracking error i.e. the risk that the sub-funds return varies from the respective benchmark financial index.

4. Risks associated with financial instruments (continued)

(a) Market risk

Market risk is the risk that changes in market prices such as interest rates, foreign exchange rates or equity and credit spreads will affect the sub-funds' income or the fair value of its holdings of financial instruments.

(i) Price risk

Price risk is the risk that the value of instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. It represents the potential loss the ICAV might suffer through holding market positions in the face of price movements. The securities held by the sub-funds are held at fair value with fair value changes recognised in the Statement of Comprehensive Income. All changes in market conditions will therefore directly affect net investment income for the sub-funds. The sub-funds manage this exposure to individual price movements of underlying positions by only making investments which are in line with the investment restrictions. The investment concentration types within the portfolio are disclosed for each sub-fund in the Schedule of Investments.

The table below outlines the impact on the net assets attributable to holders of redeemable shares upon 5% increase/decrease (all other variables remaining constant) in investments as at 31 December 2025 and 2024:

Sub-Funds	31 December 2025	31 December 2024

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(ii) Currency risk

Currency risk is the risk that the fair value of a financial instrument as determined in a sub-fund's functional currency will fluctuate because of changes in foreign exchange rates. Each sub-fund may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, each sub-fund is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the ICAV's assets or liabilities. The sub-funds may seek to hedge this currency risk through FX transactions in the spot, forward, currency swaps or futures markets.

The table below outlines the net foreign currency risk exposure of the sub-funds as at 31 December 2025 and 31 December 2024.

HSBC Global Funds ICAV – China Government Local Bond UCITS ETF

As at 31 December 2025	Other assets/(liabilities) USD	Financial assets/liabilities at fair value through profit or loss* USD	Net Currency Exposure USD
Chinese Yuan	394,256	331,787,298	332,181,554
Euro	1,880	2,021,177	2,023,057
Hong Kong Dollar	4	-	4
Pound Sterling	1,383	11,095,682	11,097,065
	397,523	344,904,157	345,301,681

*Includes interest receivable at fair value through profit or loss.

The sub-fund has entered into a number of forward exchange contracts for currencies other than USD. The impact of the hedging has been included in the above table. At 31 December 2025, if any non-functional currencies had strengthened by 5% in relation to the respective functional currency of the sub-fund, with all other variables held constant, net assets attributable to holders of redeemable participating shares would have increased/decreased by the amounts shown below.

HSBC Global Funds ICAV – China Government Local Bond UCITS ETF
As at 31 December 2025

	USD
Chinese Yuan	16,609,078
Euro	101,153
Hong Kong Dollar	-
Pound Sterling	554,853
	17,265,084

A 5% decrease in non-functional currencies in relation to the respective functional currency with all other variables held constant, would lead to a corresponding decrease/increase in the net assets attributable to holders of redeemable participating shares by the approximate amounts as shown in the above tables. The estimated movement is based on management's determination of a reasonably possible change in foreign exchange rates. In practice, the actual results may differ from the sensitivity analysis above and the difference could be material.

Singapore Dollar	(67)
South Korean Won	(52)
Swedish Krona	(19)
Swiss Franc	1,925,276
Thai Bhat	(442)
	1,915,627

A 5% decrease in non-functional currencies in relation to the respective functional currency with all other variables held constant, would lead to a corresponding decrease/increase in the net assets attributable to holders of redeemable participating shares by the approximate amounts as shown in the above tables. The estimated movement is based on management's determination of a reasonably possible change in foreign exchange rates. In practice, the actual results may differ from the sensitivity analysis above and the difference could be material.

(a) Market risk (continued)

(ii) Currency risk (continued)

The sub-fund has entered into a number of forward exchange contracts for currencies other than USD. The impact of the hedging has been included in the above table. At 31 December 2024, if any non-functional currencies had strengthened by 5% in relation to the respective functional currency of the sub-fund, with all other variables held constant, net assets attributable to holders of redeemable participating shares would have increased/decreased by the amounts shown below.

HSBC Global Funds ICAV – Global Equity Index Fund
As at 31 December 2024

	USD
Australian Dollar	51,884
Canadian Dollar	88,597
Danish Krone	19,878
Euro	229,249
Hong Kong Dollar	12,583
Israeli New Shekel	2,440
Japanese Yen	161,876
New Zealand Dollar	1,034
Norwegian Krone	4,173
Pound Sterling	106,742
Singapore Dollar	9,423
Swedish Krona	22,955
Swiss Franc	67,060
	777,894

A 5% decrease in non-functional currencies in relation to the respective functional currency with all other variables held constant, would lead to a corresponding decrease/increase in the net assets attributable to holders of redeemable participating shares by the approximate amounts as shown in the above tables. The estimated movement is based on management's determination of a reasonably possible change in foreign exchange rates. In practice, the actual results may differ from the sensitivity analysis above and the difference could be material.

	858

A 5% decrease in non-functional currencies in relation to the respective functional currency with all other variables held constant, would lead to a corresponding decrease/increase in the net assets attributable to holders of redeemable participating shares by the approximate amounts as shown in the above tables. The estimated movement is based on management's determination of a reasonably possible change in foreign exchange rates. In practice, the actual results may differ from the sensitivity analysis above and the difference could be material.

*Includes interest receivable at fair value through profit or loss.

The sub-fund has entered into a number of forward exchange contracts for currencies other than USD. The impact of the hedging has been included in the above table. At 31 December 2025, if any non-functional currencies had strengthened by 5% in relation to the respective functional currency of the sub-fund, with all other variables held constant, net assets attributable to holders of redeemable participating shares would have increased/decreased by the amounts shown below.

HSBC Global Funds ICAV - Sustainable Development Bank Bonds UCITS ETF
As at 31 December 2025

	USD
Euro	1,327,558
Pound Sterling	4,193,415
Swiss Franc	64
	5,521,037

A 5% decrease in non-functional currencies in relation to the respective functional currency with all other variables held constant, would lead to a corresponding decrease/increase in the net assets attributable to holders of redeemable participating shares by the approximate amounts as shown in the above tables. The estimated movement is based on management's determination of a reasonably possible change in foreign exchange rates. In practice, the actual results may differ from the sensitivity analysis above and the difference could be material.

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(iii) Interest rate risk

Equity investments are non–interest bearing. Therefore the sub–funds which hold mainly equity investments are not subject to significant amounts of interest rate risk.

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

HSBC Global Funds ICAV – China Government Local Bond UCITS ETF as of 31 December 2025

	Interest bearing USD	Non-interest bearing USD	Total USD

Total Interest sensitivity gap	345,815,956		

The following tables detail the effect on net assets should interest rates have increased/decreased by 100 bps with all other variables remaining constant, assuming that a 100 bps increase/decrease in the base interest rate would result in a correlating 100 bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 100 bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of the net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

Total Interest sensitivity gap	9,271,556		

The following tables detail the effect on net assets should interest rates have increased/decreased by 100 bps with all other variables remaining constant, assuming that a 100 bps increase/decrease in the base interest rate would result in a correlating 100 bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 100 bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of the net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

	Interest bearing EUR
Effect on net assets after 100 bps decrease	9,364,272
Effect on net assets after 100 bps increase	9,178,840

The following tables detail the effect on net assets should interest rates have increased/decreased by 100 bps with all other variables remaining constant, assuming that a 100 bps increase/decrease in the base interest rate would result in a correlating 100 bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 100 bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of the net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

Financial liabilities at fair value through profit or loss	-	63	63
Due to Management Company	-	34,946	34,946
Total Liabilities	-	35,009	35,009
Total Interest sensitivity gap	507,715,656		

The following tables detail the effect on net assets should interest rates have increased/decreased by 100 bps with all other variables remaining constant, assuming that a 100 bps increase/decrease in the base interest rate would result in a correlating 100 bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 100 bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of the net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

	Interest Bearing USD
Effect on net assets after 100 bps decrease	512,792,813
Effect on net assets after 100 bps increase	502,638,499

*commenced operations on 08 October 2024.

4. Risks associated with financial instruments (continued)

(b) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the ICAV. Credit risk is generally higher when a non-exchange traded financial instrument is involved because the counterparty for non-exchange traded financial instruments is not backed by an exchange clearing house. Exchange clearing house benefit both parties in a transaction as they bear most of the credit risk. If two individuals deal with one another, the buyer bears the credit risk of the seller, and vice versa. When an exchange clearing house is used, the credit risk that is held against both buyer and seller is passed on to the exchange clearing house.

This exposure exists between trade date and settlement date for asset purchase and sale transactions, for securities re-used by counterparty and for the lifetime of derivative transactions. This exposure exists between trade date and settlement date for asset purchase and sale transactions, for securities re-used by counterparty and for the lifetime of derivative transactions. This exposure also exists for collateral held at counterparties. The counterparties and brokers of the sub-funds have the right to re-use assets, which may increase counterparty risk. Assets that are re-used by the counterparties are subject to the risk of the counterparty defaulting on its obligations. It is the policy of the sub-funds to transact the majority of its securities and contractual commitment activity and its derivative transactions with brokers, counterparties and banks that the Directors consider to be well established. The securities traded by the sub-funds also include counterparty risk as to the solvency of the issuer of the securities. The counterparties, brokers and bankers of the sub-funds hold cash as bankers and the sub-funds are thus in a position of general creditor to such counterparties also for such amounts.

HSBC Bank Plc, the holding company of the Depositary, HSBC Continental Europe, was rated as A+ (31 December 2024: AA-) by Standard and Poor's as at 31 December 2025.

The Investment Manager monitors the portfolio risk on a daily basis which includes credit ratings with any breaches or concerns being escalated and actioned.

The below table provides an analysis of the ICAV's counterparty's credit rating as reported by Standard and Poor's.

Counterparty	Credit Rating 31 December 2025	Credit Rating 31 December 2024
Barclays London	A+	A+
BNP Paribas	A	A+
Citigroup Global Markets Limited	A+	A+

4. Risks associated with financial instruments (continued)

(b) Credit risk (continued)

The ICAV will also be exposed to a credit risk in relation to the counterparties with whom it transacts or places margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. The investments in bonds or other debt securities will be subject to the credit risk of the issuers of the bonds or debt securities in which it invests. In the event that any issuer of bonds or other debt securities in which the assets of a sub-fund are invested defaults, becomes insolvent or experiences financial or economic difficulties, this may adversely affect the value of the relevant securities (which may be zero) and any amounts paid on such securities (which may be zero), which may in turn adversely affect the Net Asset Value of the sub-funds. The ICAV is exposed to credit risk on Financial assets at fair value through profit and loss, Cash and cash equivalents, Due from Broker, Due from Shareholders, Dividends receivable, Interest receivable from financial assets at fair value through profit or loss and other receivables as disclosed in the Statement of Financial Position and Debt securities as disclosed in Note 4 (e). The carrying amounts of financial assets represents the maximum exposure to credit risk.

Investments in debt securities

At 31 December 2025, the ICAV was invested in corporate debt securities with the following credit quality. The ratings are based on average credit rating which is an average of the vendors: S&P, Fitch, Moody's, and Sovereign Rating. Securities only rated by Moody's and Fitch have been given a S&P's equivalent rating. The average fund and benchmark rating includes securities which are NR.

4. Risks associated with financial instruments (continued)

(c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The sub-funds are exposed to daily cash redemptions of redeemable participating shares and monitors this activity to ensure that funds are available to meet the redemption requirements.

The ICAV's equity investments are considered to be readily realisable as they are all traded on regulated markets. The ICAV has therefore limited exposure to liquidity risk.

The ICAV's fixed income investments are exposed to liquidity risk where a sub-fund cannot sell its underlying bonds quickly enough to meet investor redemptions without significant price losses.

The ICAV's financial instruments also comprise investments in derivative contracts traded over-the-counter, which are not traded in an organised public market and which generally may be illiquid. As a result, the ICAV may not be able to liquidate quickly some of its investments in these instruments at an amount close to its fair value in order to meet its liquidity requirements, or to respond to specific events such as a deterioration in the credit worthiness of any particular issuer. This risk is mitigated by restricting the exposure to any particular instrument.

The table below analyses the ICAV's financial liabilities into relevant maturity groupings based on the remaining year at the Statement of Financial Position date to the contractual maturity date. Expected cashflows do not vary significantly from contractual cashflows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

Total Liabilities	143,162,102	1,671	-	143,163,773

The principal investment strategies that involve foreign securities, derivatives or securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk. The Management Company monitors the sub-funds' liquidity position on a daily basis, focusing on both the requirements for liquidity and that suitable assets are able to meet such requirements.

4. Risks associated with financial instruments (continued)

(e) Fair value of assets and liabilities

FRS102 requires disclosures of financial instruments measured at fair value to be based on a three-level fair value hierarchy that reflects the significance of the inputs in such fair value measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1	Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the ICAV has the ability to access at the measurement date;
Level 2	Inputs other than unadjusted quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.
Level 3	This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

A financial instrument’s level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes “observable” requires judgement by the Directors.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors.

The Directors consider observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Directors' perceived risk of that instrument.

Transferable securities

Transferable securities with values based on quoted market prices in active markets are classified within Level 1. These include active listed equities and debt securities. Transferable securities that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include corporate debt securities. The fair value of such instruments not quoted in an active market may be determined by the ICAV using reputable pricing sources or indicative prices from bond/debt market makers. The ICAV exercises judgement and makes estimates on the quantity and quality of pricing sources used. Broker quotes as obtained from the pricing sources may be indicative and not executable or binding. Transferable securities classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. The fair value of such instruments is determined using valuation techniques including inputs not based on market data and where significant entity determined adjustments or assumptions are applied, as detailed in the fair value hierarchy note to the Financial Statements. Level 3 investments in equity securities are disclosed in Note 4 (e).

4. Risks associated with financial instruments (continued)

(e) Fair value of assets and liabilities (continued)

Derivative instruments

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as contracts for difference, futures contracts, exchange traded option contracts and total return swaps are typically classified within level 1 or level 2 of the fair value hierarchy depending on whether they are deemed to be actively traded. OTC derivatives, such as forward foreign exchange contracts have inputs which can generally be corroborated by market data and are therefore classified within level 2.

No investments have been classified within Level 3 at any time during the year, consequently no reconciliation of Level 3 fair value measurements is required.

For the year ended 31 December 2025, all other assets and liabilities, other than investments at fair value, whose carrying amounts approximate fair value would have been considered to be classified within Level 2 of the fair value hierarchy if such classification was required.

The sub-funds may invest in Financial Derivatives Instruments for investment purposes, for hedging purposes and for efficient portfolio management purposes.

Financial assets at amortised cost

Financial assets at amortised cost includes cash and cash equivalents, due from broker, due from shareholders, interest receivable and other receivables.

Financial liabilities at amortised cost

Financial liabilities at amortised cost includes due to broker, due to shareholders, management fees payable, distributions payable and other payable.

4. Risks associated with financial instruments (continued)

(e) Fair value of assets and liabilities (continued)

4. Risks associated with financial instruments (continued)

(e) Fair value of assets and liabilities (continued)

The ICAV recognises transfers between levels of the fair value hierarchy as at the end of the reporting year during which the change occurred.

During the year, there were transfers between levels within the ICAV, primarily these were transfers from level 1 to level 2 of USD 390.94 million (2024: USD 297.78 million) and transfers from level 2 to level 1 of USD 1,732.03 million (2024: USD 1,864.04 million).These transfers relate to equity securities and debt securities and arose to reflect the change in the observed valuation inputs and, in certain cases, the change in the level of trading activities of the securities.

5. Derivative Contracts

The nominal and fair value of derivative instruments is disclosed in the Schedule of Investments for each sub-fund.

Futures

Futures are valued at fair value based on the settlement price on the relevant valuation date. Gains and losses on futures are recorded by the ICAV based on market fluctuations and are recorded as realised or unrealised gains/(losses) dependent upon settlement terms of the contracts held. The ICAV includes bond futures, currency futures, index futures and interest rate futures.

Forward contracts

Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the OTC market. The ICAV may enter into forward foreign exchange contracts to manage the currency risk arising from the ICAV's investment or anticipated investment in investments denominated in foreign currencies. Forward contracts may be used for hedging and currency management of both local and foreign currencies.

Contracts for difference

Contracts for difference ("CFDs") are agreements between the ICAV and third parties which allow the ICAV to acquire an exposure to the price movement of specific securities without actually purchasing the securities. Upon entering into a CFD, the ICAV is required to deposit with a broker initial cash margin equal to a certain percentage of the contract amount. Variation margin payments are made or received by the ICAV depending upon the fluctuation in the value of the underlying securities. The changes in contract values are recorded as unrealised gains or losses and the ICAV recognises a realised gain or loss when the contract is closed or when the contract is re-set. CFDs are fair valued as the change in market value of the underlying security applied to the notional amount of the CFD held at the end of the year, representing the unrealised gain or loss on these CFDs. The market value of the underlying security is determined by reference to the quoted market price available on a recognised stock exchange.

All income accruing to the underlying securities in the CFDs and the financing charges associated with the CFD trading are accrued by the ICAV on an accruals basis and is recognised in the Statement of Comprehensive Income as part of the net gain/(loss) on financial assets and financial liabilities at fair value through profit or loss.

5. Derivative Contracts (continued)

Swaps

Swaps are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts. The total return swaps entered into by HSBC Global Funds ICAV - Cross Asset Trend Fund during the year amounted to USD 2,795,483 (31 December 2024: 2,232,268) and the notional value of the swaps was EUR 190,990,536 (2024: EUR 139,241,469). HSBC Global Funds ICAV – Credit Income Advance Fund during the year amounted to USD 38,564 (31 December 2024: Nil) and the notional value of the swaps was USD 2,096,756 (2024: Nil). The underlying investment of total return swaps is SGI Custom Commodity Trend Following Index for 31 December 2025 and 31 December 2024.

Offsetting assets and liabilities

The ICAV holds a master netting or similar agreements with all key trading counterparties. The ICAV considers that it has a current legally enforceable right to set off the recognised amounts, however, is not expected to realise the relevant assets and settle the liabilities simultaneously and therefore has not offset the relevant financial assets and liabilities under such agreements.

None of the financial assets or financial liabilities are offset in the Statement of Financial Position.

The International Swaps and Derivatives Association (“ISDA”) and similar master netting arrangements do not meet the criteria for offsetting in the Statement of Financial Position. This is because they create a right of set-off of recognised amounts that is enforceable only following an event of default, insolvency or bankruptcy of the sub-fund or the counterparties. In addition, the sub-funds and its counterparties do not intend to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

Calculation of Global Exposure

Global exposure is a measure designed to limit either the incremental exposure and leverage generated by the ICAV through the use of FDI (including embedded derivatives) or the market risk of the sub-funds' portfolio.

In calculating global exposure, the ICAV adopts a commitment approach in managing risks. The commitment approach is applied to all positions in FDI, whether used as part of the sub-funds’ general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management.

6. Net asset value

The following table discloses the dealing Net Asset Value, the shares in issue and Net Asset Value per Share for each Share Class of the sub-funds as at 31 December 2025, 31 December 2024 and 31 December 2023.

HSBC Global Funds ICAV - Multi-Factor EMU Equity	10,000,000	10%
HSBC Global Funds ICAV - Multi-Factor Worldwide Equity Fund	50,000,000	10%

7. Overdraft Facility (continued)

The ICAV has entered into the following overdraft facilities with HSBC Bank Plc:

Sub-fund*	Uncommitted overdraft Limit USD	% of NVAC^
HSBC Global Funds ICAV - Shariah Multi Asset Fund	1,500,000	10%
HSBC Global Funds ICAV - Sustainable Development Bank Bonds UCITS ETF	300,000	10%
HSBC Global Funds ICAV - US Corporate Bond UCITS ETF	5,000,000	10%
HSBC Global Funds ICAV - US Equity Index Fund	5,000,000	10%
HSBC Global Funds ICAV - US Smaller Companies ESG Fund	4,600,000	10%
HSBC Global Funds ICAV - US Treasury Bond UCITS ETF	5,000,000	10%
HSBC Global Funds ICAV - Global Transition Resources Equity Fund	4,600,000	10%

*HSBC Global Funds ICAV – Cross Asset Trend Fund, HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Small Cap ESG Fund, HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Value ESG Fund, HSBC Global Funds ICAV – Multi-Factor US Equity Fund and HSBC Global Funds ICAV – Multi Thematic Equity Fund have not entered into any overdraft facility.

^Net Value of Assets under Custody ("NVAC") represents 10% of the NVAC with the Depositary. To the extent that the facility is drawn down, the assets and cash balances held by the Depositary are held as collateral for the overdraft facilities.

An overdraft fee is charged on the facility at the HSBC Bank Plc's base lending rate plus 2%, calculated on a per annum basis. An annual fee has been waived for the ICAV. The overdraft fee on the facility is paid out of the Management Fee.

8. Securities Lending

The securities lending programme for the ICAV commenced on 01 June 2021.

Securities lending income for the financial year amounted to USD 10,750,611 (31 December 2024: USD 7,963,224) and is included in Other Income of Statement of Comprehensive Income.

Securities lending is used by the sub-funds to generate additional income from the securities held by the sub-fund. Further disclosures pertaining to securities lending are provided in Other Additional Disclosures.

Securities lent by a sub-fund are not derecognised from the sub-fund's Statement of Financial Position and securities lent can be sold at any time. During the year, the sub-funds listed below engaged in securities lending.

Cash Collateral and Securities Collateral for securities lending are held by HSBC Bank Plc as sub-custodian ("Securities Lending Agent").

There is no Cash Collateral on 31 December 2025 in any of the sub-funds and hence there is no re-use of Cash Collateral.

All of the collateral received in respect of the securities lending transactions for the sub-funds is entrusted to the Depositary for safekeeping. The proportion of collateral held in the sub-funds is segregated in full and never pooled.

In relation to Securities Financing Transactions, the ICAV did not have any transactions in repurchase agreements, buy-sell back transactions, sell-buy back transactions.

8. Securities Lending (continued)

The securities lending commission is allocated to the following parties:

- 75% of the gross revenue on securities lending is allocated to the relevant sub-fund.
- 10% of the gross revenue on securities lending is allocated to the Management Company.
- 15% of the gross revenue on securities lending is allocated to the Securities Lending Agent, HSBC Bank Plc.

Direct costs from securities lending include 15% of the gross revenue due to the agent lender which is USD 2,349,038 (31 December 2024: USD 1,592,644) and 10% of the gross revenue due to the Management Company which is USD 1,566,026 (31 December 2024: USD 1,061,764) as shown in the table below.

9. Soft Commission

Neither the ICAV nor the Investment Managers has entered into any soft commission arrangements with respect to the ICAV for the year end (31 December 2024: Nil).

10. Share capital and redeemable participating shares

Authorised

The authorised share capital of the ICAV is 2 subscriber shares of no par value issued at EUR1.00 each and 1,000,000,000,000,000 participating shares of no-par value.

Capital Management

2 subscriber shares are held by HSBC Global Asset Management Limited. They entitle the holders to attend and vote at general meetings of the ICAV but do not entitle the holders to participate in the profits or assets of the ICAV except for a return of capital on a winding-up. The holders of subscriber shares have one vote for each subscriber share held. The subscriber shares do not form part of the net asset value of the ICAV. They are thus disclosed in the Financial Statements by way of this note only.

The participating shares entitle the holders to attend and vote at general meetings of the ICAV and to participate in the profits of the ICAV attributable to the relevant sub-fund.

The ICAV's sub-funds have investments in investment funds managed by HSBC entities which are wholly owned subsidiaries of HSBC Holdings plc as detailed in Note 14.

The ICAV entered into a Securities Lending Agreement with HSBC Bank Plc from 1 June 2021 and details of the securities lending transactions are set out in Note 8.

12. Related parties (continued)

(b) Other related party transactions (continued)

The ICAV has obtained credit facilities with HSBC Bank Plc as detailed in Note 7. HSBC Bank Plc is considered to be a related party being a subsidiary of HSBC Holdings plc.

HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Small Cap Screened Fund, HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Value Screened Fund and HSBC Global Funds ICAV - HSBC MSCI World Fund are feeder funds ("Feeder Funds") of HSBC MSCI Emerging Markets Small Cap Screened UCITS ETF, HSBC MSCI Emerging Markets Value Screened UCITS ETF and HSBC MSCI World UCITS ETF (together the "Master Funds").

HSBC Global Markets is the only Authorised Participant that is a related party to the sub-funds. The ICAV does not make any other payments to HSBC Global Markets.

(c) Investment transactions with related parties

In their purchases and sales of investments, the sub-funds utilise the services of members of HSBC Group as broker for certain transactions. Details of such transactions executed during the year ended 31 December 2025 are shown below.

Sub-fund	Currency	Total aggregate value of such transactions for the year	Percentage of such transactions in value to total transactions for the year	Commission paid for the year	Average rate of commission

13. Efficient portfolio management for investment purposes

Subject to the conditions and within the limits laid down by the Central Bank of Ireland, and except as otherwise stated in the investment objective and policies of the sub-funds of the ICAV, the Management Company may employ investment techniques and instruments such as futures, options, forward foreign currency contracts and other derivatives for investment purposes or efficient portfolio management. Furthermore, new techniques and instruments may be developed which may be suitable for use by the ICAV in the future and may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank of Ireland.

Securities lending disclosures are included in Note 8.

Realised and unrealised gains and losses on exchange traded derivatives and over the counter markets are recognised in the Statement of Comprehensive Income.

14. Involvement with structured entities

The ICAV's investment funds have limited and clearly defined investment objectives, and the ICAV does not hold dominant voting rights. Each entity operates within the constraints of its founding terms and is designed to offer specific investment opportunities to investors. The risks associated with these investments are disclosed in Note 4 – Financial Instruments and Associated Risks. The maximum exposure to loss is limited to the carrying value of the financial assets held by each sub-fund of the ICAV. No financial or other support was provided to these entities during 2025 or 2024, and the ICAV and its sub-funds have no intention of providing such support in the future.

15. Operating segments

Operating segments are the components of the ICAV whose results are regularly reviewed by the ICAV's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance. Various sub-fund revenues are disclosed in the respective Statement of Comprehensive Income of the sub-funds. The Board, which is considered to be the CODM, managed the ICAV on the basis of business divisions determined with reference to market focus, geographical focus, investment funding model and the ICAV's management hierarchy. It is the opinion of the CODM that each sub-fund can be treated as a segment as the return on each sub-fund is linked to a different benchmark. Revenue generated from each sub-fund is presented in the Statement of Comprehensive Income of the relevant sub-fund.

Geographical areas
The ICAV does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each sub-fund's revenue may be considered as being attributed to the region stated in its investment objective.

Major customers
As the ICAV is an investment entity, its distinct major customers are from institutional investors the largest being circa 25% of the ICAV's net assets. The investment is allocated across fourteen distinct sub-funds which each have a separate Schedule of Investments.

Net gains (losses) from financial instruments at fair value through profit and loss includes all realised gains and losses and unrealised fair value changes and coupon income on debt securities held at fair value through profit and loss.

16. Significant events since the financial year end

1. Effective 1 January 2026, the ICAV Secretary changed to Matsack Trust Limited and the registered address of the ICAV changed to 70 Sir John Rogerson's Quay, Dublin 2, Ireland.

2. The updated supplement for HSBC Global Funds ICAV- Global ESG Government Bond UCITS ETF was noted by the Central Bank on 30 January 2026 to reflect updated ESG disclosures.

3. An update to Supplement 2 of the ICAV, in respect of HSBC Global Funds ICAV - Multi-Factor Worldwide Equity Fund, HSBC Global Funds ICAV - Multi-Factor EMU Equity Fund, HSBC Global Funds ICAV – Cross Asset Trend Fund and HSBC Global Funds ICAV – Shariah Multi Asset Fund was noted by the Central Bank on 16 March 2026 to reflect an update to the disclosure regarding the charity partner in respect of Shariah compliant sub-funds.

There were no other significant events since the financial year end.

17. Approval of Financial Statements

The Financial Statements were approved by the Board on 29 April 2026.

The Portfolio Changes reflect the aggregate purchases of a security exceeding one percent of the total value of purchases and aggregate disposals of a security greater than one percent of the total sales for the year. At a minimum the largest 20 purchases and largest 20 sales must be given. Where there are less than 20 purchases and sales during the year that meets the above criteria, all of the purchases and sales have been disclosed.

Management Company's Remuneration Policy

The Management Company has implemented a remuneration policy pursuant to Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards to depositary functions, remuneration policies and sanctions (the "UCITS V Directive"), which was transposed into Luxembourg law on 1 June 2016 by way of the Luxembourg law of 10 May 2016.

The remuneration policy, which has been approved by the Management Company's board of directors, includes measures to avoid conflicts of interest and seeks to promote sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile and instrument of incorporation of the ICAV nor impair compliance with the Management Company's duty to act in the best interest of the ICAV.

The remuneration policy, which describes how remuneration and benefits are determined, is available at https://www.hsbc.lu, or on request from the Management Company .

Total amount of remuneration paid by the Management Company to its staff during the financial year ending 31 December 2025 is as follows:

Fixed remuneration USD 2,341,155
Variable remuneration USD 363,975
Number of beneficiaries 22
of which, the fixed and variable remuneration of senior management and of identified staff* of the investment advisers is:
Fixed remuneration USD 982,777
Variable remuneration USD 183,357
Number of beneficiaries 6

The annual review of the remuneration policy, including a review of the existing remuneration structure as well as implementation of the regulatory requirements and compliance with them, was completed during the year and no irregularities were identified. Furthermore, there were no material changes made to the remuneration policy in the past financial year.

Neither the Management Company nor the ICAV pay any remuneration to the identified staff of any delegate.

**Identified staff are defined as members of staff whose actions have a material impact on the risk profile of the ICAV*

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Digital Leaders Equity Fund

Legal Entity Identifier: 213800RMAGIR1VIGGN65

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 82.25% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Fund promoted climate-responsible economic growth and the transition to a lower-carbon economy through its investment in companies linked to digital transformation. Digital transformation for these purposes means the integration of digital technology into companies, through the utilization of data and analytics, that results in a fundamental change in how the company operates.

The Investment Manager applied a sustainability framework to evaluate the alignment of prospective investee companies with the characteristics, incorporating both quantitative and qualitative analysis based on three key themes:

- Low Carbon Infrastructure - companies that not only provided infrastructure to cloud enablers but also continued to innovate to reduce power consumption with future products.

- Data Stewardship - the security and privacy of customer data and the promotion of operational efficiency which drove a reduction in carbon emissions.
- Transitioned Tech Disruptors- companies that have already transitioned their business activities and utilize more efficient platforms, driving uptake across their segment and therefore improving its sustainability characteristics.

The Sub-Fund did not use a reference benchmark to attain its environmental and/or social characteristics.

The performance of the sustainability indicators the Sub-Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data was based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Reference Benchmark
Proportion of the Sub-Fund's investments meeting minimum ESG standards, determined as those investments meeting minimum ESG and E, and S and G scores set by the Investment Manager, which is expected to be over 80%	87.45%	NA
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	82.97	131.28
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	2.70%	1.35%
The proportion of the Sub-Fund invested in investee companies that have 20% or more of their revenue generated by activities across one or more of the three segments described above (Low Carbon Infrastructure, Data Stewardship and Transitioned Tech Disruptors) within the sustainable framework	87.45%	NA
Excluded Activities		
	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosure	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI All Country World Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Reference Benchmark

Proportion of the Sub-Fund's investments meeting minimum ESG standards, determined as those investments meeting minimum ESG and E, and S and G scores set by the Investment Manager, which is expected to be over 80%	31 December 2025 31 December 2024	87.45% NA	NA NA
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025 31 December 2024	82.97 44.72	131.28 114.43
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025 31 December 2024	2.70% 0.03%	1.35% 1.25%
The proportion of the Sub-Fund invested in investee companies that have 20% or more of their revenue generated by activities across one or more of the three segments described above (Low Carbon Infrastructure, Data Stewardship and Transitioned Tech Disruptors) within the sustainable framework	31 December 2025 31 December 2024	87.45% 90.09%	NA NA
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025 31 December 2024	0.00% 0.00%	0.21% 0.21%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI All Country World Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs");
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment..

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs at group level as part of its stewardship process and companies that were identified for severe violations or worst in class performers on certain PAIs were subject to further dialogue and ESG due diligence. Certain PAIs were considered through exclusions - including for example controversial weapons and UNGC violations. Potential UNGC violations were identified by a third-party controversies-based research service.

The Sub-Fund also considered the following PAIs:
• Thermal coal extraction and generation (PAI 4).
• Companies with involved in the production of controversial weapons (PAI 14).
• Companies involved in controversies related to the United Nations Global Compact ("UNGC") Principles and companies at risk of contributing to severe or systemic and/or systematic violations of international norms and standards relating to UNGC Principles 7, 8, 9 (PAI 10).

Principal Adverse Impact	Period Ending	Sub-Fund	Reference Benchmark
4. Exposure to companies active in the fossil fuel sector	31 December 2025	0.00%	0.00%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	2.70%	1.35%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.21%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI All Country World Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd. Sponsored ADR	Information Technology	6.53%	Taiwan
NVIDIA Corporation	Information Technology	6.30%	United States of America
Broadcom Inc.	Information Technology	5.30%	United States of America
Microsoft Corporation	Information Technology	5.05%	United States of America
SK hynix Inc. Sponsored GDR	Information Technology	4.01%	Korea
Amazon.com, Inc.	Consumer Discretionary	3.96%	United States of America
Palo Alto Networks, Inc.	Information Technology	3.73%	United States of America
Alibaba Group Holding Limited Sponsored ADR	Consumer Discretionary	3.67%	China
SAP SE	Information Technology	3.56%	Germany
Arista Networks, Inc.	Information Technology	3.49%	United States of America
Shibaura Mechatronics Corp.	Information Technology	3.17%	Japan
Oracle Corporation	Information Technology	3.00%	United States of America

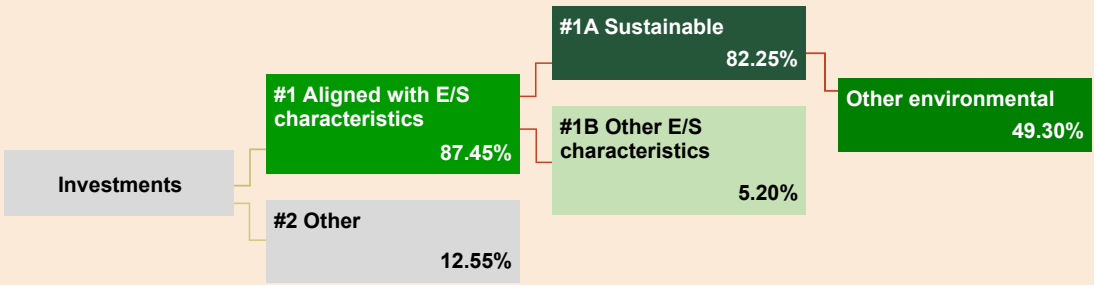
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

82.25% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	79.91%
Consumer Discretionary	9.61%
Communication Services	5.67%
Industrials	2.90%
Cash & Derivatives	1.91%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

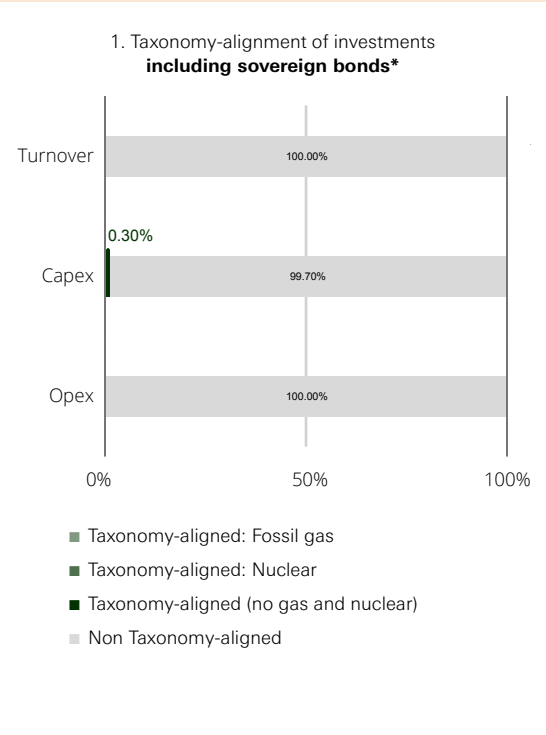
☐ In fossil gas ☐ In nuclear energy

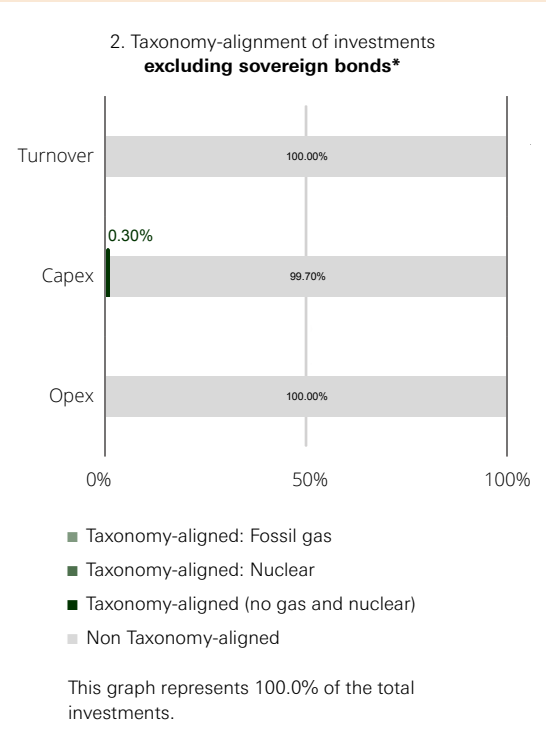
☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.30%	0.54%
CAPEX - Non Taxonomy-aligned	99.70%	99.46%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 49.30%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash, Eligible Collective Investment schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund achieved its investment objective by using a bottom-up approach focusing on investing, in companies that were investing in digitally transforming their businesses from the Low Carbon Infrastructure, Data Stewardship and Transitioned Tech Disruptors segments. At least 80% of underlying investment holdings had a minimum of 20% revenues related to digital transformation products & services.

The Sub-Fund aimed to provide long term total return by investing in a concentrated portfolio of equities and equity-related securities of companies worldwide that were enablers or beneficiaries of digital transformation, while promoting ESG characteristics within the meaning of Article 8 of the European Union's SFDR.

To achieve this, the Investment Manager first identified companies that existed within the Low Carbon Infrastructure, Data Stewardship and Transitioned Tech Disruptors segments. The Investment Manager then used proprietary analytics to identify long term growth trends across the segments to develop long-term thematic convictions and a broader asset allocation framework, which were used by the Investment Manager to assist in the selection of investments, constructing the portfolio of the Sub-Fund, and determining asset allocation and weightings across sectors and sub-sectors.

The Sub-Fund had a minimum proportion of investments that meet ESG score standards, as well as individual pillar score standards, being environmental ('E'), social ('S') and governance ('G') scores. The standards that the Investment Manager set for each of the scores was dependent on several factors, including which score is considered (i.e. ESG, E, S or G score) and the data provider for the score being considered.
The Investment Manager considered companies that do not meet these standards to have poor management of ESG, E or S or G risks and opportunities in comparison to their peers. These companies were therefore not included in the proportion of investments that promote environmental and social characteristics of the Sub-Fund.

The Sub-Fund also employed a range of business exclusions. Companies involved in the following were excluded:
- Non-compliance with UNGC principles and the OECD Guidelines for Multinational Enterprises.
- - Banned Weapons
- Controversial Weapons
- Tobacco
- Thermal Coal – extraction and generation

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

The Sub-Fund did not have a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

  Not applicable.

- ***How did this financial product perform compared with the broad market index?***

  Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Euro Lower Carbon Government 10+ Year Bond UCITS ETF

Legal Entity Identifier: 213800TORKS5FGNSV737

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 99.37% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the Bloomberg Euro Treasury 10+ Year Carbon Tilted Index (the "Index"), the Sub-Fund met the environmental and/or social characteristics through the following measures:

Supporting the transition to a lower carbon economy by an improvement in the carbon emissions profile against that of the Bloomberg Euro Aggregate Treasury 10+ Year Index (the "Parent Index").

The Sub-Fund sought to achieve the promotion of the characteristics by tracking the performance of the Index, which applied a carbon tilt towards countries with lower carbon per capita levels relative to the Parent Index. The index applied carbon tilts to achieve an improved carbon profile versus the Parent Index, in addition to limiting overexposure to small markets with limited liquidity. The carbon tilt factors were constructed for each country/region, independent of any index universe, using a logistic function. The function takes into account the "intensity score per capita", a score ranging from 0-10, derived from normalising the carbon per capita levels. The carbon tilt factors were used to define the final index weights.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Broad Market Index
CO2 per Capita	4.97	5.46

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 10+ Year Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Broad Market Index
CO2 per Capita	31 December 2025	4.97	5.46
	31 December 2024	5.08	5.54

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 10+ Year Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives:
- Supporting progress towards the United Nations Sustainable Development Goals ("UN SDGs"); and/or
- Positive contribution to climate change mitigation.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sovereign issuer's positive contribution was determined by meeting one of the following criteria:

- SDG performance: countries assessed as best-in-class based on their performance against the UN SDGs (using the SDG Index and an income-adjusted best-in-class approach); or
- Climate change mitigation: countries assessed as best-in-class based on their positive contribution to climate change mitigation (using Carbon4 Finance methodology and indicators).

The Sub-Fund did not commit to making sustainable investments. However, because it seeks to replicate the performance of the Index, it gained exposure to investments that qualify as sustainable investments and that contributed to the sustainable objectives described above.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index applied a carbon tilt, designed to reduce exposure to GHG intensity (PAI 15) of investee countries and ultimately reduce fossil fuel exposure.

No optional indicators were taken into account.

Principal Adverse Impact	Period Ending	Sub-Fund	Broad Market Index
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 December 2025	106.68	110.91

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 10+ Year Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Government Of France 4.5% 25-apr-2041	Government	3.73%	France
Government Of France 1.25% 25-may-2038	Government	3.67%	France
Government Of France 3.25% 25-may-2045	Government	3.00%	France
Government Of France 4.0% 25-oct-2038	Government	2.58%	France
Government Of France 3.0% 25-may-2054	Government	2.48%	France
Government Of Spain 4.2% 31-jan-2037	Government	2.41%	Spain
Government Of France 1.5% 25-may-2050	Government	2.23%	France
Government Of France 2.5% 25-may-2043	Government	2.15%	France
Government Of Italy 4.05% 30-oct-2037	Government	2.12%	Italy
Government Of Germany 2.5% 04-jul-2044	Government	2.11%	Germany
Government Of France 3.0% 25-jun-2049	Government	2.09%	France
Government Of France 3.25% 25-may-2055	Government	2.06%	France
Government Of Italy 4.0% 01-feb-2037	Government	2.03%	Italy
Government Of Spain 5.15% 31-oct-2044	Government	1.94%	Spain
Government Of France 1.25% 25-may-2036	Government	1.92%	France

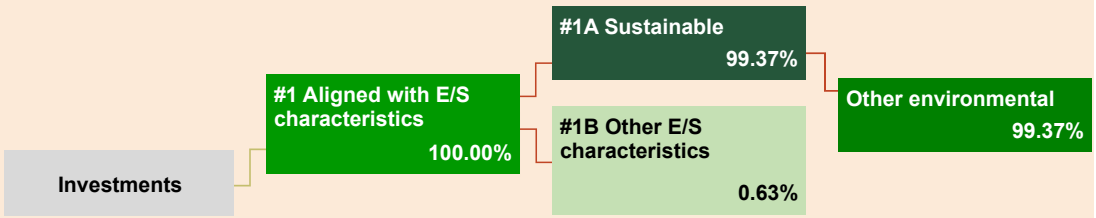
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

99.37% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Government	99.76%
Other	0.31%
Cash & Derivatives	-0.07%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments aligned with the EU Taxonomy

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

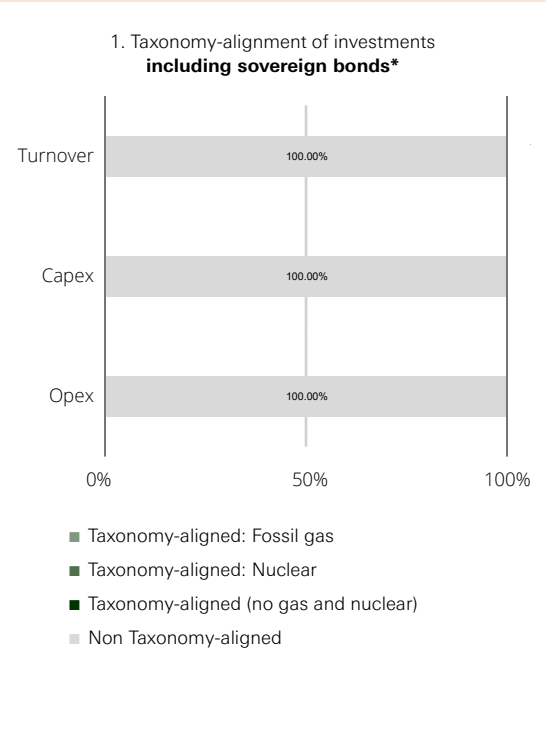
☐ In fossil gas ☐ In nuclear energy

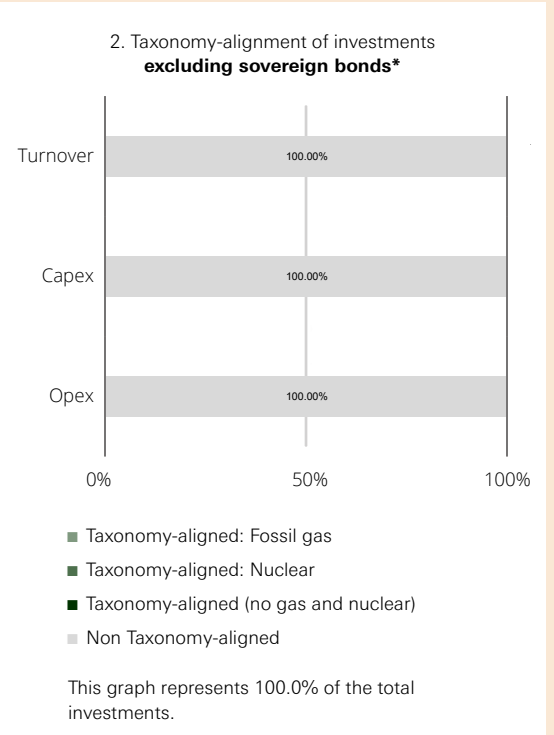
☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 99.37%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was passively managed and aimed to track the performance of the Index while minimising as far as possible the tracking error between the Sub-Fund's performance and that of the Index and promoting environmental and social characteristics within the meaning of Article 8 of SFDR. The Sub-Fund used optimisation techniques which consider tracking error, trading costs and availability of Index constituents when constructing the portfolio. Further detail on Optimisation is set out in the Section "Investment Techniques" in the Prospectus.

The Index applied a carbon tilt towards countries with lower carbon per capita levels relative to the Parent Index. The index applied carbon tilts to achieve an improved carbon profile versus the parent, in addition to limiting overexposure to small markets with limited liquidity. The carbon tilt factors were constructed for each country/region, independent of any index universe, using a logistic function. The function takes into account the "intensity score per capita" for each country, a score ranging from 0-10, derived from normalising the carbon per capita levels. The carbon tilt factors were used to define the final index weights.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Sub-Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index consists of fixed-rate, investment-grade sovereign debt from member states of the European Union that also participate in the European Monetary Union. The Index only includes securities with maturities between 10+ years. The Index seeks to achieve an improvement in carbon emissions against that of the Bloomberg Euro Aggregate Treasury 10+ Year Index (the "Parent Index"). The currency of the Index is EUR and returns are unhedged. The Index is measured by total return, is market value weighted and rebalanced monthly.

The Index is based on the Bloomberg Index Methodology which applies an eligibility criterion based on a set of fundamental core design principles (namely securities that are representative of the market, replicable, relevant, objective and transparent) which are designed to accurately and comprehensively measure the underlying Index constituents. The Index is priced daily, except on market holidays, using Bloomberg's evaluated pricing service, BVAL, with certain securities priced by third party sources.

The index also applies a carbon tilt towards countries with lower carbon per capita levels relative to the Parent Index. The index applies carbon tilts to achieve an improved carbon profile versus the parent, in addition to limiting overexposure to small markets with limited liquidity. The carbon tilt factors are constructed for each country/region, independent of any index universe, using a logistic function. The function takes into account the "intensity score per capita" for each country, a score ranging from 0-10, derived from normalising the carbon per capita levels. The carbon tilt factors are used to define the final index weights.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Sub-Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Sub-Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Sub-Fund	Reference Benchmark
CO2 per Capita	4.97	4.97

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - Bloomberg Euro Treasury 10+ Year Carbon Tilted Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Sub-Fund	Broad Market Index
CO2 per Capita	4.97	5.46

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 10+ Year Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Euro Lower Carbon Government 1-3 Year Bond UCITS ETF

Legal Entity Identifier: 2138004OYP95IK2SE741

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 99.49% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In tracking the performance of the Bloomberg Euro Treasury 1-3 Year Carbon Tilted Index (the "Index"), the Sub-Fund met the environmental and/or social characteristics through the following measures:
Supporting the transition to a lower carbon economy by an improvement in the carbon emissions profile against that of the Bloomberg Euro Aggregate Treasury 1-3 Year Index (the "Parent Index").

The Sub-Fund sought to achieve the promotion of the characteristics by tracking the performance of the Index, which applied a carbon tilt towards countries with lower carbon per capita levels relative to the Parent Index. The index applied carbon tilts to achieve an improved carbon profile versus the Parent Index, in addition to limiting overexposure to small markets with limited liquidity. The carbon tilt factors were constructed for each country/region, independent of any index universe, using a logistic function. The function took into account the "intensity score per capita", a score ranging from 0-10, derived from normalising the carbon per capita levels. The carbon tilt factors were used to define the final index weights.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Sub-Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Sub-Fund can be seen in the table below. The sustainability indicator was calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Broad Market Index
CO2 per Capita	4.97	5.46

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 1-3 Year Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Broad Market Index
CO2 per Capita	31 December 2025	4.97	5.46
	31 December 2024	5.05	5.48

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 1-3 Year Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives:
- Supporting progress towards the United Nations Sustainable Development Goals ("UN SDGs"); and/or
- Positive contribution to climate change mitigation.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sovereign issuer's positive contribution was determined by meeting one of the following criteria:

- SDG performance: countries assessed as best-in-class based on their performance against the UN SDGs (using the SDG Index and an income-adjusted best-in-class approach); or
- Climate change mitigation: countries assessed as best-in-class based on their positive contribution to climate change mitigation (using Carbon4 Finance methodology and indicators).

The Sub-Fund did not commit to making sustainable investments. However, because it seeks to replicate the performance of the Index, it gained exposure to investments that qualify as sustainable investments and that contributed to the sustainable objectives described above.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index applied a carbon tilt, designed to reduce exposure to GHG intensity (PAI 15) of investee countries and ultimately reduce fossil fuel exposure.

No optional indicators were taken into account.

Principal Adverse Impact	Period Ending	Sub-Fund	Broad Market Index
15. GHG intensity - Metric in kilo tons per unit of GDP (in millions of Euros)	31 December 2025	112.37	116.01

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 1-3 Year Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Government Of France 2.75% 25-oct-2027	Government	5.64%	France
Government Of France 0.75% 25-may-2028	Government	5.33%	France
Government Of France 0.75% 25-feb-2028	Government	4.15%	France
Government Of France 2.5% 24-sep-2027	Government	3.99%	France
Government Of France 1.0% 25-may-2027	Government	3.83%	France
Government Of France 0.0% 25-feb-2027	Government	3.19%	France
Government Of France 2.4% 24-sep-2028	Government	2.25%	France
Government Of France 0.25% 25-nov-2026	Government	2.15%	France
Government Of Spain 1.45% 31-oct-2027	Government	2.13%	Spain
Government Of Spain 1.4% 30-apr-2028	Government	2.06%	Spain
Government Of Spain 1.5% 30-apr-2027	Government	2.03%	Spain
Government Of Spain 0.0% 31-jan-2028	Government	2.01%	Spain

Government Of Italy 2.2% 01-jun-2027	Government	1.73%	Italy
Government Of Italy 3.45% 15-jul-2027	Government	1.68%	Italy

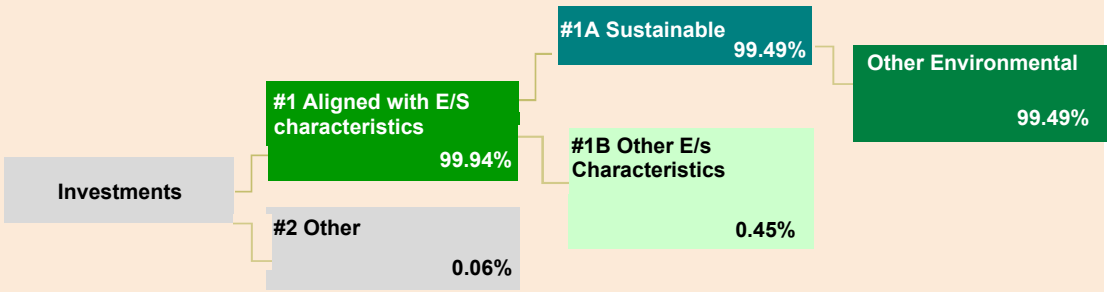
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

99.49% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Government	99.78%
Other	0.25%
Cash & Derivatives	-0.03%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

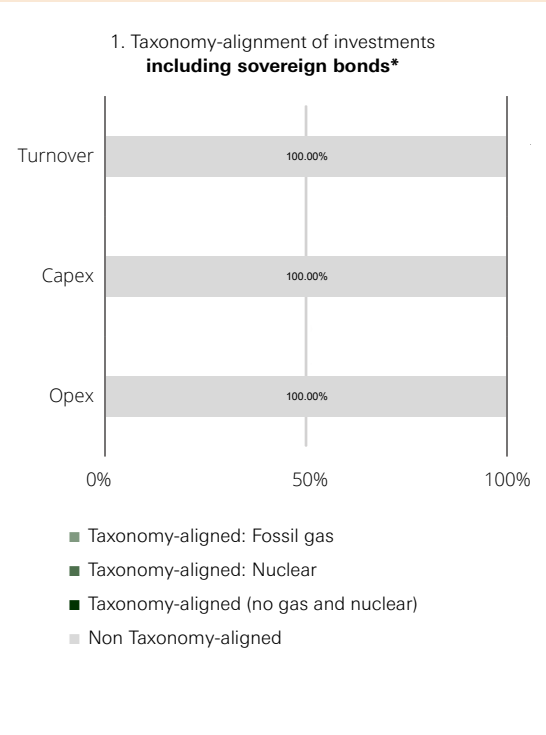
☐ In fossil gas ☐ In nuclear energy

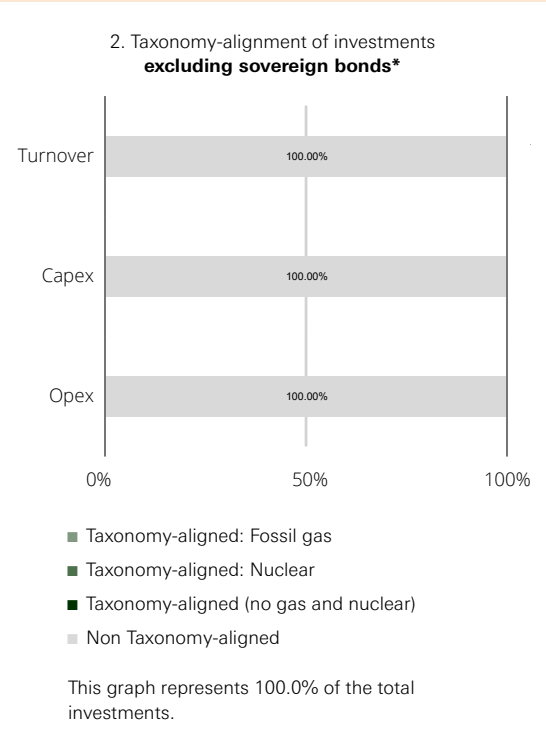
☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 99.49%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was passively managed and aimed to track the performance of the Index while minimising as far as possible the tracking error between the Sub-Fund's performance and that of the Index and promoting environmental and social characteristics within the meaning of Article 8 of SFDR. The Sub-Fund used optimisation techniques which considered tracking error, trading costs and availability of Index constituents when constructing the portfolio. Further detail on Optimisation is set out in the Section "Investment Techniques" in the Prospectus. The Index sought to achieve an improvement in carbon emissions against that of the Parent Index.
The Index applied a carbon tilt towards countries with lower carbon per capita levels relative to the Parent Index. The index applied carbon tilts to achieve an improved carbon profile versus the parent, in addition to limiting overexposure to small markets with limited liquidity. The carbon tilt factors were constructed for each country/region, independent of any index universe, using a logistic function. The function takes into account the "intensity score per capita" for each country, a score ranging from 0-10, derived from normalising the carbon per capita levels. The carbon tilt factors were used to define the final index weights.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index consists of fixed-rate, investment-grade sovereign debt from member states of the European Union that also participate in the European Monetary Union. The Index only includes securities with maturities between 1-3 years. The Index seeks to achieve an improvement in carbon emissions against that of the Parent Index). The currency of the Index is EUR and returns are unhedged. The Index is measured by total return, is market value weighted and rebalanced monthly.

The Index is based on the Bloomberg Index Methodology which applies an eligibility criterion based on a set of fundamental core design principles (namely securities that are representative of the market, replicable, relevant, objective and transparent) which are designed to accurately and comprehensively measure the underlying Index constituents. The Index is priced daily, except on market holidays, using Bloomberg's evaluated pricing service, BVAL, with certain securities priced by third party sources.

The index also applies a carbon tilt towards countries with lower carbon per capita levels relative to the Parent Index. The index applies carbon tilts to achieve an improved carbon profile versus the parent, in addition to limiting overexposure to small markets with limited liquidity. The carbon tilt factors are constructed for each country/region, independent of any index universe, using a logistic function. The function takes into account the "intensity score per capita" for each country, a score ranging from 0-10, derived from normalising the carbon per capita levels. The carbon tilt factors are used to define the final index weights.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the perfromance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Sub-Fund	Reference Benchmark
CO2 per Capita	4.97	4.97

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - Bloomberg Euro Treasury 1-3 Year Carbon Tilted Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Sub-Fund	Broad Market Index
CO2 per Capita	4.97	5.46

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Euro Aggregate Treasury 1-3 Year Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Global Aggregate Bond ESG UCITS ETF

Legal Entity Identifier: 213800TUA2ICCVTAXY10

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

Yes	No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 43.41% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Bloomberg MSCI Global Aggregate SRI Carbon ESG-Weighted Select Index (the "Index"), the Sub-Fund met the environmental and social characteristics through the following measures:

- excluding issuers based on sustainability exclusionary criteria and weighting issuers to improve the exposure to those with favourable MSCI ESG ratings;

- weighting issuers to improve the exposure to those with favourable MSCI Government ESG scores; and

- excluding issuers with carbon intensity above limits set by the Index provider.

The Sub-Fund sought to achieve the promotion of the characteristics by tracking the performance of the Index, of which certain sub-sectors used MSCI Government ESG scores to tilt country allocations above or below their market value weights in the Parent Index.

Additionally, certain sub-sectors applied the following criteria: business involvement screens and a screen to remove companies involved in one or more very severe ongoing controversies, as defined by MSCI ESG controversies methodology, as well as best-in-class screening using MSCI's ESG rating, and applying a carbon intensity screen, before being weighted by a fixed multiplier according to its MSCI ESG rating.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Sub-Fund. The performance of the sustainability indicators the Sub-Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors. The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Broad Market Index
ESG score (third-party score)	6.97	6.02
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	34.91	176.40

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	6.97	6.02
	31 December 2024	7.06	5.88
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	34.91	176.40
	31 December 2024	13.67	84.19

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate Index

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs");
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity; and
- Supporting environmentally and/or socially sustainable initiatives using the proceeds of bond issuance.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities; and
- Issuers whereby the proceeds of the bond issuance were determined to contribute to a sustainable objective by the Investment Manager's Green, Social and Sustainable bond framework. The issuances were required to have external assurance and met certain repoprting requirements to confirm the validity of the proceeds and their use.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The eligible universe of constituents applied business involvement exclusions in the credit bucket on thermal coal extraction and generation (PAI 4). Tobacco and controversial weapons (PAI 14) were removed. Also excluded were companies involved in controversies related to the UNGC Principles and companies at risk of contributing to severe or systemic and/or systematic violations of international norms and standards relating to UNGC Principles 7, 8, 9 (PAI 10). The Index is also designed to reduce exposure to carbon intensity at scope 1 and2 levels (PAI 1) and ultimately reduce fossil fuel exposure (PAI 2,4).

Principal Adverse Impact	Period Ending	Sub-Fund	Broad Market Index

1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	155.01	636,221.98
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	12.90	54.27
4. Exposure to companies active in the fossil fuel sector	31 December 2025	0.92%	0.01%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.43%	0.36%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.06%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Government Of The United States Of America 0.0% 06-aug-2026	Government	1.05%	United States of America
Government Of The United States Of America 0.0% 14-aug-2025	Government	0.57%	United States of America
Government Of Germany 2.2% 13-apr-2028	Government	0.54%	Germany
FNCL 6.5 1/26 12029177	Financials	0.47%	United States of America
Government Of Australia 2.75% 21-nov-2027	Government	0.47%	Australia
FNCL 6.5 7/25 11921057	Other	0.44%	United States of America
FNCL 6.5 10/25 11972544	Other	0.42%	United States of America
Government Of Germany 0.0% 15-nov-2027	Government	0.41%	Germany

Government Of Germany 0.0% 15-aug-2029	Government	0.33%	Germany

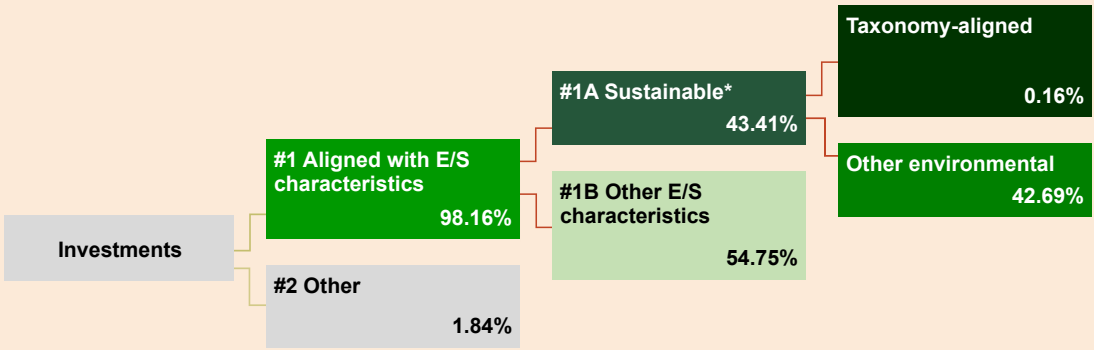
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

43.41% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Government	64.80%
Financials	31.23%
Other	3.90%
Health Care	2.55%
Communication Services	1.70%
Industrials	1.42%
Consumer Discretionary	1.18%
Information Technology	1.18%
Utilities	0.82%
Electric Utilities	*0.34%*
Multi-Utilities	*0.06%*
[Unassigned]	*0.14%*
Materials	0.37%
Real Estate	0.23%
Consumer Staples	0.18%
Cash & Derivatives	-9.54%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.16% of the Sub-Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

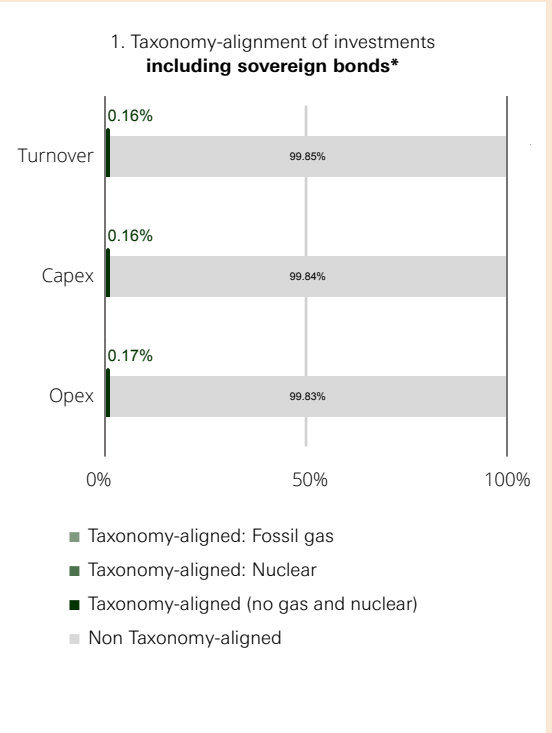
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

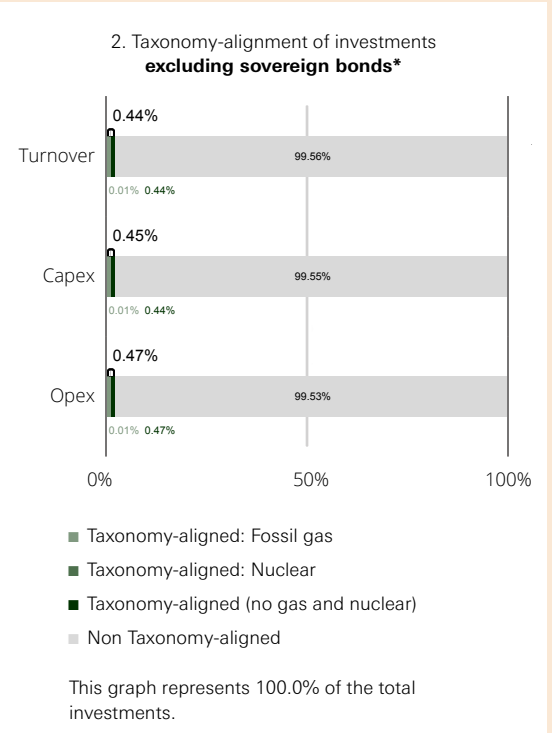
- [x] Yes:
  - [x] In fossil gas
  - [ ] In nuclear energy
- [ ] No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.11%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.15%	0.36%
Revenue - Non Taxonomy-aligned	99.85%	99.64%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.01%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.16%	0.36%
CAPEX - Non Taxonomy-aligned	99.84%	99.63%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.16%	0.40%
OPEX - Non Taxonomy-aligned	99.83%	99.59%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 42.69%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Bonds with a Credit Rating of Ba1 / BB+ / BB+ and below and which may be callable, cash and money market instruments including bills, commercial paper and certificates of deposits for ancillary liquidity purposes, and units or shares of CIS may have been used for hedging, EPM and cash management purposes in respect of which there were no minimum environmental and/or social safeguards. Securitized assets, such as Mortgage-Backed Securities, Asset-Backed Securities and Commercial Mortgage-Backed Securities may have been held, in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was passively managed and aimed to track the performance of the Index while minimising as far as possible the tracking error between the Sub-Fund's performance and that of the Index and promoting ESG characteristics within the meaning of Article 8 of SFDR. The Sub-Fund used optimisation techniques which take account of tracking error and trading costs when constructing a portfolio.

The Sub-Fund invested in bonds (i) government/agency/supranational bonds (developed and emerging markets) which did not embed a derivative and/or leverage; and (ii) corporate Investment Grade bonds, corporate emerging market bonds, asset backed securities ("ABS"), mortgage backed securities ("MBS"), commercial mortgage backed securities ("CMBS") and covered bonds all of which may have been callable. The financial derivative instruments ("FDIs") which the Sub-Fund may have used were financial futures, foreign exchange contracts (including currency swaps, spot, and forward contracts) and credit default swaps.

The Sub-Fund did not invest more than 10% of its net assets in CIS which may have included units or shares of CIS that were managed directly or indirectly by the Investment Manager. The Sub-Fund may have invested in the units or shares of CIS which mainly invest in securities included in the Index to gain indirect exposure to such securities.

The Index measured the performance of Global Investment Grade debt from a number of local currency markets, across three groups of bonds. The currency of the Index was USD and returns were hedged to that currency. The Index was measured by total return and is rebalanced monthly.

The Index grouped each bond issuance into the following three buckets:
1. Sub-sector 1: Treasuries, Sovereigns and Local Authorities;
2. Sub-sector 2: Corporates, Agencies, Supranational and Covered bonds; and
3. Sub-sector 3: MBS, ABS and CMBS

The Index was sub-sector neutral to the Parent Index, which means that the sub-sector weights of the Index were adjusted to match the market value weights of the three sub-sectors of the Parent Index and no screens or tilting were applied to the securitised bucket.

The sub-sector 1 included investment grade, fixed rate, securities issued by treasury, sovereign and local authority issuers from both developed and emerging markets issuers and used a 'market size aware' ESG tilting approach to tilt country allocations above or below their market value weights on a monthly basis.

The weight of each Index-eligible constituent was adjusted by a fixed multiplier which was determined by the market value weight the issuing country held within the Parent Index along with its MSCI ESG Government Score (0-10) and their country of risk size grouping. The MSCI ESG Government Scores were determined based on an assessment of a country's exposure to and management of ESG risks. Efficiency of resource utilisation, performance on socio-economic factors, financial management, corruption control, political stability and other factors defined the parameters for measuring a countries ESG risk management.

The sub-sector 2 of the Index removed securities based on sustainability exclusionary criteria, on a monthly basis, applying the following Business Involvement Screens:

- Adult Entertainment;
- Alcohol;
- Gambling;
- Tobacco;
- Controversial Weapons;
- Conventional Weapons;
- Civilian firearms;
- Nuclear Weapons;
- Nuclear Power;
- Fossil fuels;
- Thermal Coal Extraction, Generation & Distribution;
- Non-compliance with UN Global Compact Principles;

- Genetically Modified Organisms; and
- MSCI Controversies Score.

The Index then applied a best-in-class screen to the sub-sector 2 using MSCI ESG ratings, excluding any constituent with the following:

- issuers with an MSCI ESG rating of lower than BB; and
- issuers with an ESG Pillar Score of less than 2.

A carbon intensity screen was then applied to the sub-sector 2, and issuers with Scope 1 and 2 carbon intensity of 750mn t/USD million sales or higher were excluded.

The weights of the remaining eligible issuers in sub-sector 2 were adjusted by a fixed multiplier, based on their MSCI ESG Rating.

Finally, 2% capping was applied at issuer level in sub-sector 2, and the Index was sub-sector neutral to the Parent Index as described above.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Sub-Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index was sub-sector neutral to the Parent Index, which means that the sub-sector weights of the Index were adjusted to match the market value weights of the three sub-sectors of the Parent Index and no screens or tilting were applied to the securitised bucket.

The sub-sector 1 included investment grade, fixed rate, securities issued by treasury, sovereign and local authority issuers from both developed and emerging markets issuers and used a 'market size aware' ESG tilting approach to tilt country allocations above or below their market value weights on a monthly basis.

The weight of each Index-eligible constituent was adjusted by a fixed multiplier which was determined by the market value weight the issuing country held within the Parent Index along with its MSCI ESG Government Score (0-10) and their country of risk size grouping. The MSCI ESG Government Scores were determined based on an assessment of a country's exposure to and management of ESG risks. Efficiency of resource utilisation, performance on socio-economic factors, financial management, corruption control, political stability and other factors defined the parameters for measuring a countries ESG risk management.

The sub-sector 2 of the Index removed securities based on sustainability exclusionary criteria, on a monthly basis, applying the following Business Involvement Screens:

- Adult Entertainment;
- Alcohol;

- Gambling;
- Tobacco;
- Controversial Weapons;
- Conventional Weapons;
- Civilian firearms;
- Nuclear Weapons;
- Nuclear Power;
- Fossil fuels;
- Thermal Coal Extraction, Generation & Distribution;
- Non-compliance with UN Global Compact Principles;
- Genetically Modified Organisms; and
- MSCI Controversies Score.

The Index then applied a best-in-class screen to the sub-sector 2 using MSCI ESG ratings, excluding any constituent with the following:

- issuers with an MSCI ESG rating of lower than BB; and
- issuers with an ESG Pillar Score of less than 2.

A carbon intensity screen was then applied to the sub-sector 2, and issuers with Scope 1 and 2 carbon intensity of 750mn t/USD million sales or higher were excluded.

The weights of the remaining eligible issuers in sub-sector 2 were adjusted by a fixed multiplier, based on their MSCI ESG Rating.

Finally, 2% capping was applied at issuer level in sub-sector 2, and the Index was sub-sector neutral to the Parent Index as described above.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Sub-Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Sub-Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Sub-Fund	Reference Benchmark
ESG score (third-party score)	6.97	6.90
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	34.91	36.80

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - Bloomberg MSCI Global Aggregate SRI Carbon ESG-Weighted Select

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Sub-Fund	Broad Market Index
ESG score (third-party score)	6.97	6.02
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	34.91	176.40

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Global ESG Government Bond UCITS ETF

Legal Entity Identifier: 213800VD7NNXQHMT9M96

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 67.27% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In tracking the performance of the Bloomberg MSCI Global Treasury ESG Weighted Bond (USD unhedged) Index (the "Index"), the Sub-Fund met the environmental and/or social characteristics through the following measures:

- Management of long term environmental, social and governance related issues that could impact the long-term sustainability of economies as measured by MSCI Government ESG scores. MSCI Government ESG scores provided an opinion of sovereign and sub-sovereign entities' exposure to and management of ESG risks. The ESG risk factors considered by MSCI ESG Government scores ranged across environmental, social and governance pillars and are determined by MSCI. The ESG risks considered related to natural resources, climate change and natural hazards, human capital, economic environment, financial governance and political governance. The Sub-Fund targeted this by improving the MSCI Government ESG score against that of the Bloomberg Global Aggregate Treasury Index (the "Parent Index").

The Sub-Fund sought to achieve the promotion of the characteristics by tracking the performance of the Index which used MSCI ESG sovereign scores to tilt country allocations above or below their market value weights in the Parent Index in order to reduce exposure to countries with high exposure to and/or low management of ESG risks and to improve the exposure to countries with favorable ESG ratings.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Sub-Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Sub-Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Broad Market Index
ESG score (third-party score)	6.57	5.80

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate Treasury Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	6.57	5.80
	31 December 2024	6.65	5.83
	31 December 2023	6.64	5.74

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate Treasury Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives:
- Supporting progress towards the United Nations Sustainable Development Goals ("UN SDGs"); and/or
- Positive contribution to climate change mitigation.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sovereign issuer's positive contribution was determined by meeting one of the following criteria:

- SDG performance: countries assessed as best-in-class based on their performance against the UN SDGs (using the SDG Index and an income-adjusted best-in-class approach); or
- Climate change mitigation: countries assessed as best-in-class based on their positive contribution to climate change mitigation (using Carbon4 Finance methodology and indicators).

The Sub-Fund did not commit to making sustainable investments. However, because it seeks to replicate the performance of the Index, it gained exposure to investments that qualify as sustainable investments and that contributed to the sustainable objectives described above.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third- party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.

HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Bloomberg (BBG) index was constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each country provided MSCI ESG Government Rating scores and rated countries on a seven-point scale from 'AAA' (best) to 'CCC' (worst). Ratings were derived from 0-10 scores on underlying factors in three pillars: Environmental, Social, and Governance. The model contained scores on all these sub-factors to provide granular insight on a country's performance on the issues.

The risk factors included in the assessment of a country's MSCI ESG government rating score were:

1) Environmental risks; Natural resources & Environmental externalities and vulnerability. These risk factors cover how countries effectively managed water use, land use and mineral resources (PAI 5) and impact on environmental externalities (PAI 7,8), it also includes energy resource management and conservation (PAI 1,2)
2) Social Risk; Human Capital and Economic environment.
3) Governance Risk; Financial governance & political governance. The risk factors included politic rights and civil liberties, corruption control and stability and peace (PAI 10) Included are a set of screening factors for each country which shows the profile of a country's status with respect to various values-and mission-based issues and controversies, such as child or forced labour and armed conflicts, and whether the country is a party to international conventions related to endangered species, biological diversity, chemical and biological weapons (PAI 7, 14). The methodology used the ESG Government rating score (as calculated by MSCI) to apply tilt factors to increase weight to those countries with more robust ESG characteristics.

Principal Adverse Impact	Period Ending	Sub-Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	0.00	0.00
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	0.0	0.00
5a. Share of non-renewable energy consumption	31 December 2025	0.00%	0.00%
5b. Share of non-renewable energy production	31 December 2025	0.00%	0.00%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	0.00%	0.00%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.00	0.00
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025. Only PAI 15 and PAI 16 are applicable to sovereign issuers; the other reported PAIs relate solely to corporate issuers. As a result, several PAIs are shown as zero for the Sub-Fund because these indicators are not applicable to sovereign bond holdings. The continued inclusion of these PAIs in the Sub-Fund's reporting will be reviewed ahead of next year's reporting cycle.

Broad Market Index - Bloomberg Global Aggregate Treasury Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Government Of Germany 0.25% 15-feb-2027	Government	0.61%	Germany
Government Of United Kingdom 4.125% 29-jan-2027	Government	0.55%	United Kingdom of Great Britain and Northern Ireland
Government Of Germany 2.6% 15-aug-2033	Government	0.53%	Germany
Government Of United Kingdom 4.5% 07-jun-2028	Government	0.52%	United Kingdom of Great Britain and Northern Ireland
Government Of Germany 0.5% 15-aug-2027	Government	0.49%	Germany
Government Of The United States Of America 3.75% 15-aug-2027	Government	0.49%	United States of America
Government Of The United States Of America 3.25% 30-jun-2027	Government	0.48%	United States of America
Government Of Germany 2.4% 15-nov-2030	Government	0.47%	Germany
Government Of The United States Of America 0.5% 30-apr-2027	Government	0.46%	United States of America
Government Of The United States Of America 3.875% 30-nov-2029	Government	0.46%	United States of America
Government Of The United States Of America 3.875% 30-sep-2029	Government	0.46%	United States of America
Government Of The United States Of America 4.125% 31-oct-2027	Government	0.45%	United States of America
Government Of Germany 0.0% 15-feb-2031	Government	0.44%	Germany
Government Of The United States Of America 2.875% 15-may-2032	Government	0.44%	United States of America
Government Of Germany 2.1% 15-nov-2029	Government	0.43%	Germany

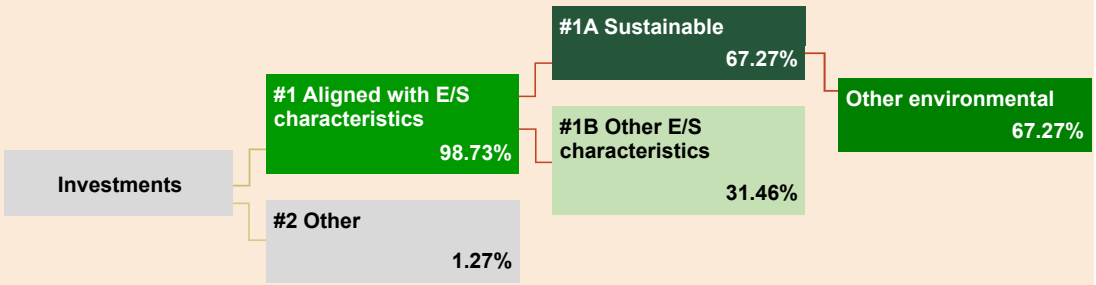
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

67.27% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Government	99.63%
Cash & Derivatives	0.37%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

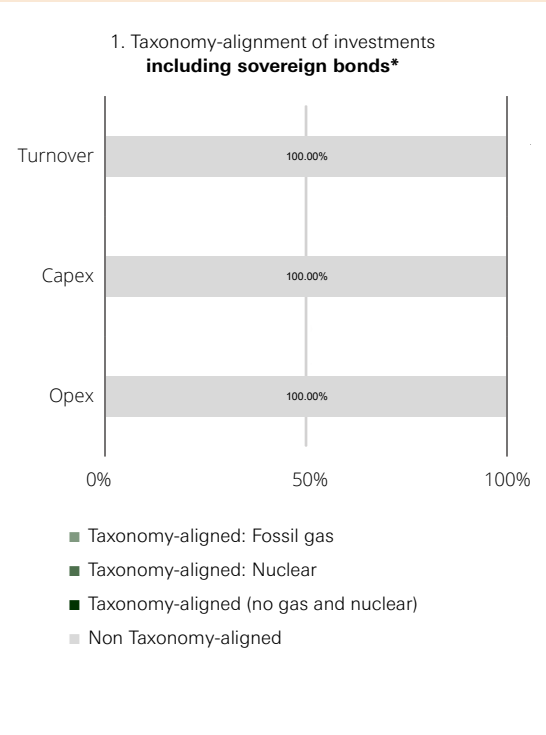
☐ In fossil gas ☐ In nuclear energy

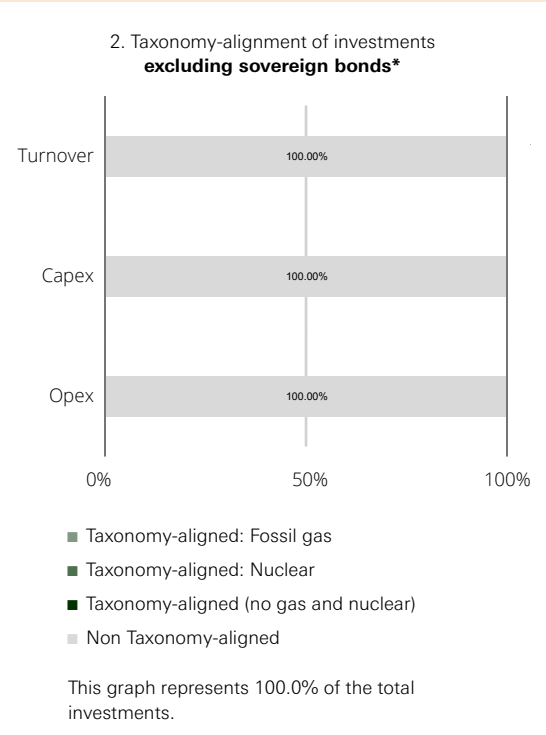
☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 67.27%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments such as currency forwards may have been used for hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was passively managed and aimed to track the performance of the Index while minimising as far as possible the tracking error between the Sub-Fund's performance and that of the Index and promoting ESG characteristics within the meaning of Article 8 of SFDR. The Sub-Fund used optimisation techniques which take account of tracking error and trading costs when constructing a portfolio. The Index measured the performance of investment grade, fixed-rate, taxable securities issued by government and government-related issuers using ESG sovereign scores to tilt country allocations above or below their market value weights in the Bloomberg Global Aggregate Treasury Index. The Index achieved this in the following way: On a monthly basis, the Index used fixed multipliers to adjust the weight of each eligible security in the Index above or below their market value weights in the Parent Index. Security weights were then normalized using these adjusted market values.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Sub-Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index measures the performance of investment grade, fixed-rate, taxable securities issued by government and government-related issuers using MSCI Government ESG scores to tilt country allocations above or below their market value weights in the Bloomberg Global Aggregate Treasury Index. On a monthly basis, the Index used fixed multipliers to adjust the weight of each eligible security in the Index above or below their market value weights in the Parent Index. Security weights were then normalized using these adjusted market values.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Sub-Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Sub-Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Sub-Fund	Reference Benchmark
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.57	6.57

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - Bloomberg MSCI Global Treasury ESG Weighted Bond (USD unhedged) Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Sub-Fund	Broad Market Index
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.57	5.80

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate Treasury Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC GLOBAL FUNDS ICAV - GLOBAL TRANSITION RESOURCES EQUITY FUND

Legal Entity Identifier: 213800B858R29J3H2F57

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 55.67% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Sub-Fund were climate-responsible economic growth and the transition to a lower-carbon economy through investments linked to natural resources companies and services that are critical to enabling a clean energy eco-system and which securities are on a clear and measurable path to social or environmental transition. The means by which the Sub-Fund met the characteristics are set out below.

1) The Sub-Fund identified companies on a clear and measurable climate transition pathway as informed by the Investment Manager's proprietary climate transition assessment to determine a company's progress or commitment towards alignment with "Net Zero" pathways.

2) The Sub-Fund identified companies that were considered to be providing "Green Solutions" through assessemnt of revenues. For example revenues that were linked to technologies, services and tools that mitigated or eliminated or contributed to the removal of Greenhouse gases.
3) Companies were also assessed by the Investment Manager within the 'Leaders' classification for those that were critical to or that enabled the energy transition, specifically resources-related companies that enabled the global energy transition by providing the relevant production, financing, technology and/or equipment, and other companies in the global transition resources value chain . The Investment Manager carried out quantitative and qualitative analysis of prospective investee companies based on three key segments:
• Materials: Key foundation layer that invested in companies that produced transition resources (including critical materials such as copper, aluminum, platinum group metals).
• Enablers: Those companies that processed critical materials (such as green steel, battery components) critical to building the green energy infrastructure.
• Supply Chain: Companies that provided services which disrupted the traditional production process (such as recycling or autonomous mining equipment).

The Sub-Fund also promoted the additional environmental and social characteristics listed below:

4) Better management of environmental and social risks, and where applicable opportunities, related to climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance, and corporate behaviour.

The Sub-Fund met this through investing in a minimum proportion of investments that meet ESG score and individual pillar environmental ("E"), social ("S") and governance ("G") score standards, determined by the Investment Manager.

5) Minimum corporate sustainability standards relating to human rights, labour rights, the environment, anti-corruption and responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") Principles.

Where instances of potential violations of UNGC principles were identified, companies were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the Sub-Fund's portfolio, and if deemed unsuitable, excluded.

6) Minimum requirements relating to exposure to climate-related risk associated with thermal coal activities, health, and weapons related to international norms, standards and regulations. The Sub-Fund promoted these through exclusion of thermal coal, tobacco and controversial and banned weapons, which were activities covered by the Investment Manager's Responsible Investment Policies (the "HSBC Excluded Activities") and the EU Climate Transition Benchmark exclusions (the "CTB Excluded Activities") (together referred to as the "Excluded Activities").

The Sub-Fund did not use a reference benchmark to attain the environmental and/or social characteristics it promoted.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Reference Benchmark
Proportion of investments meeting minimum ESG standards (minimum ESG and E/S/G scores set by the Investment Manager; expected over 80%)	83.17%	NA
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.79%
Proportion invested in companies with ≥20% revenues related to Materials/Enablers/Supply Chain segments (expected over 80%)	83.17%	NA
Companies positively categorised in HSBC AM's proprietary climate transition assessment (Aligned / Aligning / Committed to Aligning)	86.00%	80.21%
Excluded Activities	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosure	

The data in this SFDR Periodic Report is based on applicable four-quarter average holdings of the financial year ending on 31 December 2025 (the Sub-Fund launched in the reference period).

Reference Benchmark - MSCI All Country World Materials

…and compared to previous periods?

This Sub-Fund launched in the reference period, and as such there are no previous periods to compare against.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments made by the Sub-Fund were climate-responsible economic growth and the transition to a lower-carbon economy through investments linked to natural resources companies and services that were critical to enabling a clean energy eco-system.

The sustainable investments contributed to the objectives through the application of the binding elements described below under "What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?".

Following the application of the Excluded Activities to the investment universe, the Investment Manager applied a sustainability framework to evaluate each prospective investee company's environmental characteristics, incorporating both qualitative and quantitative analysis to each segment to identify key material topics (such as supply materials for a net zero future, minimize resource use and environmental footprint, employee welfare, product innovation) to screen coverage companies and assign ranking from 'Leader' to 'Laggard'. Ranking methodology included both qualitative – based on analysis of contribution towards the material issues; and quantitative – derived from
company revenue contribution and MSCI scoring on the material issues.

Companies that then generated >50% of their year-end reported revenues from resources and services that were critical to the clean energy eco-system were then subject to do no significant harm and an additional good governance screen before being considered as sustainable investments by the Investment Manager.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third- party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.

HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered PAIs at group level as part of its stewardship process and companies that were identified for severe violations or worst in class performers on certain PAIs were subject to further dialogue and ESG due diligence.

Certain PAIs were also considered through exclusions - including for example controversial weapons and UNGC violations. Any potential UNGC violations were identified by a third-party controversies-based research service.

The Sub-Fund also considered the following PAIs:
- Thermal coal extraction and generation (PAI 4).
- Companies with involved in the production of controversial weapons (PAI 14).
- Companies involved in controversies related to the United Nations Global Compact

("UNGC") Principles and companies at risk of contributing to severe or systemic and/or systematic violations of international norms and standards relating to UNGC Principles 7, 8, 9 (PAI 10).

Principal Adverse Impact	Period Ending	Sub-Fund	Reference Benchmark
4. Exposure to companies active in the fossil fuel sector	31 December 2025	23.54%	10.00%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	1.79%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.14%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI All Country World Materials

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Linde plc	Materials	7.97%	United States of America
BHP Group Ltd	Materials	5.92%	Australia
Rio Tinto Limited	Materials	5.57%	Australia
CRH public limited company	Materials	5.41%	United States of America
Wheaton Precious Metals Corp	Materials	5.18%	Brazil
Air Liquide SA	Materials	5.17%	France
Anglo American plc	Materials	4.37%	South Africa
Norsk Hydro ASA	Materials	4.32%	Norway
Ecolab Inc.	Materials	3.81%	United States of America
Nippon Sanso Holdings Corporation	Materials	3.42%	Japan

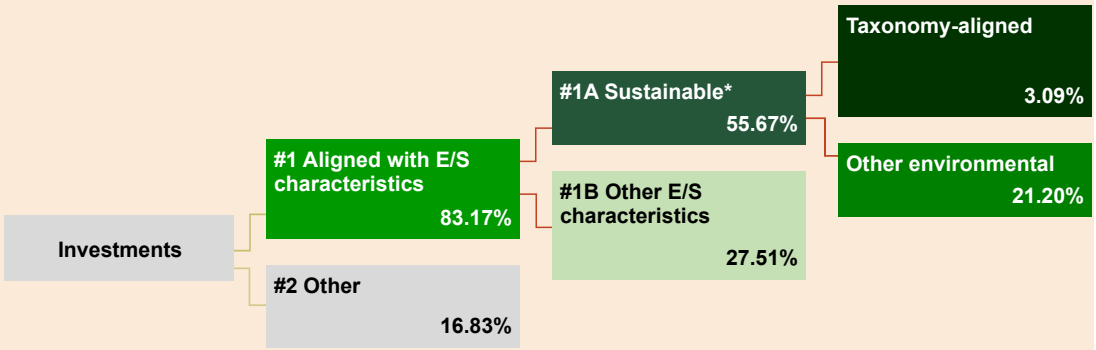
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

55.67% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Materials	87.02%
Industrials	8.70%
Energy	1.70%
Coal & Consumable Fuels	*1.70%*
Other	1.46%
Cash & Derivatives	1.12%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

3.09% of the Sub-Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

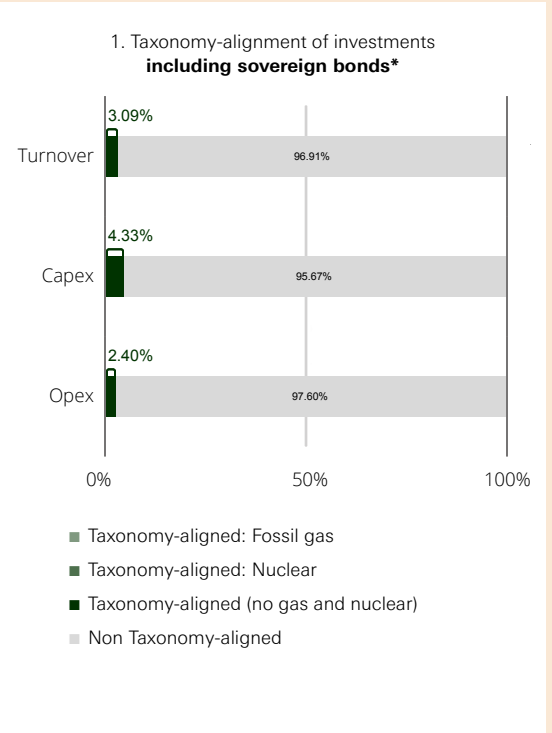
☐ In fossil gas ☐ In nuclear energy

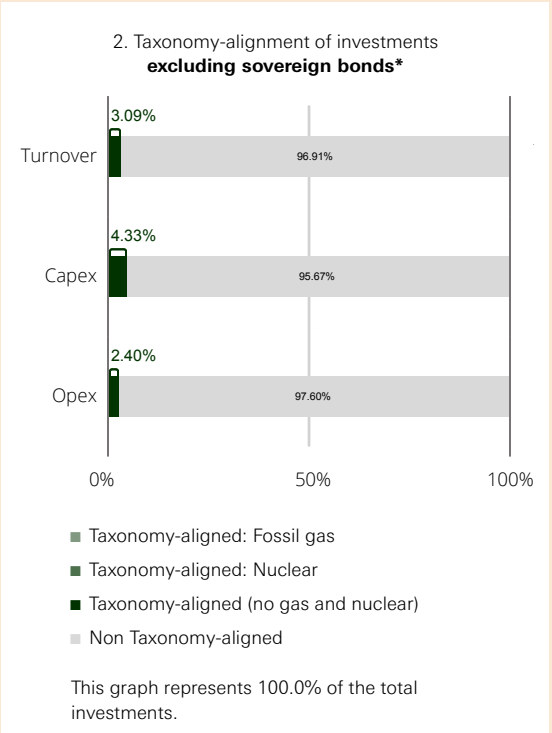
☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.76%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25
Revenue - Taxonomy-aligned: Fossil gas	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	3.09%
Revenue - Non Taxonomy-aligned	96.91%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	4.33%
CAPEX - Non Taxonomy-aligned	95.67%
OPEX - Taxonomy-aligned: Fossil gas	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.40%
OPEX - Non Taxonomy-aligned	97.60%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 21.20%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash, Eligible Collective Investment schemes and/or fnancial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund achieved its investment objective by investing in companies that operated in the following key segments:
• Materials: Key foundation layer that invested in companies producing transition resources (including critical materials such as copper, aluminum, platinum group metals).
• Enablers: Those companies that processed the critical materials (such as green steel, battery components) critical to building the green energy infrastructure.
• Supply Chain: Companies that provided services disrupting the traditional production process (such as recycling or autonomous mining equipment).

At least 80% of underlying investment holdings had a minimum of 20% revenues related to activity across one or more of the three segments described above. The Sub-Fund aimed to provide long-term value by investing in a concentrated portfolio of equities and equity-related securities of companies globally that were enablers of transition resources, while promoting environmental and social characteristics within the meaning of Article 8 of the European Union's SFDR. The remaining portion consisted of cash, eligible collective investment schemes and/or financial derivative instruments which may have been used for liquidity, hedging and efficient portfolio management purposes.

The Sub-Fund had a minimum proportion of investments that met ESG score standards, as well as individual pillar score standards, being environmental ('E'), social ('S') and governance ('G') scores. The standards that the Investment Manager set for each of the scores was dependent on several factors, including which score were considered (i.e. ESG, E, S, or G score) and the data provider for the score considered. The Investment Manager considered companies that did not meet these standards to have poor management of ESG, E or S or G risks and opportunities in comparison to their peers. These companies were
therefore not included in the proportion of investments that promoted environmental and social characteristics of the Sub-Fund.

The Investment Manager defined an investment universe for the Sub-Fund by identifying companies that existed within the Materials, Enablers and Supply Chain segments.

The Sub-Fund did not invest in equities and equity equivalent securities of companies with specified involvement in specific Excluded Activities.

If data was not available in respect of a particular company or the Investment Manager had
cause to consider that the data that was available was inaccurate or outdated, the Investment Manager carried out its own due diligence on the company to determine whether or not it should be excluded.

Following the application of the Excluded Activities to the investment universe, the Investment Manager applied a sustainability framework to evaluate each prospective investee company's environmental characteristics, incorporating both quantitative and qualitative analysis to each segment to identify key material topics (such as supply materials for a net zero future, minimize resource use and environmental footprint, employee welfare, product innovation) to screen coverage companies and assign ranking ranging from 'Leaders' to 'Laggards'.

Ranking methodology included both qualitative – based on analysis of company's contribution towards the material issues; and quantitative – derived from company revenue contribution and MSCI scoring on the material issues. Qualitative components were further evaluated by the Investment Manager's in-depth fundamental research, leveraging internal and third-party resources for every stock.

Following the application of the Excluded Activities and the sustainability framework, the Investment Manager made active thematic selection decisions to construct a diversified portfolio, 100% of which consists of companies which the Investment Manager viewed as 'Leaders' pursuant to the sustainability framework, which included companies the Investment Manager was satisfied are making progress towards the Leaders category. The Investment Manager did not invest in companies viewed as Laggards.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

  Not applicable.

- ***How did this financial product perform compared with the broad market index?***

  Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Small Cap Screened Fund

Legal Entity Identifier: 213800S1DVYDODQ6PT71

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 9.50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

By virtue of investing at least 85% of its net assets in the HSBC MSCI Emerging Markets Small Cap Screened UCITS ETF (the "Master Fund"), the Sub-Fund promoted the same characteristics as the Master Fund, being the investment in companies with an improvement of ESG rating compared to those of the MSCI Emerging Markets Small Cap Index (the "Parent Index"), such that the Master Fund invested in companies with more favourable ESG ratings compared to the Parent Index.

The Master Fund sought to achieve the promotion of these characteristics by replicating the performance of the MSCI Emerging Markets Small Cap Universal Screens Index (the " Master Fund Index"). The improvement of the ESG rating against the Parent Index was achieved by the Master Fund Index through the removal of companies from the Parent Index based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria so as to improve the exposure of the Master Fund Index (and the Master Fund) to companies with more favourable ESG ratings compared to those in the Parent Index.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Sub-Fund.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Broad Market Index
ESG score (third-party score)	5.42	4.76

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Small Cap Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	5.42	4.76
	31 December 2024	5.18	4.59

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Small Cap Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives: - Transition to a lower carbon economy; - Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); - Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity. Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework; - Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

The Sub-Fund did not commit to investing in sustainable investments. However, the Sub-Fund invested in sustainable investments that contributed to the above sustainable objectives, through either investment in underlying funds or direct investments.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third- party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.

HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Master Fund Index was constructed using MSCI proprietary data on each securities business involvement. The Business Involvement Screening Research ("BISR") highlighted each security's involvement or adherence to global sanctions, controversies and global norms (PAI 10, 11), carbon and sustainable impact (positive screening) (PAI 1,2,3).

As per the Master Fund Index methodology, securities involved in thermal coal mining and generation, oil & gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final Master Fund Index was calculated.

In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

Principal Adverse Impact	Period Ending	Sub-Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	4.26	244,995,985.60
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	147.62	218.15
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	324.11	488.46
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.43%	0.81%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	11.51%	11.78%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.34%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Small Cap Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Nanya Technology Corporation	Information Technology	0.91%	Taiwan
Coforge Limited	Information Technology	0.80%	India
Federal Bank Ltd. (India)	Financials	0.77%	India
Samsung Securities Co., Ltd.	Financials	0.72%	Korea
Asseco Poland S.A.	Information Technology	0.68%	Poland
Lojas Renner S.A.	Consumer Discretionary	0.68%	Brazil
Growthpoint Properties Limited	Real Estate	0.66%	South Africa
Mr Price Group Limited	Consumer Discretionary	0.66%	South Africa
Max Financial Services Limited	Financials	0.65%	India
BNK Financial Group, Inc.	Financials	0.57%	Korea
Corporacion Inmobiliaria Vesta S.A.B. de C.V.	Real Estate	0.55%	Mexico
Momentum Group Limited	Financials	0.55%	South Africa
Winbond Electronics Corp.	Information Technology	0.55%	Taiwan
Air Arabia PJSC	Industrials	0.53%	United Arab Emirates
Phison Electronics Corp.	Information Technology	0.52%	Taiwan

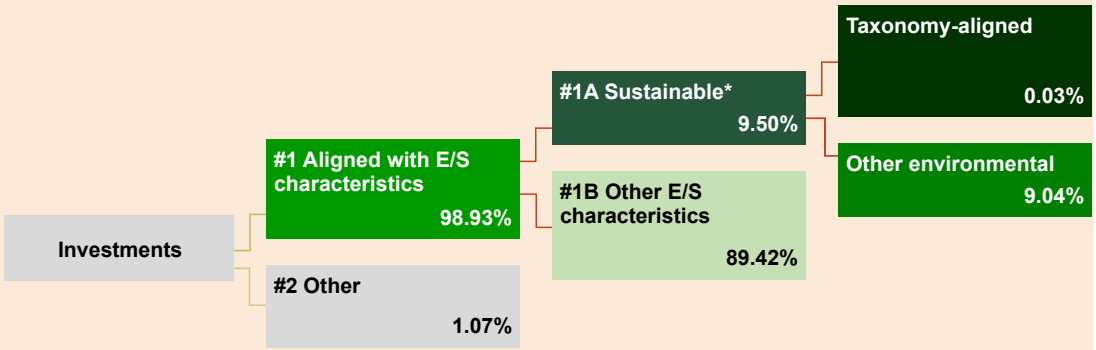
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

9.50% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	21.65%
Health Care	13.39%
Financials	12.67%

Energy	1.79%
Oil & Gas Drilling	*0.07%*
Oil & Gas Equipment & Services	*0.43%*
Oil & Gas Refining & Marketing	*0.68%*
Oil & Gas Storage & Transportation	*0.44%*
Utilities	1.76%
Electric Utilities	*0.28%*
Gas	*0.37%*
Independent Power Producers & Energy Traders	*0.15%*
Multi-Utilities	*0.01%*
Cash & Derivatives	1.07%
Other	0.00%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.03% of the Sub-Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

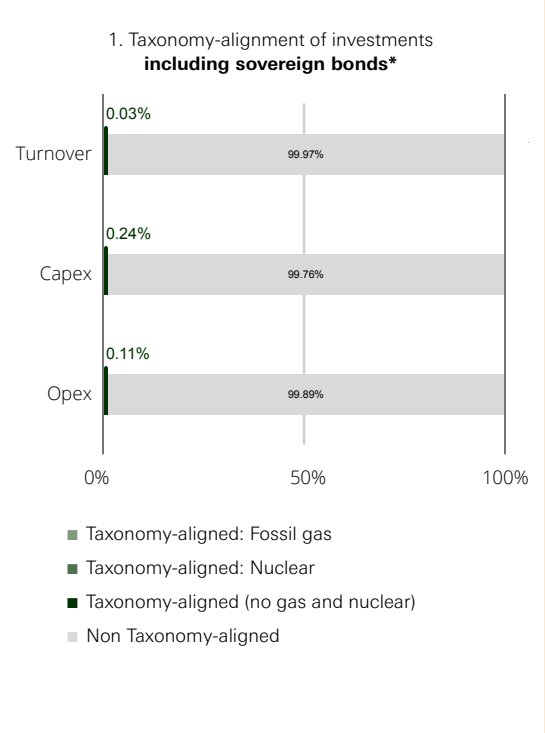
Taxonomy-aligned activities are expressed as a share of:

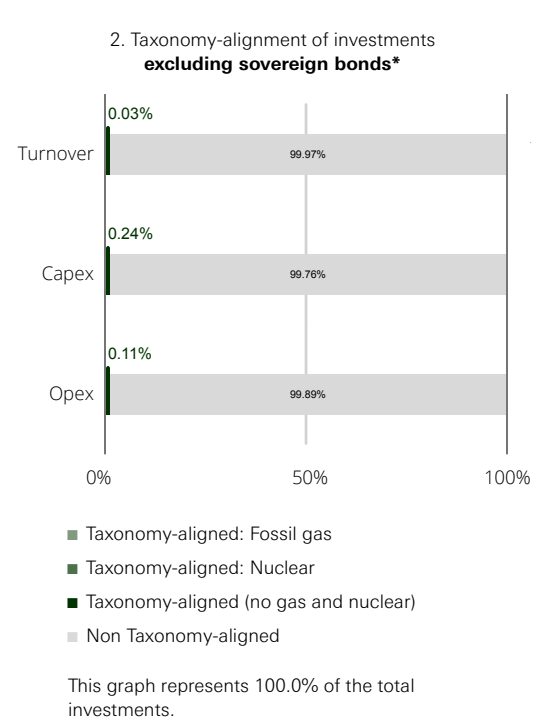
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.03%	0.00%
Revenue - Non Taxonomy-aligned	99.97%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.24%	0.05%
CAPEX - Non Taxonomy-aligned	99.76%	99.96%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.11%	0.02%
OPEX - Non Taxonomy-aligned	99.89%	99.98%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 9.04%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash, Eligible Collective Investment schemes and/or fnancial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards..

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund aimed to invest at least 85% of its assets in the Master Fund.

The investment objective of the Master Fund was to replicate the performance of the Master Fund Index, which provides investors the opportunity to gain specific exposure to small-cap equity securities from certain emerging market countries (as determined by the Index Provider) while integrating ESG metrics within an emerging markets equity index, while minimising as far as possible the tracking error between the Master Fund's performance and that of the Master Fund Index.

The Master Fund Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.
The Master Fund achieved this in the following ways:
1. Excluding securities of companies with exposure as defined by the Master Fund Index Provider as set out in the Master Fund Index methodology; and
2. The Index applies the MSCI ESG Universal methodology (which is available on the Index provider's website) to achieve its ESG objective by re-weighting free-foat market cap weights based upon certain ESG metrics, in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from their parent index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund did not have a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

  Not applicable.

- ***How did this financial product perform compared with the broad market index?***

  Not applicable

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - HSBC MSCI Emerging Markets Value Screened Fund

Legal Entity Identifier: 2138001JL2N97SCLAW06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 31.80% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

By virtue of investing at least 85% of its net assets in the HSBC MSCI Emerging Markets Screened Value UCITS ETF (the "Master Fund"), the Sub-Fund promoted the same characteristics as the Master Fund, being the investment in companies with an improvement of ESG rating compared to those of the MSCI Emerging Markets Index (the "Parent Index"), such that the Master Fund invested in companies with more favourable ESG ratings compared to the Parent Index.

The Master Fund sought to achieve the promotion of these characteristics by replicating the performance of the MSCI Emerging Markets Value Select Screens Advanced Index (the "Master Fund Index"). The improvement of the MSCI ESG rating against the Parent Index is achieved by the Master Fund Index through the removal of companies from the Parent Index based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and by weighting companies so as to improve the exposure of the Master Fund Index (and the Fund) to companies with more favourable MSCI ESG ratings compared to those in the Parent Index. The Sub-Fund did not use a reference benchmark to attain its environmental and/or social characteristics.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Benchmark
ESG score (third-party score)	7.29	6.21

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Benchmark
ESG score (third-party score)	31 December 2025	7.29	6.21
	31 December 2024	7.01	5.95

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives: - Transition to a lower carbon economy; - Supporting research and fnancing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); - Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity. Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classifcation as net zero aligned, or better, by the Investment Manager's net zero investment framework; - Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

The Sub-Fund did not commit to investing in sustainable investments. However, the Sub-Fund invested in sustainable investments that contributed to the above sustainable objectives, through either investment in underlying funds or direct investments.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third- party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.

HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Master Fund Index was constructed using MSCI proprietary data on each securities business involvement. The Business Involvement Screening Research ("BISR") highlighted each security's involvement or adherence to global sanctions, controversies and global norms (PAI 10, 11), carbon and sustainable impact (positive screening) (PAI 1,2,3).

As per the Master Fund Index methodology, securities involved in thermal coal mining and generation, oil & gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final Master Fund Index was calculated.

In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10).

Principal Adverse Impact	Period Ending	Fund	Broad Market Benchmark

1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	3.48	404,411,518.86
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	107.67	112.69
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	192.98	201.83
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	6.13%	6.19%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	10.64%	7.55%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	11.67%	Taiwan
Tencent Holdings Ltd	Communication Services	3.60%	China
SK hynix Inc.	Information Technology	3.36%	Korea
China Construction Bank Corporation Class H	Financials	3.00%	China
Baidu, Inc. Class A	Communication Services	2.58%	China
Samsung Electronics Co Ltd Pfd Non-Voting	Information Technology	2.48%	Korea
Samsung Electronics Co., Ltd.	Information Technology	2.42%	Korea
Hana Financial Group Inc.	Financials	2.08%	Korea
United Microelectronics Corp.	Information Technology	1.94%	Taiwan
Saudi Telecom Co.	Communication Services	1.93%	Saudi Arabia
Infosys Limited	Information Technology	1.64%	India
Bank of China Limited Class H	Financials	1.55%	China
Gold Fields Limited	Materials	1.52%	South Africa
Alibaba Group Holding Limited	Consumer Discretionary	1.51%	China
Industrial and Commercial Bank of China Limited Class H	Financials	1.47%	China

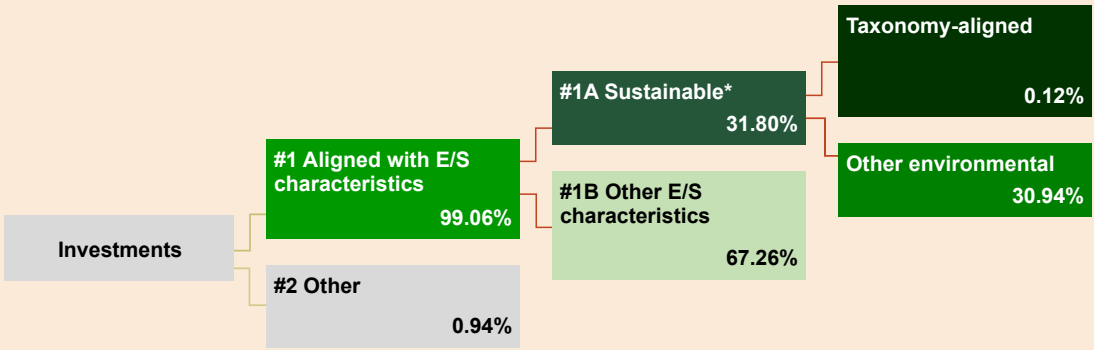
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

31.80% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	29.53%
Financials	21.43%
Consumer Discretionary	12.80%
Communication Services	12.74%
Health Care	6.26%
Materials	5.02%
Industrials	4.14%
Consumer Staples	3.80%
Real Estate	2.72%
Cash & Derivatives	0.94%
Utilities	0.62%
Electric Utilities	*0.41%*
Gas	*0.21%*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.12% of the Sub-Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

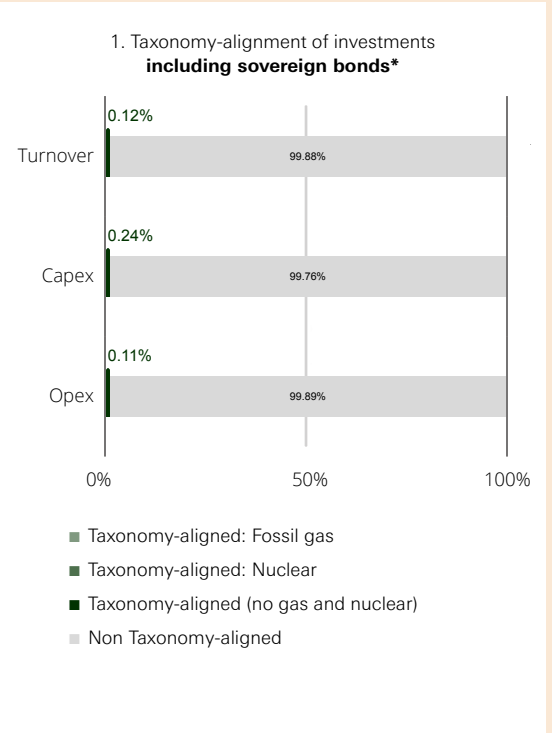
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

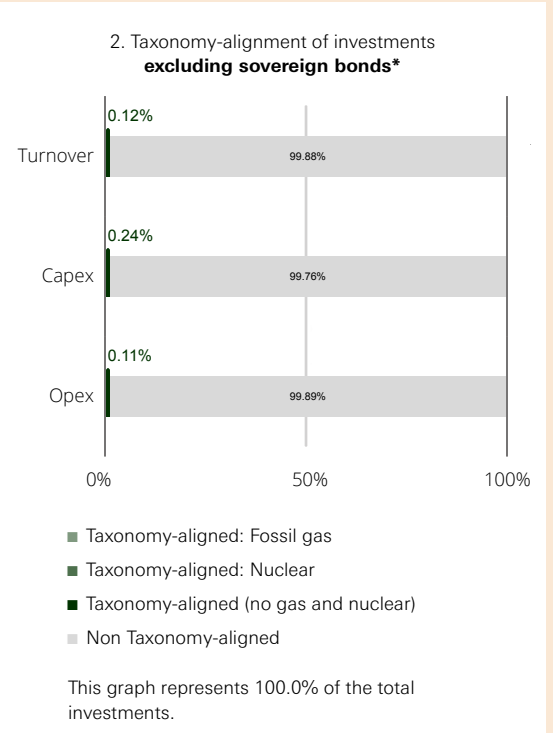
- [x] Yes:
  - [ ] In fossil gas
  - [x] In nuclear energy
- [ ] No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.01%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.12%	0.06%
Revenue - Non Taxonomy-aligned	99.88%	99.94%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.24%	0.23%
CAPEX - Non Taxonomy-aligned	99.76%	99.77%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.11%	0.07%
OPEX - Non Taxonomy-aligned	99.89%	99.93%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 30.94%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash, Eligible Collective Investment schemes and/or fnancial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund aimed to invest at least 85% of its assets in the Master Fund.

The investment objective of the Master Fund was to replicate the performance of the Master Fund Index, which provides investors the opportunity to gain specific exposure to equity securities with lower market valuations relative to their fundamental value (the "Value Factor") while integrating ESG metrics within an emerging markets (as determined by the Index Provider) equity index, while minimising as far as possible the tracking error between the Master Fund's performance and that of the Master Fund Index.

The Master Fund Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index. The Master Fund Index achieved this in the following ways:

1. Excluding securities of companies with exposure as defined by the Master Fund Index provider as set out in the Master Fund Index methodology; and

2. The Master Fund Index applied the MSCI ESG Target methodology (which is available on the Master Fund Index provider's website) to achieve its ESG objective by maximizing the exposure to the target factor(s) less a penalty for the common factor and stock-specific risk characteristics of each potential constituent, as well as placing an upper bound on the predicted tracking error of the Master Fund Index, in order to maximize the exposure to the target Factor along with 20% ESG score improvement of the Factor index relative to its parent market-cap weighted index.
HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

The Sub-Fund did not have a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not applicable .

- ***How did this financial product perform compared with the reference benchmark?***

  Not applicable.

- ***How did this financial product perform compared with the broad market index?***

  Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Multi-Factor EMU Equity Fund

Legal Entity Identifier: 213800AIYN2OLBNR7131

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 55.92% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund met the environmental and social characteristics ("E/S characteristics") through the following measures:

1. Better management of environmental and social risks, and where applicable opportunities, related to climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance, and corporate behaviour.

The Sub-Fund met this through investing in a minimum proportion of investments that met ESG score and individual pillar environmental ("E"), social ("S") and governance ("G") score standards, determined by the Investment Manager.

The Sub-Fund also met this through active consideration of higher ESG scoring investments compared to the Reference Performance Benchmark.

2. Supporting the transition to a lower carbon economy met through active consideration of low carbon intensity investments compared to the Reference Performance Benchmark.

3. Minimum corporate sustainability standards relating to human rights, labour rights, the environment, anti-corruption and responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") Principles. Where instances of potential violations of UNGC principles were identified, companies were subject to proprietary ESG due diligence checks to determine their suitability for inclusion in the Sub-Fund's portfolio and, if deemed unsuitable, excluded.

4. Minimum requirements relating to exposure to climate-related risk associated with thermal coal activities, health, and weapons related to international norms, standards and regulations.

The Sub-Fund met these through exclusion of thermal coal, tobacco and controversial and banned weapons (the "Excluded Activities"). The Excluded Activities are covered by the Investment Manager's Responsible Investment Policies and further detailed below.

The Sub-Fund was actively managed and did not track a benchmark. The Reference Performance Benchmark was used to measure the Sub-Fund's carbon intensity and ESG scores, but it was not designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics of the Sub-Fund.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Sub-Fund.

The performance of the sustainability indicators the Sub-Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data was based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Reference Benchmark
- ESG score (third-party score)	8.27	7.76
- Proportion of the Sub-Fund's investments meeting minimum ESG standards, determined as those investments meeting minimum ESG and E, and S and G scores set by the Investment Manager, which is expected to be over 51%	99.13%	NA
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	93.58	110.66

Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%

Excluded Activities

The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosure

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI EMU Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Reference Benchmark

	31 December 2024	0.00%	0.00%
	31 December 2023	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI EMU Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs");
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity; and

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores, measured as investments scored within the top 10% of their respective universes;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities; and

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

HSBC Asset Management considered PAIs at group level as part of its stewardship process and companies that were identified for severe violations or worst in class performers on certain PAIs were subject to further dialogue and ESG due diligence.Certain PAIs were also considered through exclusions - including for example controversial weapons and UNGC violations. Potential UNGC violations were identified by a third-party controversies-based research service.

The Sub-Fund also considered the following PAIs:
- Green house gas intensity of investee companies - Scope 1 & Scope 2.
- Violation of UNGC principles and OECD Guidelines For Multinational Enterprises.

• Share of investment involved in controversial weapons.

Principal Adverse Impact	Period Ending	Sub-Fund	Reference Benchmark
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	93.58	110.66
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI EMU Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
ASML Holding NV	Information Technology	6.68%	Netherlands
SAP SE	Information Technology	5.02%	Germany
Allianz SE	Financials	3.71%	Germany
Banco Santander, S.A.	Financials	3.60%	Spain

Credit Agricole SA	Financials	1.67%	France
Siemens Aktiengesellschaft	Industrials	1.64%	Germany
Erste Group Bank AG	Financials	1.63%	Austria

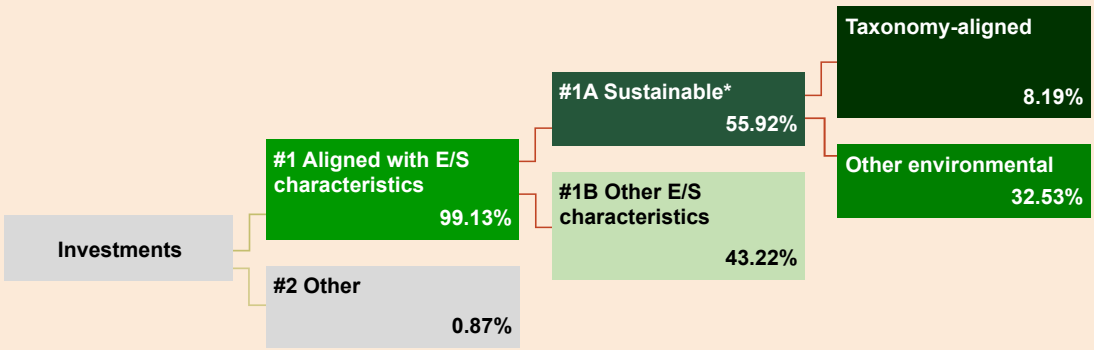
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

55.92% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Financials	26.25%
Industrials	21.62%
Information Technology	14.33%
Consumer Discretionary	10.93%
Utilities	6.80%
Electric Utilities	*4.42%*
Gas	*0.32%*
Multi-Utilities	*2.06%*
Health Care	4.45%
Consumer Staples	3.70%
Energy	3.08%
Integrated Oil & Gas	*3.08%*
Communication Services	2.97%
Real Estate	2.68%
Materials	2.33%
Cash & Derivatives	0.87%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

8.19% of the Sub-Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

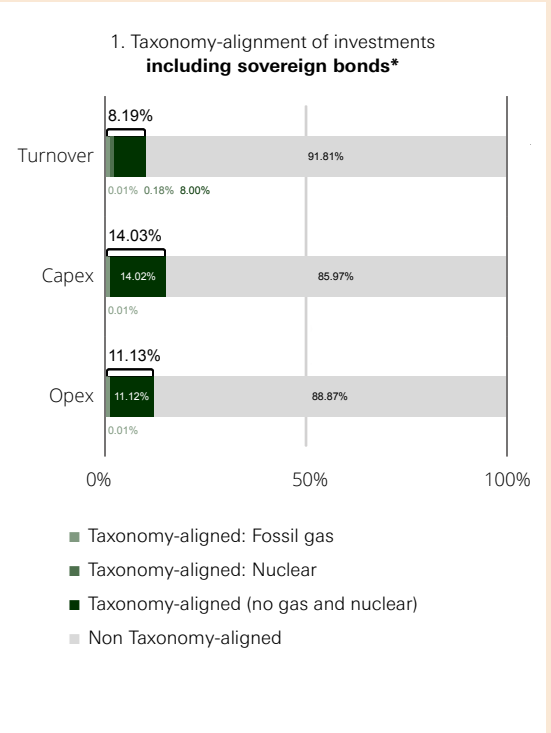
☑ In fossil gas ☑ In nuclear energy

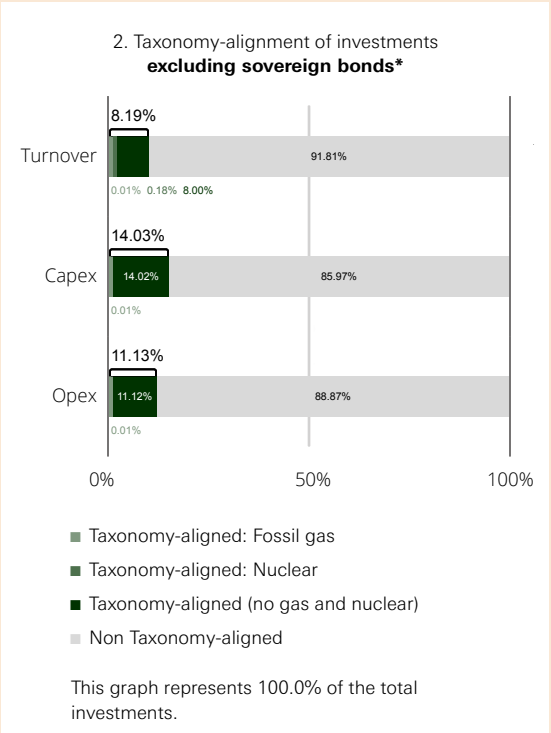
☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 6.75%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.01%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.18%	0.01%	0.01%
Revenue - Taxonomy-aligned (no gas and nuclear)	8.00%	6.85%	3.95%
Revenue - Non Taxonomy-aligned	91.81%	93.14%	96.03%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.01%
CAPEX - Taxonomy-aligned (no gas and nuclear)	14.02%	12.30%	9.38%
CAPEX - Non Taxonomy-aligned	85.97%	87.70%	90.60%
OPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
OPEX - Taxonomy-aligned (no gas and nuclear)	11.12%	10.38%	6.80%
OPEX - Non Taxonomy-aligned	88.87%	89.61%	93.19%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 32.53%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund may have also held cash and money market instruments (including bills, commercial paper and certificates of deposits) for ancillary liquidity purposes. The Sub-Fund may have also invested in the units or shares of CIS in order to achieve its investment objective. Financial Derivative Instruments ("FDI") may have been used for hedging and efficient portfolio management.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was actively managed and the investment strategy was implemented on a continuous basis through compliance and monitoring of the binding elements.

The optimised portfolio aimed for a lower carbon intensity and a higher ESG score, calculated respectively as a weighted average of the carbon intensities and ESG scores of the Sub-Fund's investments, than the weighted average of the constituents of the Reference Performance Benchmark. The Reference Performance Benchmark was used to compare the Sub-Fund's carbon intensity and ESG scores, but it was not designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics of the Sub-Fund.

The Investment Manager used a proprietary systematic investment process to create a portfolio which focused on risk premia offered by exposure to factors such as value, quality, momentum, low risk and size.

Following identification and ranking of the investment universe based on the above factors, the Investment Manager used a HSBC proprietary systematic portfolio construction process to create an optimised portfolio.

In order to lower exposure to carbon intensive businesses and raise the Sub-Fund's ESG score, all holdings in the portfolio were assessed for their individual carbon intensity and ESG scores.

The Sub-Fund did not invest in equities and equity equivalent securities of companies with specified involvement in specific excluded activities ("Excluded Activities") unless they went through an ESG due diligince assessment.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

The Sub-Fund did not have a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

  Not applicable.

- ***How did this financial product perform compared with the broad market index?***

  Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Multi-Factor Worldwide Equity Fund

Legal Entity Identifier: 213800HXWFR2TRMQGJ67

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 33.95% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund met the environmental and social characteristics ("E/S characteristics") through the following measures:

1. Better management of environmental and social risks, and where applicable opportunities, related to climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance, and corporate behaviour.

The Sub-Fund met this through investing in a minimum proportion of investments that met ESG score and individual pillar environmental ("E"), social ("S") and governance ("G") score standards, determined by the Investment Manager.

The Sub-Fund also met this through active consideration of higher ESG scoring investments compared to the Reference Performance Benchmark.

2. Supporting the transition to a lower carbon economy met through active consideration of low carbon intensity investments compared to the Reference Performance Benchmark.

3. Minimum corporate sustainability standards relating to human rights, labour rights, the environment, anti-corruption and responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") Principles. Where instances of potential violations of UNGC principles were identified, companies were subject to proprietary ESG due diligence check s to determine their suitability for inclusion in the Sub-Fund's portfolio and, if deemed unsuitable, excluded.

4. Minimum requirements relating to exposure to climate-related risk associated with thermal coal activities, health, and weapons related to international norms, standards and regulations.

The Sub-Fund met these through exclusion of thermal coal, tobacco and controversial and banned weapons (the "Excluded Activities"). The Excluded Activities are covered by the Investment Manager's Responsible Investment Policies and further detailed below.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Reference Benchmark
- ESG score (third-party score)	6.96	6.63
- Proportion of the Sub-Fund's investments meeting minimum ESG standards, determined as those investments meeting minimum ESG and E, and S and G scores set by the Investment Manager, which is expected to be over 51%	98.02%	NA
- GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	87.57	131.28
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	1.35%

Excluded Activities	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosure

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI All Country World Index (USD Net Total Return)

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Reference Benchmark

ESG score (third-party score)	31 December 2025	6.96	6.63
	31 December 2024	7.07	6.75
Proportion of the Sub-Fund's investments meeting minimum ESG standards, determined as those investments meeting minimum ESG and E, and S and G scores set by the Investment Manager, which is expected to be over 51%	31 December 2025	98.02%	NA
	31 December 2024	NA	NA
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	87.57	131.28
	31 December 2024	62.86	113.29
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	1.35%
	31 December 2024	0.00%	1.22%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.21%
	31 December 2024	0.00%	0.19%

Amendments to the investment policy and investment approach were made in October 2024 to reclassify the Sub-Fund as an Article 8 fund under the Sustainable Finance Disclosures Regulation (SFDR).

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs");
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity; and

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores, measured as investments scored within the top 10% of their respective universes;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities; and

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

HSBC Asset Management considered PAIs at group level as part of its stewardship process and companies that were identified for severe violations or worst in class performers on certain PAIs were subject to further dialogue and ESG due diligence.Certain PAIs were also considered through exclusions - including for example controversial weapons and UNGC violations. Potential UNGC violations were identified by a third-party controversies-based research service.

The Sub-Fund also considered the following PAIs:
- Green house gas intensity of investee companies - Scope 1 & Scope 2.
- Violation of UNGC principles and OECD Guidelines For Multinational Enterprises.
- Share of investment involved in controversial weapons.

Principal Adverse Impact	Period Ending	Sub-Fund	Reference Benchmark

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	87.57	131.28
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	1.35%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.21%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI All Country World Index (USD Net Total Return)

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	4.76%	United States of America
Microsoft Corporation	Information Technology	4.52%	United States of America
Apple Inc.	Information Technology	4.12%	United States of America
Amazon.com, Inc.	Consumer Discretionary	2.78%	United States of America
Alphabet Inc. Class A	Communication Services	2.02%	United States of America
Alphabet Inc. Class C	Communication Services	1.48%	United States of America
Meta Platforms Inc Class A	Communication Services	1.34%	United States of America
Broadcom Inc.	Information Technology	1.24%	United States of America
Tesla, Inc.	Consumer Discretionary	1.12%	United States of America
Johnson & Johnson	Health Care	1.08%	United States of America
ASML Holding NV	Information Technology	0.92%	Netherlands
Cisco Systems, Inc.	Information Technology	0.88%	United States of America

Home Depot, Inc.	Consumer Discretionary	0.84%	United States of America
American Express Company	Financials	0.78%	United States of America

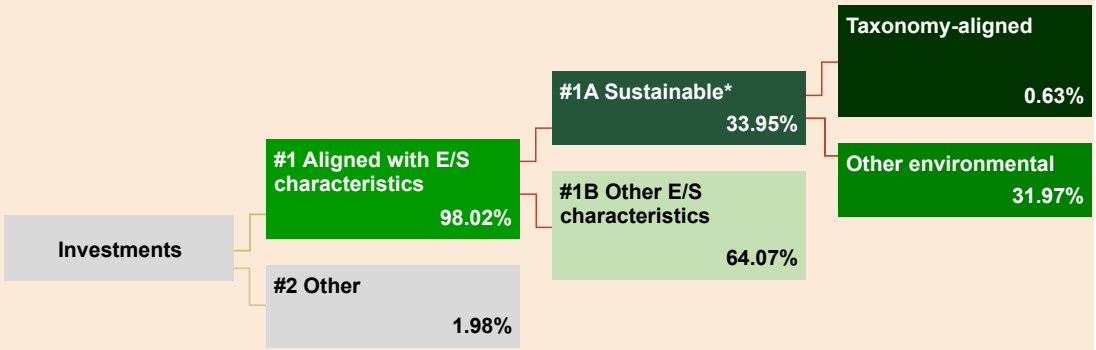
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

33.95% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	28.11%
Financials	19.56%
Industrials	11.98%
Consumer Discretionary	10.69%
Communication Services	9.99%
Health Care	6.40%
Materials	4.08%
Consumer Staples	2.85%
Real Estate	1.93%
Cash & Derivatives	1.81%
Utilities	1.54%
Electric Utilities	*1.24%*
Gas	*0.17%*
Multi-Utilities	*0.13%*
Energy	1.06%
Integrated Oil & Gas	*0.33%*
Oil & Gas Exploration & Production	*0.59%*
Oil & Gas Refining & Marketing	*0.03%*
Oil & Gas Storage & Transportation	*0.12%*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.63% of the Sub-Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

☑ In fossil gas ☑ In nuclear energy

☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

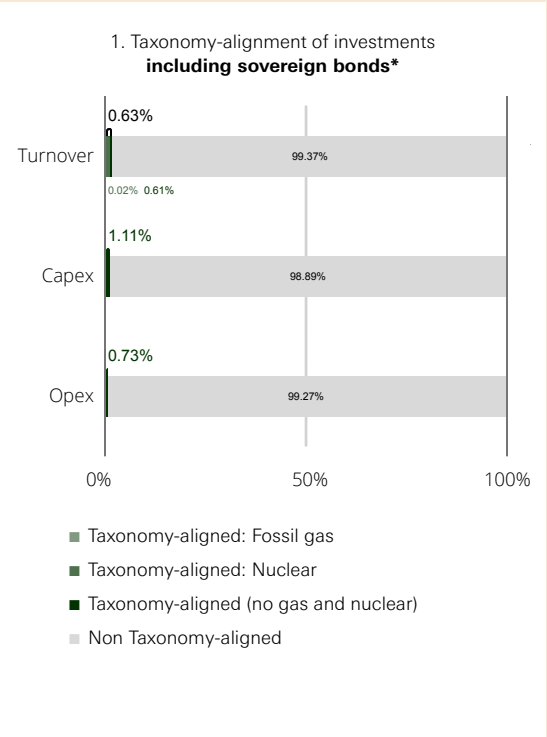
Taxonomy-aligned activities are expressed as a share of:

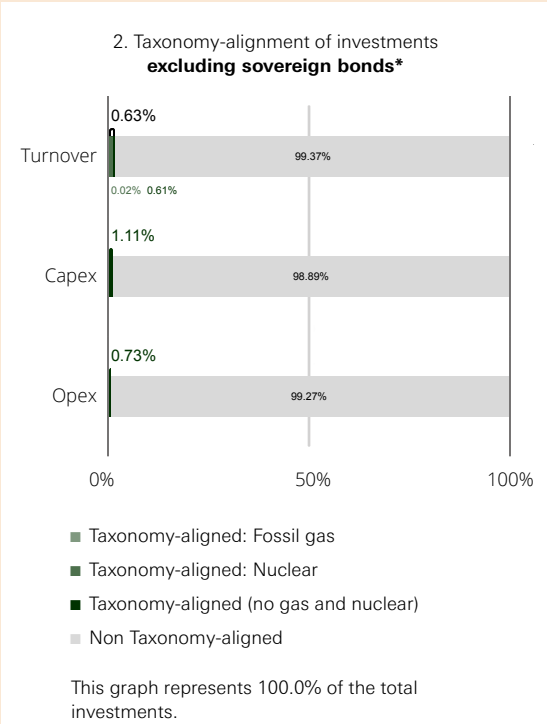
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.40%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.02%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.61%	0.65%
Revenue - Non Taxonomy-aligned	99.37%	99.35%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.11%	1.31%
CAPEX - Non Taxonomy-aligned	98.89%	98.69%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.73%	1.03%
OPEX - Non Taxonomy-aligned	99.27%	98.97%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 31.97%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund may have also held cash and money market instruments (including bills, commercial paper and certificates of deposits) for ancillary liquidity purposes. The Sub-Fund may have also invested in the units or shares of CIS in order to achieve its investment objective. Financial Derivative Instruments ("FDI") may have been used for hedging and efficient portfolio management.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund was actively managed and the investment strategy was implemented through compliance and monitoring of the binding elements.

The optimised portfolio aimed for a lower carbon intensity and a higher ESG score, calculated respectively as a weighted average of the carbon intensities and ESG scores of the Sub-Fund's investments, than the weighted average of the constituents of the Reference Performance Benchmark.

The Reference Performance Benchmark was used to compare the Sub-Fund's carbon intensity and ESG scores, but it was not designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics of the Sub-Fund.

The Investment Manager used a proprietary systematic investment process to create a portfolio which focused on risk premia offered by exposure to factors such as value, quality, momentum, low risk and size.

Following identification and ranking of the investment universe based on the above factors, the Investment Manager used a HSBC proprietary systematic portfolio construction process to create an optimised portfolio.

In order to lower exposure to carbon intensive businesses and raise the Sub-Fund's ESG score, all holdings in the portfolio were assessed for their individual carbon intensity and ESG scores.

The Sub-Fund did not invest in equities and equity equivalent securities of companies with specified involvement in specific excluded activities ("Excluded Activities") unless they went through an ESG due diligince assessment.HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Product Name: HSBC Global Funds ICAV - Multi Thematic Equity Fund

Legal Entity Identifier: 213800K133STG4Q4SH82

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 51.88% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund met the environmental and/or social characteristics through the following measures:

- investments that sought to find solutions for climate-responsible economic growth (such as climate and energy transition, circular economy and green infrastructure, and natural resources, agriculture and water);
- investments linked to the rapid emergence of new technology to disrupt and enhance existing processes (such as automation, disruptive technologies and digital transformation); and
- investments linked to changing demographics, living conditions and expectations (such as future consumer needs, social inclusion, and health innovation).

The Sub-Fund met these characteristics by virtue of it being a fund of funds and investing at least 80% of its net assets in:

funds that were classified as Article 8 or Article 9 funds under SFDR or were non-EU funds that were, in the opinion of the Investment Managers, consistent in all material respects with the requirements applicable to Article 8 or Article 9 funds under SFDR, and which were consistent with the thematic equity exposures (the "Underlying Funds"); and/or equity securities including common stocks and other transferable securities such as convertible securities, preferred securities, convertible preferred securities, warrants and rights or equity equivalent securities (ADRs, GDRs and non-voting depositary receipts which did not embed a derivative and/or leverage) that were consistent with these thematic equity exposures ("Direct Investments").

The Sub-Fund invested up to 100% of its NAV in units or shares of Eligible Collective Investment Schemes, as described in the "Investment Objective and Policy" section of the Prospectus, whose objective was to invest in one or more of the asset classes in which the Sub-Fund may invest, that were consistent with these thematic equity exposures detailed above.

Underlying Funds that were managed by third party providers were subject to an additional due diligence process on an initial basis before investment, and on an ongoing basis following investment, whereby Third Party Managers were required to complete a HSBC group due diligence questionnaire (the "ESG Questionnaire") which allowed each Investment Manager to considers the quality of the fund management teams of Underlying Funds and the key elements of those funds' investment processes, including fund sustainability criteria and, in collaboration with its affiliates, ensured the funds' compliance with sustainable and stewardship and engagement policies applied by the Investment Managers.

The Sub-Fund did not use a reference benchmark to attain its environmental and/or social characteristics.

The Sub-Fund did not use derivatives to attain the environmental and/or social characteristics of the Sub-Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Sub-Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Reference Benchmark
The funds in the Sub-Fund's portfolio that are Underlying Funds (i.e. funds tha t are classified as Article 8 or Article 9 funds under SFDR or are non-EU funds that are, in the opinion of the Investment Managers, consistent in all material respects with the requirements applicable to Article 8 or Article 9 funds under SFDR, and which are consistent with the thematic equity exposures described above)	92.10%	N/A
The Direct Investments of the Sub-Fund that are consistent with the thematic equity exposures described above	0.00%	N/A

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI All Country World Index

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

  The sustainable investments made by the Sub-Fund contributed to one or more of the following environmental and/or social objectives: - Transition to a lower carbon economy; - Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation; - Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and - Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity. Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria: - Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework; - Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager; and - Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

  The Sub-Fund did not commit to investing in sustainable investments. However, the Sub-Fund invested in sustainable investments that contributed to the above sustainable objectives, through either investment in underlying funds or direct investments.

  Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
  investing, by selecting your location and then choosing Policies and Disclosures.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

  The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

  In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

  How were the indicators for adverse impacts on sustainability factors taken into account?

  The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
  To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principle adverse impacts on sustainability factors.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	1.94%	United States of America
Palantir Technologies Inc. Class A	Information Technology	1.32%	United States of America
Xylem Inc.	Industrials	1.17%	United States of America
Microsoft Corporation	Information Technology	1.07%	United States of America
Taiwan Semiconductor Manufacturing Co., Ltd. Sponsored ADR	Information Technology	1.07%	Taiwan
Broadcom Inc.	Information Technology	0.98%	United States of America
RTX Corporation	Industrials	0.83%	United States of America
Cisco Systems, Inc.	Information Technology	0.82%	United States of America
Cheniere Energy, Inc.	Energy	0.81%	United States of America
American Water Works Company, Inc.	Utilities	0.79%	United States of America
Oracle Corporation	Information Technology	0.77%	United States of America
Pennon Group Plc	Utilities	0.77%	United Kingdom of Great Britain and Northern Ireland
Cellnex Telecom S.A.	Communication Services	0.76%	Spain
Micron Technology, Inc.	Information Technology	0.76%	United States of America
Companhia de Saneamento Basico do Estado de Sao Paulo SABESP	Utilities	0.75%	Brazil

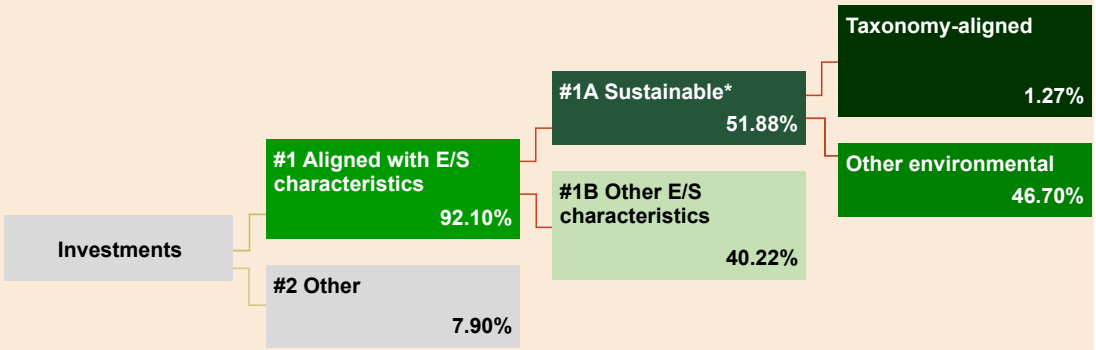
Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

51.88% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	27.81%
Health Care	15.40%
Industrials	10.82%
Utilities	9.29%
Electric Utilities	*1.96%*
Gas Utilities	*0.18%*
Multi-Utilities	*1.74%*
Other	9.27%
Financials	6.01%
Materials	4.59%
Communication Services	4.05%
Consumer Discretionary	3.69%
Energy	3.33%
Coal & Consumable Fuels	*0.02%*
Oil & Gas Equipment & Services	*0.10%*
Oil & Gas Storage & Transportation	*3.20%*
Real Estate	2.28%
Consumer Staples	2.03%
Cash & Derivatives	1.46%
Government	0.00%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.27% of the Sub-Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

☑ In fossil gas ☑ In nuclear energy

☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

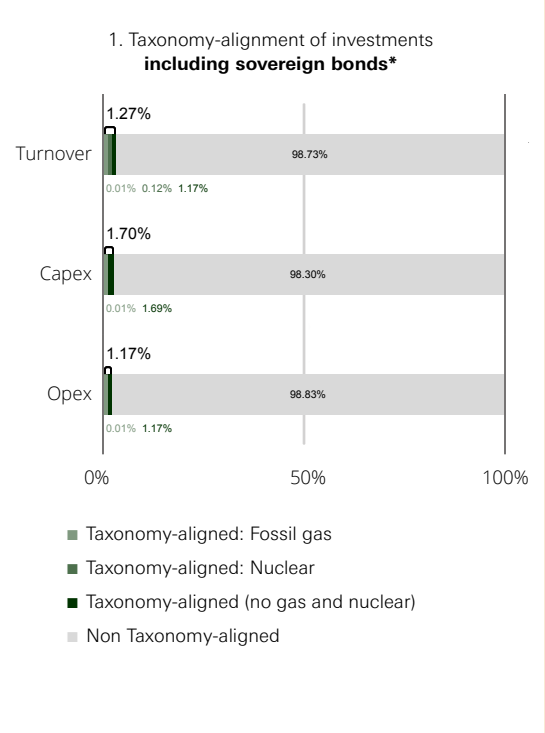
Taxonomy-aligned activities are expressed as a share of:

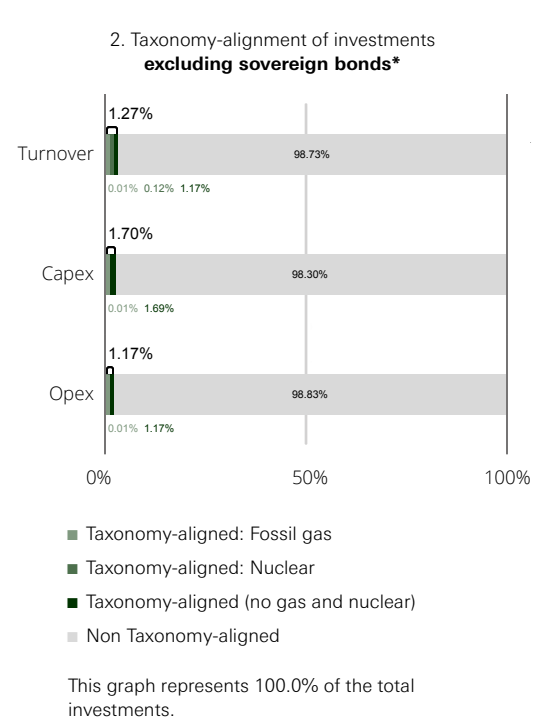
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.62%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.01%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.12%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.17%	0.00%
Revenue - Non Taxonomy-aligned	98.73%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.69%	0.00%
CAPEX - Non Taxonomy-aligned	98.30%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.01%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.17%	0.00%
OPEX - Non Taxonomy-aligned	98.83%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 46.70%. The Sub-Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Sub-Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund may have held cash and money market instruments (treasury bills, commercial paper and certificates of deposits) and financial derivative instruments for hedging and EPM purposes only. For each of these investments, there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Sub-Fund aimed to invest at least 80% of its assets in: (i) Underlying Funds that were classified as Article 8 or Article 9 funds under SFDR or are non-EU funds that were, in the opinion of the Investment Managers, consistent in all material respects with the requirements applicable to Article 8 or Article 9 funds under SFDR; and/or (ii) Direct Investments.

All Underlying Funds and Direct Investments must have been consistent with the themes identified in the Thematic Framework and were approved by the Investment Managers in collaboration with their affiliates, which considered the quality of the fund management teams of Underlying Funds / issuers and the key elements of those funds' / issuers' investment processes, including sustainable criteria and ensured compliance with the sustainable and stewardship and engagement policies applied by the Investment Managers.

The themes identified in the Thematic Framework related to: (i) investments that seek to find solutions for climate-responsible economic growth (such as climate and energy transition, circular economy and green infrastructure, and natural resources, agriculture and water); (ii) investments linked to the rapid emergence of new technology to disrupt and enhance existing processes (such as automation, disruptive technologies and digital transformation); and (iii) investments linked to changing demographics, living conditions and expectations (such as future consumer needs, social inclusion, and health innovation).

How did this financial product perform compared to the reference benchmark?

The Sub-Fund did not have a reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

  Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC Global Funds ICAV - Sustainable Development Bank Bonds UCITS ETF

Legal Entity Identifier: 213800OAQYHCRHQY3Y87

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☑ **Yes**	☐ **No**
☐ It made **sustainable investments with an environmental objective: 99.00%**	☐ It **promoted Environmental/ Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☑ It made **sustainable investments with a social objective: 99.00%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The investment objective of the Fund was to achieve regular income and capital growth while seeking to invest in bonds issued by select multilateral development banks the proceeds of which financially support sustainable economic development in developing countries.

The Fund sought to achieve its sustainable investment objective by tracking the FTSE World Broad Investment-Grade USD Multilateral Development Bank Bond Capped Index (the "Index") which measures the performance of US Dollar denominated debt issued by select multilateral development banks that are supranational institutions with mission statements that state the intention to promote sustainable economic development in developing countries by:

financially supporting their sustainable development goals; or
providing non-financial support for infrastructure development, such as policy advice or technical assistance.

The Index applied controversial conduct exclusions based on United Nations Global Compact (UNGC) Principles to the issuers. In addition, each issuer in the Index needs to publicly disclose that they have safeguarding policies in place to mitigate and reduce environmental and social risks in the public domain arising from the projects they finance. Issuers that are non-compliant for UNGC violations or do not have safeguard policies are removed from the Index at the next monthly rebalance.
The Index was used as a reference benchmark for the purpose of attaining the sustainable investment objective.
The Sub-Fund did not use derivatives to attain the sustaintable investment objective.
The performance of the sustainability indicators used to measure the attainment of the sutainable investment objective of the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.
The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Sub-Fund	Reference Benchmark
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
The exposure of the fund to bonds issued by multilateral development banks with a mission statement to promote sustainable economic development in developing countries by financially supporting their sustainable development goals or by providing non-financial support for infrastructure development such as policy advice or technical assistance, as determined by the Index Provider, which is expected to be at least 90%	92.34%	100.00%
The exposure of the Fund to issuers who disclose the safeguard policies they have in place to mitigate and reduce environmental and social risks in the public domain, as determined by the Index Provider, which is expected to be 90%	92.34%	100.00%
Excluded Activities	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosure	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE Fixed Income FTSE World Broad Investment-Grade USD Multilateral Development Bank Bond Capped Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Sub-Fund	Reference Benchmark
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
	31 December 2024	0.00%	0.00%
The exposure of the fund to bonds issued by multilateral development banks with a mission statement to promote sustainable economic development in developing countries by financially supporting their sustainable development goals or by providing non-financial support for infrastructure development such as policy advice or technical assistance, as determine d by the Index Provider, which is expected to be at least 90%	31 December 2025	92.34%	100.00%
	31 December 2024	99.79%	100.00%

	31 December 2024	99.79%	100.00%
Excluded Activities			
Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%
	31 December 2024	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.
Reference Benchmark - FTSE Fixed Income FTSE World Broad Investment-Grade USD Multilateral Development Bank Bond Capped Index

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The sustainable investments in the Sub-Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Sub-Fund deemed sustainable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Sub-Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Sub-Fund but did not count toward the portion of 'sustainable investments' within the Sub-Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI 16 (Investee companies subject to social violations) was taken into account in the Index construction process under which the each issuer needs to disclose they have safeguarding policies in place to mitigate and reduce environmental and social risks in the public domain arising from the projects they finance.

This disclosure on the public websites was reviewed on an annual basis in July of each year and taken into account at every rebalance. Moreover, the Index must only have contained multilateral development banks that were supranational institutions with mission statements that state the intent to promote sustainable economic development in developing countries, by financially supporting their sustainable development goals, or by providing non-financial support for infrastructure development, such as policy advice or technical assistance.

Principal Adverse Impact	Period Ending	Sub-Fund	Reference Benchmark
16. # Investee countries subject to social violations	31 December 2025	0.00	0.00
16. % Investee countries subject to social violations	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Cash and derivatives were excluded

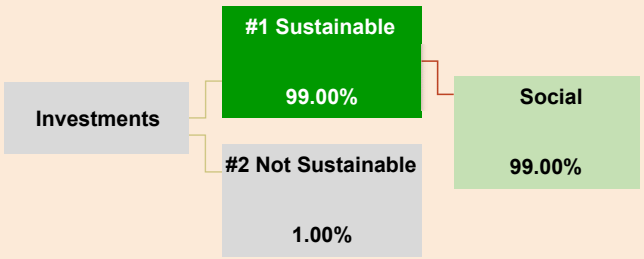
What was the proportion of sustainability-related investments?

99.00% of the portfolio was invested in sustainable investments.

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?



#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

*A company or Issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1 Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other, do not equal #1 Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Government	99.45%
Financials	0.29%
Cash & Derivatives	0.23%
Other	0.03%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy [1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

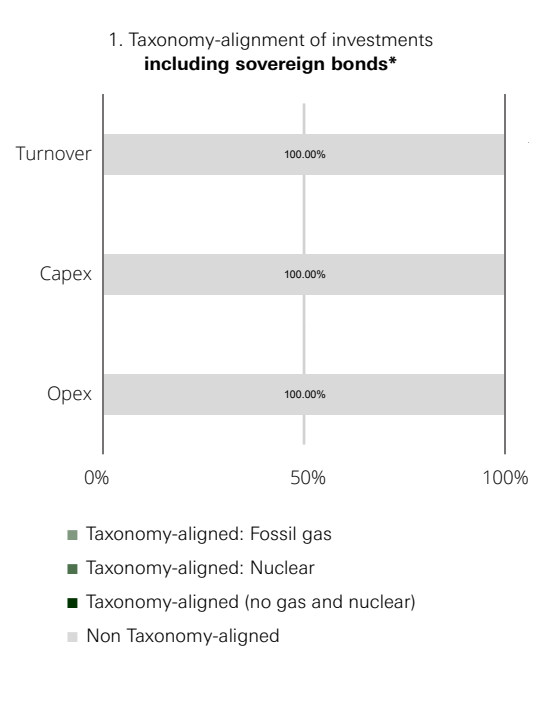
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

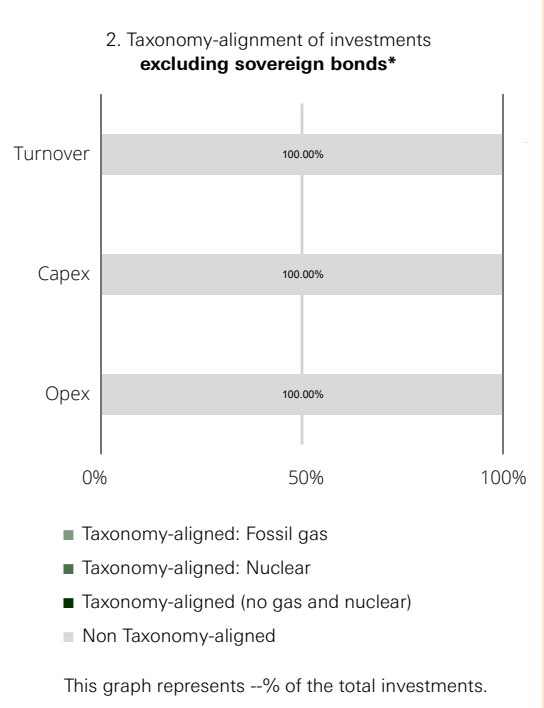
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.





* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period Sub-Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The Sub-Fund did not make any sustainable investments with an environmental objective.

What was the share of socially sustainable investments?

99.00%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Other instruments such as cash, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for hedging and liquidity management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The investment objective of the Sub-Fund was to achieve regular income and capital growth while seeking to invest in bonds issued by select multilateral development banks the proceeds of which financially support sustainable economic development in developing countries. The Sub-Fund had a sustainable investment objective to invest in bonds the proceeds of which financially supported sustainable economic development in developing countries. The Sub-Fund achieved its sustainable investment objective by tracking the Index which had a methodology aligned with that sustainable objective and so the Index was designated as the Sub-Fund's reference benchmark for the purpose of attaining that sustainable objective.

The Sub-Fund used Optimisation techniques which took into account tracking error, trading costs and availability of Index constituents when constructing the portfolio.

The bonds in the Index were issued by multilateral development banks that are supranational institutions with mission statements that state the intent to promote sustainable economic development in developing countries, by financially supporting their sustainable development goals, or by providing non-financial support for infrastructure development, such as policy advice or technical assistance. To be eligible for inclusion in the Index, a multilateral development bank must have all of the G7 countries as members.

The Index applied controversial conduct exclusions based on UNGC to the multilateral development banks. In addition, each multilateral development bank needed to disclose that they have safeguard policies in place to mitigate and reduce environmental and social risks in the public domain arising from the projects they finance. This disclosure on the public websites was reviewed on an annual basis in July. If applicable, multilateral development banks that do not have safeguard policies were removed from the Index at the next monthly rebalance.

How did this financial product perform compared to the reference sustainable benchmark?

See below for details on how the Sub-Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Index measured the performance of US dollar-denominated debt issued by select multilateral development banks in the FTSE World Broad Investment-Grade Bond Index and included issuers with a minimum credit quality of BBB- by S&P or Baa3 by Moody's. The market weight of the issuers was capped at 25%

The Index must only contain multilateral development banks that were supranational institutions with mission statements to promote sustainable economic development in developing countries, by financially supporting their sustainable development goals, or by providing non-financial support for infrastructure development, such as policy advice or technical assistance. To be eligible for inclusion, a multilateral development bank must have all of the G7 countries as members.

Issuers that were non-compliant for UNGC violations or who did not disclose the safeguard policies that they have in place in the public domain were removed from the Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

In seeking to achieve its investment objective, the Sub-Fund invested in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Sub-Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Sub-Fund	Reference Benchmark
Responsible business practice in line with UNGC and OECD principles		
Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00%	0.00%
The exposure of the fund to bonds issued by multilateral development banks with a mission statement to promote sustainable economic development in developing countries by financially supporting their sustainable development goals or by providing non-financial support for infrastructure development such as policy advice or technical assistance, as determined by the Index Provider, which is expected to be at least 90%	92.34%	100.00%
The exposure of the Fund to issuers who disclose the safeguard policies they have in place to mitigate and reduce environmental and social risks in the public domain, as determined by the Index Provider, which is expected to be 90%	92.34%	100.00%
Excluded Activities	The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosure	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE Fixed Income FTSE World Broad Investment-Grade USD Multilateral Development Bank Bond Capped Index

How did this financial product perform compared with the broad market index?

With the exception of issuers violating UNGC principles, the sustainability indicators selected for this Sub-Fund are specific to the multilateral development bank bonds universe, which only makes up a small proportion of the broader investment universe, as such no comparison to a Broad Market Index has been provided.
